cacconference.org

CRIMES AGAINST CHILDRENCE CONFERENCE

AUGUST 10-13, 2015 | SHERATON HOTEL DALLAS, TX

PRESENTED BY:

Dallas Children's Advocacy Center and Dallas Police Department

Lynn M. Davis President & CEO Dallas Children's Advocacy Center

Welcome to Dallas!

Thank you for joining us for the 27th Annual Crimes Against Children Conference, and thank you for choosing this Conference for your professional training experience. We hope you enjoy your week in Dallas and take advantage of this year's outstanding learning and networking opportunities. Here are a few of the highlights:

- This year's exhibitors will offer a wide range of informational resources for all child abuse professionals. Some exhibitors are also providing product demonstrations on Tuesday and Wednesday in the City View rooms. Attendees who participate in a product demonstration will be entered into two drawings for an iPad or a Google Nexus tablet. The drawings will be held during the Rustic Rodeo on Wednesday evening at 7:45 p.m. You must be present to win.
- We will again take you behind the scenes of many complex investigations, such as the suicide of Amanda Todd, a teenager who was cyberbullied and exploited which led to the arrest of a Dutch man using many aliases to blackmail Todd. We will also take you behind the scenes of the investigation and prosecution of Ariel Castro, a man who held three women captive and tortured them for more than a decade. Look for the asterisk (*) that designates the case studies offered this week.
- We are again providing hands-on computer lab training and are now including more labs for non-law enforcement attendees. If you did not register prior to arriving, visit the 3rd floor of the conference center to check for open spots. These spots fill quickly.
- We are proud to again host the Technology Coalition, where Facebook, Google, Yahoo!, Microsoft, and others will gather to share information about fighting child sexual exploitation online.
- Don't forget to sign up at the Help Desk for a tour of the Dallas Children's Advocacy Center's state of the art facility! Tours will be held on Tuesday and Wednesday from 10:30am-1:30pm. Lunch is included.
- We strive to be responsive to the needs of our attendees. We actively listen to feedback and make adjustments each year. Check out page 7 to see what's new for 2015!

Thank you for all that you do in our collective effort to protect and serve children around the world. Have an excellent conference experience!

DALLAS CHILDREN'S ADVOCACY CENTER

MISSION

The mission of the Dallas Children's Advocacy Center (DCAC) is to improve the lives of abused children in Dallas County and to provide national leadership on child abuse issues.

CORE VALUES

The children come first in all that we do.

We operate as a seamless team.

Each of us acts with a servant's heart.

OUR IMPACT IN 2014

We moved into our 56,000 sq. ft. building in 2013. We hope you will tour our Center while attending the Crimes Against Children Conference!

Visit the Help Desk to sign up for a tour on Sunday or Monday. Tours are offered Tuesday and Wednesday. Pre-registration is required and lunch is included.

Where healing begins for abused children

DALLAS POLICE DEPARTMENT

"The collaboration in the setting of the CAC is seamless."

- DALLAS CHIEF OF POLICE

THE DALLAS POLICE DEPARTMENT is one of the original partner agencies supporting the work of the Dallas Children's Advocacy Center (DCAC). Since DCAC was established in 1991, the Department's Child Abuse Squad has been housed at DCAC, helping ensure a cooperative working relationship among detectives, DCAC staff, medical experts, and Child Protective Services (CPS). The Child Abuse Squad investigates familial physical and sexual abuse cases and cases of fatal child abuse and neglect. The Squad also investigates incidents of suspected abuse and neglect referred to police by CPS.

The Child Exploitation Squad investigates offenses of non-familial child sexual abuse and exploitation, juvenile prostitution, non-Internet child pornography, and child abductions. The Squad utilizes DCAC facilities on a routine basis for conducting forensic interviews.

The Sex Offender Compliance Squad's central responsibility is enforcement of Texas sex offender registration laws. This squad includes two teams: Registration and the Sex Offender Apprehension Program (SOAP).

The Internet Crimes Against Children (ICAC) Task Force is responsible for investigating cases of technology-facilitated child pornography and cases of child sexual exploitation or abuse that result from contact over the Internet or other electronic means.

In 2003, the Dallas Police Department became part of the FBI National Innocence Lost Task Force to combat domestic trafficking of children. As a result of

this task force involvement, in November 2004, the High Risk Victims and Trafficking Team (HRVT) was formed within the Child Exploitation Squad to more effectively deal with child victims of sex trafficking.

The units of the Dallas Police Department described above enjoy close working relationships with the Dallas office of the FBI. A Crimes Against Children Task Force was formed in 1995, combining the resources and expertise of both agencies. This Task Force works cooperatively on all sexual exploitation cases which may involve federal violations such as computer child pornography, juvenile prostitution, and child abductions. The Dallas detectives assigned to this Task Force have been deputized as both U.S. Marshals and Special Investigators of the Texas Attorney General's Office to assist them in filing criminal charges in exploitation cases.

PROGRAM OVERVIEW

Welcome to the 27th Annual Crimes Against Children Conference.

We are glad you have joined us and hope that you enjoy your week in Dallas at our internationally recognized conference! Monday morning begins with an opening session that includes the conference keynote presentations. It will also provide you with updated conference information.

During the conference, there will be 26 workshops and 10 interactive computer labs operating concurrently. Selected workshops are repeated. The schedule is broken down by date and time in this program. Any updates to this schedule will be communicated via information screens located throughout the conference center. If you cannot find something you are looking for, please do not hesitate to go to the HELP DESK or ask one of our Conference staff or volunteers in aqua blue t-shirts.

We appreciate the hard work you do, and hope you have a great conference experience!

CONFERENCE SCHEDULE

Please see page 52 for the Computer Lab schedule.

SUNDAY

OPENING PLENARY

Monday, August 10th, 8:30-9:45 AM

Lonestar Ballroom

State of the Industry Remarks EMILY VACHER, FACEBOOK

Emily Vacher joined Facebook in 2011 and is currently Trust & Safety Manager with Facebook's Security team. Emily is responsible for law enforcement outreach, global safety initiatives, safety education, and security policy matters. She is currently focusing on Facebook's AMBER Alert program and child safety issues. Emily works extensively with the National Center for Missing & Exploited Children (NCMEC) and serves as a member of NCMEC's Team ADAM/ Project Alert and NCMEC's law enforcement/industry liaison committee. Before she joined Facebook, Emily was a Special Agent with the FBI for more than a decade, leading a broad range of federal investigations. Emily holds an MS and MPA from Syracuse University/Maxwell School of Citizenship & Public Affairs and a J.D. from Syracuse University College of Law.

Partner Keynote DIRECTOR SARAH SALDAÑA, ICE

As ICE's Director, Sarah Saldaña leads the largest investigative agency within the U.S. Department of Homeland Security. In this role, Director Saldaña advances ICE's mission to promote homeland security and public safety through the criminal and civil enforcement of approximately 400 federal laws governing border control, customs, trade and immigration. Previously, Director Saldaña served as the United States Attorney for the Northern District of Texas. She graduated Summa Cum Laude from Texas A&I University and earned her J.D. degree from Southern Methodist University. Director Saldaña also holds the distinction of being the first Latina appointed by President Barack Obama and confirmed by the U.S. Senate as ICE's Director.

Presentation of Award to Law Enforcement Professional LOU LUZYNSKI, WATCH SYSTEMS

Lou Luzynski is the co-founder and managing partner of Watch Systems. In this role, Lou directs all financial aspects of the business including accounting practices, budgeting, financial planning, interface with the financial community, financial analysis, acquisitions and ventures, and monitoring of financial performance. Prior to Watch Systems, Lou was President and Chief Executive Officer of Fuelman. Lou earned a B.A. in Accounting with Cum Laude honors from St. Louis University and is a Certified Public Accountant.

Survivor Address BRIF W.

Our survivor keynote is Brie W., whose full identity is being kept confidential. Brie was victimized in a widely traded child pornography series, "The BluePillow." Originally reported by the Danish National Police, NCMEC linked the photo series to California through a trash can in the background of a photo. A nearly month long investigation, based on details in the photos and videos in the series, led to her rescue and to the arrest and conviction of her abuser/child pornographer. Brie has since emerged as an advocate of efforts against child sexual exploitation and trafficking.

TIPS FOR A SUCCESSFUL CONFERENCE

Welcome to Dallas! We're so glad you're here!

WORKSHOP POLICY

Please do not record or take any photos in workshops. This is against our policy, and you will be asked to leave the workshop and delete any recorded content. If the issue persists beyond the first offense, you may be asked to leave the conference.

REMEMBER YOUR NAME BADGE

You will not be permitted access into any sessions without your name badge. If you misplace your name badge, please check with the Help Desk to see if it has been turned in. You will need to provide a valid picture ID and \$5 to replace it.

ARRIVE TO CLASS EARLY

If you have your eye on a specific class and want to ensure a seat, arrive early. Have back up workshops in mind in case your first choices are full. Check the schedule for possible repeats of the most popular classes.

WEAR LAYERS

Dallas in August...what can we say? It is HOT outside, but COLD inside. Be prepared with layered clothes as the classrooms are chilly.

LEARN YOUR WAY AROUND

Take a few minutes to review the maps in your final program (pages 10 and 11) and learn some of the important places throughout the Sheraton Hotel and Conference Center as well as the Marriott Dallas City Center and the Plaza of the Americas.

Here are a few tips for you:

- Find the Skybridge! This connects the Sheraton Conference Center to the Marriott Dallas City Center and the Plaza of the Americas, where you'll find fantastic lunch options.
- The Skybridge will be open Sunday 12:00-8:00pm and until 8:00pm every evening. Outside of these times, guests staying at the Marriott will need to cross at the street level.
- Follow the signs. We have done our best to provide directional signs that will help you as you locate classrooms, and other events throughout the week.

KNOW YOUR TRANSPORTATION OPTIONS

See page 8 to learn more about your transportation and dining options in Dallas.

HANDOUTS

All handouts are available on Dropbox. The access link and password were emailed to each attendee before the conference. If you did not receive this email, please visit the Help Desk for information on accessing handouts.

INFORMATION FOR NURSING MOTHERS

Privacy for nursing mothers can be found in City View 4. Please visit the Help Desk if you need assistance locating this room.

SAFETY FIRST

If you are ever uncomfortable or feel unsafe during the conference, please visit the Help Desk and we will address your concerns.

NETWORKING

The camaraderie and networking opportunities at our conference are unparalleled. Visit the exhibitors to learn about professional resources available to you. See page 77 for a map of exhibitor booths.

Don't forget to attend:

- Meet and Greet in the Exhibit Hall Monday Evening
- Dallas Police Association Hospitality Event *Tuesday Evening*
- Rustic Rodeo Wednesday Evening

If there is anything we can do to assist you in having a great time in Dallas and a wonderful conference experience, please don't hesitate to stop by the Help Desk or let one of our staff or volunteers know.

Have a great conference!

Conference Team

CONFERENCE IMPROVEMENTS

We take feedback very seriously from our conference attendees and work every year to improve from the prior year. Here are some of the things we heard from you in 2014 that we are excited to offer you this year:

YOU ASKED FOR

"More classes and a later start in the morning."

Sessions now start at 8:30 AM. Some popular classes are now scheduled over the traditional lunch hour.

YOU ASKED FOR

"Computer labs for non-law enforcement professionals."

See the labs that state "Open to all conference attendees" in the description.

Special registration is required for all labs.

Note that the lab schedule is different from the regular workshop/case study schedule, so plan your days carefully. The computer lab schedule is on page 52.

YOU ASKED FOR

"Better transportation from offsite hotels with conference blocks."

We have continuous bus service from the Fairmont, Adolphus,
Magnolia (downtown), and Aloft starting Monday at 7:00 AM daily.

Stay at The Highland or Magnolia Park Cities to enjoy the shopping, restaurants and movie theatre at Mockingbird Station, and grab the DART light rail train to come to the conference (just two quick stops away at the Pearl Street Station).

YOU ASKED FOR

"Free Wi-Fi in the conference center."

Done! Access Password: cacc2015

YOU ASKED FOR

"A place to put your coffee and continental breakfast in the Opening Plenary."

The seating in the main Lone Star Ballroom will continue to be set theatre style, but if you go to the Dallas ballrooms on the exhibit hall level (ground floor of conference center), the room will be set classroom style. We're live streaming the Plenary session to this room so you can spread out and enjoy your coffee and continental breakfast!

YOU ASKED FOR

"Networking opportunities to meet your professional colleagues."

We have added several professional forums for you! The forums provide not only great educational experiences, but chances to meet colleagues and make some new friends.

DISCOVER DALLAS

VISIT ONE OF OUR UNIQUE DALLAS NEIGHBORHOODS FOR LUNCH OR DINNER!

BISHOP ARTS DISTRICT: Eno's Pizza Tavern, Gloria's, Hattie's

THE ANNUAL CRIMES AGAINST CHILDREN CONFERENCE IS PRESENTED BY

A SPECIAL THANKS TO THIS YEAR'S

CONFERENCE TRAINING PARTNERS, SPONSORS, AND SUPPORTERS

We are proud to honor the men and women who defend our nation's children.

facebook

Kick-start your Sex Offender Registry

FREE Consultation with Sr. Law Enforcement Consultants

9AM -4PM Pearl 5 Monday, Tuesday and Wednesday

Our senior professional staff are available to discuss your specific needs in a private session. Sex offender registry officers, prosecutors, AG staff, probation and parole officers walk away with ideas on how to streamline and energize their sex offender registry and community notification program. Participants can also arrange free training and demonstrations for their staff.

Hands-on Demonstration of Your Agency's Processes Automated with OffenderWatch

9AM - 4PM Pearl 5 Monday, Tuesday and Wednesday

After discussing your current statutes and processes, we will demonstrate how OffenderWatch can improve your agency's efficiency in registering offenders, conducting verifications, performing sweeps, responding to abductions, managing homeless offenders, and locating absconders.

Workshops for Law Enforcement

Comprehensive Offender Management: Exceeding the Letter and the Spirit of the Law

8:30 - 9:45AM Lone Star A4 Tuesday and Wednesday

Sex offender registry officers, prosecutors, probation and parole staff will learn how to leverage OffenderWatch® to establish best practices for sex offender management. We will discuss current policies for data collection, supervision, and public notification and demonstration techniques for improving your agency's efficiency in registering offenders, conducting verifications, performing sweeps, and managing homeless offenders.

Conducting Effective Sex Offender Investigations: Policies, Protocols and Procedures

10:15-11:30AM Lone Star A4 Tuesday and Wednesday

We will present case studies to illustrate the importance of collecting more data than the minimum statutory requirement and how that prepares your agency for successful investigations. You will see a demonstration of the advanced search and mapping capabilities of OffenderWatch® that can be used by a Child Abduction Response Team (CART) in identifying potential suspects by geography or MO and in a national search for an absconded sex offender. This session is great for criminal investigators, offender registry officers, prosecutors, probation and parole staff.

Utilizing OffenderWatch® to find Absconded Offenders

1:45 - 3:00 PM Lone Star A4 Tuesday and Wednesday

You will learn to use the advanced search and mapping capabilities of OffenderWatch® in a national search for an absconded sex offender and how use the built-in US Marshal Alert feature to engage the US Marshal's Sex Offender Task force. US Marshals will present case studies that illustrate how they offer free assistance to law enforcement in locating absconded offenders and conducting compliance operations and sweeps.

To arrange a live demonstration for your agency after the conference, please email info@watchsystems.com

CONTINUING EDUCATION

The Crimes Against Children Conference is an approved provider of Continuing Education credit on behalf of the organizations listed below. Please read the information regarding your respective field carefully to assure you receive credit.

Please visit the Continuing Education booth in the registration area to sign in EVERY DAY. If you do not sign in every day, we cannot confirm that you attended the conference, and credit may not be granted.

The Association for Addiction Professionals (NAADAC)

Anyone seeking NAADAC credit must sign in every day. Credential number required.

National Association of Social Workers (NASW)

Anyone seeking NASW credit must sign in every day.

National Board for Certified Counselors (NBCC)

DCAC has been approved by NBCC as an Approved Continuing Education Provider, ACEP No. 6602. Programs that do not qualify for NBCC credit are clearly identified. DCAC is solely responsible for all aspects of the program. Anyone seeking NBCC credit must sign in every day. Visit the Continuing Education desk for a list of approved courses of study.

State Bar of Texas (MCLE)

Anyone seeking MCLE credit must sign in every day. Bar number required. Those seeking ethics credit may visit the Continuing Education desk for a list of approved ethics courses.

Texas Center for the Judiciary

Anyone seeking CJE or Family Violence credit may visit the Continuing Education desk or the Special Registration area for CJE/Ethics and Family Violence forms and lists of approved courses of study.

Texas State Board of Examiners of Marriage and Family Therapists (LMFT)

Anyone seeking LMFT credit must sign in every day. License number required.

Texas State Board of Examiners of Professional Counselors (LPC)

Anyone seeking LPC credit must sign in every day. License number required.

Texas State Board of Social Work Examiners (LMSW)

Anyone seeking LMSW credit must sign in every day. License number required.

Texas Commission on Law Enforcement (TCOLE)*

TCOLE credit will be awarded to Texas Peace Officers through the Dallas Police Department. Anyone seeking TCOLE credit must sign in every day. TCOLE issued personal identification number (PID) required. If you do not know your PID number, contact TCOLE at 512-936-7700.

*Out of state peace officers should submit their conference certificate to their respective agencies for consideration of credit in their jurisdiction. You are not required to sign in daily.

CERTIFICATE OF COMPLETION

You will receive an e-mail from us immediately post-conference with a link to a survey. Once you complete the survey, you will receive a second email containing the link leading to your certificate. You may print your certificate from that page.

No certificates will be handed out on-site.

HOW TO RECEIVE CREDIT

Your certificate will include the provider numbers for this Conference.

All attendees (except Texas Peace Officers seeking TCOLE hours) are responsible for turning in their hours to their respective fields.

CASE STUDIES & WORKSHOPS

Each session is listed by time block.

10:15-11:30 AM

Child Advocacy Centers and Sex Trafficking of Children: What are CACs Doing? What Should CACs Be Doing?

Chris Newlin

In early 2015, the National Children's Advocacy Center conducted a survey of the ~850 Children's Advocacy Centers (CACs) in the U.S. to learn more about the presence of cases involving Domestic Minor Sex Trafficking and/or Commercial Sexual Exploitation of Children, and procedures being utilized to respond to these cases. The data collected in the survey will be presented in this workshop. There will be an open discussion of current practices, what is working, what is not working, and what training and resources are needed in the field to support CACs challenged by this growing issue. SEMINAR

Child Pornography and its Relationship to Child Exploitation

Michael Sullivan

This lecture will look at the relationship between child pornography and child sexual exploitation. It will explore the need to investigate cases that may appear to be "only" image cases but in reality may lead to multiple hands on offenses and multiple victims.

DALLAS A3

ChildFirst® EX: An Expanded Forensic Interview Protocol

Rita Farrell, Amy Russell

Based on the nationally-recognized ChildFirst® Forensic Interview Protocol, this session provides an overview of a defensible process for conducting interviews with children who may not succeed in a standard, single interview due to trauma, developmental, special needs or other complicating issues, including polyvictimization. This workshop will discuss the expanded interview process and research supporting multiple, non-duplicative interviews with child victims and witnesses.

DALLAS D2

Clinical Approaches to Working with Child Sex Trafficking Victims

Stacey Brittain, Danielle Madera

This presentation will provide a comprehensive understanding of the dynamics surrounding child sex trafficking as well as the clinical approaches necessary to engage these children and their families in therapeutic services. The psychological impact of this complex trauma influences all areas of functioning and creates unique challenges.

The presenters will be sharing specific treatment plans and lessons learned through the provision of group and individual therapy services at The Harris County Children's Assessment Center. Additionally, a comprehensive review of the case study that prompted the creation of Project LIBERTY (Lifestyle Intervention Based on Engagement and Rehabilitation for Trafficked Youth) will be discussed.

Repeats Tuesday from 10:15-11:30am.

DALLAS A2

Computer Forensics for Prosecutors

Justin Fitzsimmons

Digital evidence is pervasive in today's criminal trials, making it imperative that prosecutors understand the intricacies of computer forensics in order to try and win cases. This presentation covers the fundamentals of computer forensics and discusses the many forensic artifacts that are useful to prove a variety of criminal charges.

DALLAS D1

Conducting Practical Research at a Children's Advocacy Center

Jeff Wherry

Evidence-based treatment and evidence-based assessments are "all the rage." However, "research" is a word that intimidates many committed clinicians and administrators. Yet, children's advocacy centers (CAC) have much to offer and much to gain from participating in research. The Dallas Children's Advocacy Center has launched a Research Institute with wide support. Nonetheless. there are challenges for any agency in implementing collaborative research projects which have the potential to benefit clients and families immediately while supporting program evaluation needs and advancing our understanding of the models, theories, and practices used in CACs. In this workshop, the process of establishing research protocols, securing team buy-in, and ways for CACs to collaborate will be discussed.

CITY VIEW 6

Dropbox and Law Enforcement

Sean Li, Chengos Lim

This presentation is geared towards law enforcement officials seeking information from Dropbox in connection with child exploitation investigations. The presenters will cover Dropbox's Government Data Requests Principles, sending legal process to Dropbox, Dropbox's notice and retention policy, what to do in the event of exigent requests, and the user information that is available in response to government data requests.

AUSTIN 1

(The) FBI's New Child Abduction Response Plan

William Donaldson, Mark Hilts

This presentation will discuss the FBI's new Child Abduction Response Plan and how this investigative guide can assist law enforcement agencies faced with a missing/abducted child case. Presenters will highlight aspects of the plan and investigative techniques and show, through the use of lecture and case examples, the benefits of using the Child Abduction Response Plan.

Repeats Monday from 1:45-3:00pm. DALLAS D3

(The) Future Is Not Near, It's Here

Jim Cole, Johann Hofmann

This workshop will discuss how technology can help our visual capabilities to separate pertinent from non-pertinent material in investigations, to find those crucial clues that are usually like looking for a needle in a haystack. Attendees will learn how the latest development of NetClean Analyze DI can actively help investigators find connections between images and build visual maps, instead of getting bogged down by millions of digital files. The result is superior investigations in terms of speed, reduced manual workload, possibilities for cross-agency cooperation and, ultimately, more rescued victims and perpetrators behind bars. We also promise a sneak preview of some really exciting new features coming soon.

AUSTIN 3

GoDaddy.com: Helping Law Enforcement Leverage Technology More Effectively

Ben Butler

One of the most common points of confusion for investigators of online child abuse cases is figuring out who has what information, and how to best go about getting it. This workshop will discuss emerging technologies and attempt to clarify the confusion. We will discuss the information available to law enforcement through Registrars and Hosting Providers. We will also discuss recent trends and tactics in investigating commercial child pornography sites, and the role Go Daddy takes to help you in your investigations.

AUSTIN 2

Google Combating Child Exploitation

Dona Bellow, Cathy McGoff

This workshop will provide an overview of Google's efforts to combat child exploitation including content reporting, product safety, legal process, and data disclosure policies.

DALLAS A1

Hi-Tech Grooming, Hi-Tech World

Roger Canaff

Understanding the technology that is used to gain access to children and teens as well as the technology used by children and teens themselves is critical to protection, investigation, prosecution, and even treatment. Each day new social media applications (apps) are created, but most of them use similar technology. Whether they are used to gain access to children, to lure teens, for cyberbullying, or witness intimidation, all child abuse professionals are responsible for staying current in the technology so we can best perform our duties.

REMINGTON

*Kidnapping and Exploitation in an Amish Community

Frederick Bragg, Gus Burns, Alix Skelton

This case study discusses the investigation into the abduction of two Amish sisters from a roadside produce stand in upstate New York by a local couple intending to keep them hidden in their residence indefinitely. The presenters will discuss the investigative steps taken while searching for the victims, identifying the subjects once the victims were released, as well as the subsequent searches leading to the identification of an additional four children who had been drugged and sexually abused by the couple, and the recovery of child pornography depicting all six children. The presenters will also address the challenges faced during the investigation including the remoteness of the area, cultural issues with Amish victims, and computer encryption. Finally, the presenters will discuss the subjects' claim of being in a master/slave relationship and the impact on the prosecution strategy.

Repeats Thursday from 8:30-9:45am.

DALLAS C

Law Enforcement Response to Sexting Issues and Investigations

Richard Wistocki

This workshop will examine the recent trends among teens involving "Sexting." This activity has lifelong consequences for its participants. Law enforcement often struggles on how to deal with minors who are manufacturing their own child pornography and distributing it. This presentation will examine diversion programs to deal with this issue. This discussion will examine the Why? How? When? Where? and What? As a group we will form a safety plan for law enforcement to deal effectively with teens who are committing these crimes and give parents the tools to successfully monitor their children. The goal in this class is to educate law enforcement on how to effectively protect and

educate minors who find themselves involved in these crimes.

Repeats Thursday from 10:15-11:30am. LONE STAR C2

*Randy & Me: A Prosecutor's Story of His Childhood Sexual Abuse

Kevin Mulcahy

This presentation will recount Kevin's own story of sexual exploitation at the hands of his soccer coach, Randy. It will not be merely a retelling of the past. Instead, the presentation will address lessons learned from his case by combining Kevin's experience both as a victim and a long-time prosecutor of child exploitation cases. Knowing what he knows now, Kevin believes there are lessons to be learned from his story for the investigator (Kevin's was great), the prosecutor (Kevin's was terrible), and the forensic interviewer (Kevin did not have one). Beyond these useful lessons, the presentation will provide plenty of time for questions from attendees. Given the nature of our work, we don't often get to ask questions of our child victims. This presentation will provide that opportunity.

Repeats Tuesday from 12:00-1:15pm and Thursday from 8:30-9:45am.

DALLAS B

Tribal Issues Related to Missing and Exploited Children

Ed Suk, Geri Wisner

This workshop will focus on the unique challenges faced by law enforcement, social services, and multi-disciplinary team professionals in working with missing and sexually exploited children and families in Indian country. The presenters will outline historical issues of abuse and exploitation, and explore a variety of cultural considerations that together enhance and complicate the investigation and prosecution of child abuse crimes in tribal communities. Participants will be provided with resource materials to guide and assist allied professionals working in and with Indian country.

Using Social Media to Promote Your Agency

Jana Parker

Do you know how to effectively use social media? This session will cover some of the basic strategies and best practices to get the most from your social media activity. Attendees will receive hands-on experience with digital forms of engagement and will learn how to use a wide range of social media tools. This workshop will discuss the various social media outlets, specifically Facebook, Twitter, and Instagram, social sharing of content, videos, and images, and how they interact together. In this digital age, social media has become a part of our everyday lives; this workshop will reveal top trends in the social media world and erase any confusion regarding posting relevant content and creating stimulating conversations in your field.

Repeats Monday from 1:45-3:00pm.

CITY VIEW 8

What We See is Only the Tip of the Iceberg: The Here and Now of Online Abusive Images

Sharon Cooper

This presentation will explore the increasing realization of the victim impact of online abusive images (previously referred to as child pornography). Previously, it was thought that victims could be rescued and have adequate mental health support, it is now clear that the exponentially increasing number of images have left the overwhelming majority of victims with a dark secret that no one knows and haunts children for the foreseeable future. Images are used today in multiple types of cybercrimes and the silencing nature of this form of abuse clearly has resulted in a rational paranoia for children and their families. Investigations and prosecutions need to be aware of the additional unspoken aspects of this form of abuse when working in "simple sexual abuse" all the way to sex trafficking.

LONE STAR B

12:00-1:15 PM

Acquaintance Molestation and Youth-Serving Organizations

Ken Lanning

Acquaintance molesters often pursue careers or volunteer opportunities with organizations that give them access to children. Youth-serving organizations must recognize the diversity of sexual activity, the phenomena of "nice guy" offenders and compliant child victims, and the grooming/seduction process. The four most

important protection practices for organizations are screening, management and supervision, response to suspicions, allegations, and complaints, and prevention and awareness programs. This workshop will recommend general approaches to these protection practices and explain why many organizations resist implementing available preventive measures.

Repeats Tuesday from 8:30-9:45am.

LONE STAR A1

After the First 48: From Indictment to Trial

Marci McClellan Curry, Sherre Thomas

In this presentation attendees will gain a better understanding of what it takes to prepare a sexual abuse case beginning with indictment and ending in trial with a verdict of guilty. The presenters will also explore common problems and challenges encountered in child sex abuse prosecutions as well as discuss strategies for overcoming them.

Repeats Wednesday from 1:45-3:00pm. DALLAS A3

*Benjamin Cuadrado: The Evil Next Door

Terri Botterbusch, James Kilpatrick, Jennifer Peresie

The Cuadrado investigation has been described as one of the most disturbing child exploitation cases in history. A victim based approach to investigating child exploitation material progressed to a John Doe warrant for an individual. later identified as Benjamin Cuadrado, who was a contact offender who sexually assaulted and produced child abuse material of infants and toddlers. Cuadrado utilized e-mail and Kik Messenger to trade, distribute, and store sexually explicit material depicting minors. Utilizing a major case strategy, hundreds of individuals were identified, targeted, and eventually prosecuted for trading with Cuadrado, some of whom were also hands-on offenders and producers. This case study will discuss the victim based approach to child exploitation investigations, the use of John Doe warrants, the utilization of Kik Messenger, and the major case strategy in investigating newly produced child exploitation material.

Repeats Wednesday from 1:45-3:00pm. LONE STAR A4

*(The) BluePillow Child Pornography Investigation

Kevin Papineau, Brie W., Nicole W.

In this presentation, the lead investigator, the survivor, and her mother will discuss the successful search for a young girl seen in a widely traded child pornography series, "The BluePillow." Originally reported by the Danish

National Police, NCMEC linked the photo series to Elk Grove, California through a trash can in the background of a photo. A nearly month-long investigation, based on details in the photos and videos in the series, led to the rescue of the victim and the arrest and conviction of her abuser/child pornographer. The survivor has since emerged as an advocate of efforts against child sexual exploitation and trafficking and her mother is now a member of NCMEC's Team Hope. The presentation will cover the methods. both successful and not, used in the search for the victim, the technical assistance provided by NCMEC, the post-rescue investigation and prosecution and the victim impact/advocacy issues involved.

Repeats Wednesday from 8:30-9:45am.

DALLAS C

Combating Sexual Exploitation One Stop at a Time

Michael Bourke, Derek Prestridge

How can you more effectively identify victims of child exploitation and trafficking during a seven-minute traffic stop? Are there indicators you might be missing? The presenters from the Texas Rangers and the U.S. Marshals Service will discuss an innovative program designed to combat all types of child victimization during roadside encounters. They will share techniques that can be coupled with routine police practices to significantly increase the likelihood of identifying victimized children and their offenders. The workshop will include examples of cases where officers used these interdiction techniques to rescue children.

Repeats Tuesday from 3:30-4:45pm. AUSTIN 1

Corroborating Child Sexual Assault Disclosures

Mary Langer, Nancy Oglesby

Child sexual assault cases should never be prosecuted with only, "he said, she said," evidence. It is imperative that a child's statement of abuse be corroborated in as many areas as possible. This workshop will discuss the multiple pieces of evidence that can be obtained during a sexual assault investigation. Attendees will learn how to make a "corroboration checklist," and to dissect the child's statement for areas to gather evidence. This presentation will enable investigators, prosecutors, and associated child abuse professionals to surround a child's statement with layers of credible, corroborating evidence, and witness testimony to present the strongest possible case at trial.

Repeats Wednesday from 8:30-9:45am. DALLAS A1

CPS Forum

Kathryn Sibley Horton

Is an ethical dilemma keeping you up at night? Does working with abused and neglected kids affect your own parenting? Has a high-profile case or a child fatality caused you to think about seeking employment at a big-box store? It's a hard job and we all know it! Let's talk about the problems and celebrate the solutions. Join fellow CPS workers from around the country in a lively session about these and other topics you may choose to discuss.

DALLAS D3

Deception Detection

Jim Tanner

This session will cover the basics of Discourse Analysis, a lexical and syntactical approach to analyzing statements. Using clear examples, Dr. Tanner will explain how a respondent's shifts in words and grammar can point interviewers to "hot spots" in a statement that need to be probed. You will never listen to a conversation or interview the same way again if you attend this session.

Repeats Tuesday from 10:15-11:30am. LONE STAR A2

Forensic Interviewer Forum

Jesse Gonzalez, Carrie Paschall

This forum is open to all forensic interviewers attending the conference and will provide an excellent opportunity to meet your colleagues in the field and share experiences. In addition to networking, there will be a group discussion centered on some focus topics facilitated by the presenters. The focus topics will include current trends in best practice standards for interviewing children, interviewing children where there are multiple forms of abuse being investigated, using evidence in the interview room, and interviewing children in unusual circumstances.

DALLAS D2

*Jacky Scott Garrett: Two Children Too Many

Crystal Levonius, Daniel Lewis

Church members encouraged a struggling mother to give two of her children, a twin boy and girl, up for adoption. Jacky Scott Garrett and his wife seemed like they could provide a better home for Logan and his sister. However, shortly after the adoption, Logan died and Jacky Garrett explained he may have knocked Logan out. The medical examiner ruled Logan's death a homicide by blunt force trauma. Previously, others noticed the twins had multiple injuries including black eyes, genital and buttocks bruising, and head wounds. There was always an excuse for the injuries so no one called Child Protective Services. The presenters will address

issues related to trying a case where the victim has a previous medical condition in the same location as the trauma. They will also address the difficulties that arise when the lead detective is subject to an internal investigation because of a history of multiple affairs with witnesses and victims of crime.

Repeats Tuesday from 10:15-11:30am. DALLAS B

Law Enforcement Forum

Robert Farley, Brian Killacky

Meet your fellow law enforcement officers from around the country and participate in a forum to discuss the topic of Critical Issues in Conducting Multi-Disciplinary Team (MDT) Child Abuse Investigations. Among the items to be discussed are: the proper role of the MDT, Investigative problems and jurisdictional issues encountered, and how MDTs operate where there is no children's advocacy center. This high-energy group led discussion will provide you with an opportunity to both learn from others and share your experiences with them.

LONE STAR C4

*Lucas Michael Chansler: A Case Study in Online Sextortion

Lawrence Meyer, Ashley Reynolds

This presentation will detail the investigation into one of the largest sextortion cases in the United States and the successful prosecution of Lucas Michael Chansler. The presentation will describe the techniques Chansler used to conceal his online location and identity and then detail the investigation by analysts at NCMEC and the Jacksonville Field Office of the FBI, which led to Chansler's identity, arrest and subsequent prosecution. The presentation will then outline the search to identify, locate, and interview his nearly 350 victims, a search which still continues. To date, more than 100 of his victims have been located across the U.S., Canada, and the UK. One of these victims is Ashley Reynolds, whose mother first reported the extortion of her daughter to NCMEC in 2009, and initiated the investigation. Ashley has since become a victim advocate and will describe her experiences as a victim of sextortion.

Repeats Wednesday from 10:15-11:30am. LONE STAR B

*No More Happy Endings: The Demise of MyRedbook

Marty Parker, Jason Skrdlant

This case study will explore the ever-growing trend of Internet prostitution sites, and take the audience through the 4-year investigation into MyRedbook.com, one of the biggest and most well-known "escort" sites on the West Coast. MyRedbook.com contained hundreds of

thousands of ads for prostitution, and a robust online community dedicated to the "hobby" of procuring prostitutes. Hundreds of juveniles were known to have been posted on this site, often with extremely graphic and pornographic images, and investigators regularly expressed their frustration with the lack of any type of cooperation from the site. The presenters will discuss investigative methods used, hurdles to the investigation, and prosecution strategies. The audience will also hear about the day the plug was pulled on MyRedbook.com, and the final outcome of the case.

Repeats Wednesday from 3:30-4:45pm. LONE STAR A3

Opening Statements and Closing Arguments in Child Abuse Cases

Victor Vieth

This workshop will discuss the art of developing effective themes and theories to present to jurors in cases of child abuse. Particular emphasis will be placed on cases in which the outcome largely relies on the assessment of the child's credibility versus the credibility of the accused. AUSTIN 2

Prosecutor Forum

Eren Price, Carmen White

Bring your questions and prepare to meet your fellow prosecutors from around the country in an informative question and answer session. This class is a group-facilitated discussion designed to provide you with opinions, options and potential solutions to your most problematic issues. Learning from others in the field and utilizing the experience of fellow prosecutors can often bring about a new perspective.

DALLAS D1

Sex Trafficking of Juveniles: A Guide for Investigators

Terri Patterson, Daniel Steele

This workshop is designed to provide practical guidance to professionals who are responsible for the identification, investigation, and prosecution of juvenile sex trafficking cases. The presenters will discuss recommended steps in the investigation and behavioral dynamics that may impact the successful resolution of the case. Discussion, lecture, and the illustrated use of case examples will be incorporated to deliver information. Each workshop participant will receive a copy of Sex Trafficking of Juveniles: An Investigative Guide, written by a working group comprised of local, state, and federal law enforcement officers.

Therapy and Family Advocacy Forum

Kristen Howell, Jeffrey Wherry

Ever feel like you are alone in the effort to eliminate abuse and violence? Or are you worried that your passion is being quelled by administrative demands and heavy volume? You aren't in this alone! Meet your fellow therapists and family advocates from around the country and bring your questions to an informative question and answer session. A group-facilitated discussion will help you consider programmatic ideas, innovations and challenges; identify and discuss evidence-based treatments; and share best practices, concerns, and trends with your fellow colleagues.

DALLAS A2

1:45-3:00 PM

Advanced Cold Case and Long Term Missing Children Cases

Brian Killacky

This workshop is designed for law enforcement officers who investigate long term missing, unidentified remains and unresolved child homicides. This instruction is applicable to closed, suspended, or forgotten cases. Attendees will learn investigative strategies and forensic application regarding the potential resolution of cases that are closed, suspended, or forgotten. Repeats Tuesday from 12:00-1:15pm.

LONE STAR C2

*Are Collectors of Child Pornography the Child Molesters of the Future? (Part 1 of 2)

Joe Sullivan

Some argue that targeting, investigating, and prosecuting collectors of child pornography is an important mission, as these individuals desire sexual contact with children. By viewing sexual images of children they are reinforcing their beliefs and breaking down the barriers to contact abuse. This case study will argue that there is an even more important reason why we should be concerned about those who seek out, view, and collect child pornography. Using video of a clinical interview of a child pornography collector the presenter will explore whether such offenders pose a risk of direct harm to children.

Repeats Wednesday from 8:30-9:45am.

Authenticating Digital Evidence

Justin Fitzsimmons

This presentation covers the various types of

evidence that investigators can gather from cyberspace and cellular phone providers. The audience is shown case law examples for authenticating emails, chats, and other technological evidence. The presentation also gives examples of what types of witnesses are needed to lay the proper foundation for the admission of digital evidence.

DALLAS D1

Blocks and Problems in Forensic Interviewing

Julie Stauffer

There are often factors that may influence a child's willingness and ability to tell of their experiences in a forensic interview. Such blocks or barriers may be the result of circumstances prior to the interview, or may be those which arise during the interview itself. This session is designed to enable forensic interviewers, law enforcement investigators, child protection workers, and prosecuting attorneys to effectively respond to the needs of children by recognizing blocks for children during the forensic interview and employing necessary block removal techniques.

Repeats Wednesday from 8:30-9:45am. DALLAS D2

Build Your Case with the Help of a Forensic Nurse

Sheilah Priori

The forensic nurse examiner can play a crucial role in navigating the medical system by providing accurate statements, photo-documentation, expert testimony, and medical records necessary in the investigation of crimes against children. This workshop will utilize case studies to demonstrate the importance of the medical forensic exam in the investigation of sexual and physical abuse.

REMINGTON

*(The) Diary of a Predator

Nancy Hebert, Cindy Pulcher, Jimmy Wiggins

This case study reveals the abuse inflicted by a juvenile predator whose acts were so horrific he was certified to be tried as an adult. The investigation involved multi-jurisdictional agencies that worked together to take multiple sexual predators off of the streets throughout the U.S. and Canada. The presenters will detail the sophisticated techniques the offender used to try and keep child pornographic images from being detected on the Internet and how law enforcement discovered these images. This workshop will explore how family dynamics were a hurdle in pursuing charges and how professionals from ICAC and the Crimes Against Children Division came together to protect a young child who did not outcry to the sexual abuse. The evidence in this case involves disturbing images and a diary of the fantasies of this predator.

Repeats Wednesday from 12:00-1:15pm. DALLAS C

Effective Engagement with Male Survivors of Sexual Abuse (Part 1 of 2)

Christopher Anderson

Although boys and men are victims of sexual violence in staggering numbers, male survivors often slip through the cracks. The latest National Intimate Partner and Sexual Violence Survey reports that 1 in 4 males will experience some form of sexual victimization in their lifetimes. Male victims are often overlooked because of social and cultural pressures that keep them silent. On average, it takes a male survivor 20 years to disclose, and disclosures are rarely to law enforcement. This creates major obstacles for successful capture and prosecution of offenders. This presentation gives an overview of the unique challenges and harmful myths that discourage boys and men from coming forward, and presents best practices for improving the chances of successful interactions with male victims.

DALLAS A1

(The) FBI's New Child Abduction Response Plan

William Donaldson, Mark Hilts LONE STAR A3, See pg. 17 for description

(The) First Responder Interview

Rita Farrell

This workshop will explain the differences between a first responder's interview of an abused child and one conducted by a forensic interviewer. The presenter will offer concrete recommendations for forensic interviewers and investigators who may have to conduct a "minimal facts" or preliminary interview before a forensic interview.

DALLAS A3

Fourth Amendment in a Digital Age: Square Pegs, Round Holes

Roger Canaff

The continued advancement in technology along with the vast amount of information stored on hand held devices has created novel legal issues being addressed with an old 4th Amendment framework. The lag in a workable legal response is causing disparate reactions by the judiciary. This workshop will address emerging and trending legal issues from search incident to arrest, to obtaining search warrants, to conducting digital examinations, to complying with the ECPA, and will discuss workable solutions.

AUSTIN 2

Gentle Child Murder: Suffocation, Strangulation, and Drowning

Jim Holler

Gentle homicides encompass smothering, strangulation, and drowning and are the second most common form of child murder and the most difficult cases for detectives to investigate. In most cases there is no evidence of any type of trauma and there are no tests at autopsy that could help determine this type of death. Many cases are ultimately listed as Sudden Infant Death Syndrome (SIDS). These cases are most likely discovered through admission from caregivers or witness accounts.

LONE STAR C4

Human Trafficking and Beyond (Part 1 of 2)

Tanisha Knighton

This workshop will focus on the different types of missing persons and the overlap between missing persons cases, unidentified remains, and human trafficking cases. Participants will explore the social stigma associated with trafficking and the impact social media plays and will analyze the profiles and vulnerability factors of victims and review suggestions on how to identify and interact with them. The workshop will then explore recruitment and grooming tactics used by traffickers of both sexual trafficking and labor trafficking, and terminology and rules associated with pimping subcultures.

Participants are encouraged to bring their smartphones and tablets to this workshop so they may participate in the workshop activities. DALLAS D3

Interrogation: A 360-Degree Perspective (Part 1 of 2)

Kevin Navarro, John Palmer

This workshop will share the results of a joint project by the Federal Law Enforcement Training Center and the Dallas Police Department. Videotaped interrogations of homicide suspects conducted by Dallas homicide detectives were analyzed, along with videotaped interviews of the detectives and now-incarcerated suspects. Those interviews explored the philosophy and methodology of the detectives as well as the opinions of the suspects. This presentation will share what was learned. Key segments of video from the interrogation will be presented combined with videotaped perspective on these aspects of the interrogation from the investigator and the now-incarcerated suspect, providing a 360-degree look at critical steps and principles associated with a criminal interrogation.

Repeats Wednesday from 1:45-3:00pm.

LONE STAR C1

*Israel Berrios-Berrios: Priest, Godfather, and Predator (Part 1 of 2)

Marshal Morgan, Edgardo Motta, Alek Pacheco

This case study will detail the investigation and prosecution of a Catholic priest who groomed and eventually sexually assaulted an altar boy. This presentation will illustrate how an investigation that was initiated by the local media led to uncovering the acts committed by the priest. The case study will focus on the grooming process in which the priest paid for two cruise vacations to the Bahamas in order to abuse his victim. Furthermore, it will detail how the Catholic Church handled the investigation. the community reaction upon his arrest and the criminal prosecution. The presenters will also discuss how an effective multijurisdictional team led to the rescue of one victim and to the successfully prosecution of the priest at both state and federal jurisdictions. During this presentation the victim will also discuss his grooming, victimization, and healing process. Repeats Wednesday from 1:45-3:00pm.

LONE STAR A4

It's Never Really Over: Post-Conviction Issues in Child-Abuse Cases

Laura Coats, Christine Womble

The case does not end when judgment is entered. Months, years, and even decades later, defendants are challenging their convictions alleging countless violations of their constitutional rights. While some claims have merit, most do not. This workshop will present an overview of the most commonly successful post-conviction claims (actual innocence, prosecutorial misconduct, ineffective assistance of counsel) and discuss issues that law enforcement and prosecutors should be aware of as they prepare their cases for trial.

CITY VIEW 6

*Jonathan Richardson: The Cat of Nine Tails Torture (Part 1 of 2)

Sharon Cooper, Paul Jackson

This case presentation describes one of the most violent cases of child torture in North Carolina. An offender, who carefully groomed a mother to leave her child with him during a short military training, successfully imprisoned and deliberately physically, psychologically and sexually tortured her over the next 10 days. His methods were many, but his use of a copper cat of nine tails whip left medical experts initially stymied as to the cause of the unusual pattern injuries. The investigation and prosecution were meticulously executed with more than 800 exhibits at trial, with a capital punishment outcome.

Repeats Tuesday from 8:30-9:45am. LONE STAR A2

Leave Your Ego at the Door: Refocusing Your MDT

Irish Burch

How do you get different agencies, disciplines and personalities to work together in the protection of child abuse victims? By leaving all egos at the door! In this workshop, attendees will discuss common issues facing many MDTs today and offer practical steps for building a more effective team and stronger cases. The attendees will learn how a greater understanding of roles and responsibilities of each discipline is key to building trust and respect among team members. The presentation will cover team building, training and orientation, better communication, and handling conflict.

SEMINAR

Not One More Child; Not in Our Community (Part 1 of 2)

Sylvia Bruni, Stephen Daley, Pete Garza

Join us for an empowering community initiative that is sending a message to all child predators, "Not Here, Not Now, and No More." In this workshop we will share a revolutionary community approach empowering children with the opportunity to recognize, avoid, resist, and escape violence or harm. Proactive, preventive, therapeutic and resiliency building directly in the hands and through the eyes of children. United together, the District Attorney, Child Advocacy Center, school districts, and community not for profits are making a difference, and you can too! Join us for this game changer and opportunity. DALLAS A2

Physical Child Abuse Injury Reconstruction Techniques (Part 1 of 2)

Robert Farley

This workshop will focus on non-accidental injuries inflicted on children. The presenter will emphasize the specific techniques that may be used by the investigator in the assessment, investigation, and reconstruction of cases involving soft tissue injuries such as bruises, lacerations, and burns. The discussion will also address the circumstances and evaluation of deprived and neglected children and offer case illustrations that encourage hands on participation by the student.

Repeats Tuesday from 8:30-9:45am. LONE STAR C3

1:45-3:00 PM CONT'D

Predicting Child Maltreatment with Risk Terrain Modeling

Michael Bachman, Dyann Daley

This workshop discusses the application of Risk Terrain Modeling (RTM) to investigate the spatial influence of a multitude of known social, environmental, and behavioral risk factors related to child maltreatment to predict discrete geographic areas of future incidents with significantly higher accuracy than common heat map projections. To our knowledge, RTM methodology has never been applied to studies of child maltreatment. Attendees will learn innovative methods to explore the issues surrounding child maltreatment and narrow the geographic target for primary prevention.

CITY VIEW 7

*(The) Prosecution of Don Wilburn Collins: Justice Delayed, But Not Denied (Part 1 of 2)

Kelly Blackburn, Rob Freyer

On his eighth birthday, Robert Middleton was doused with gasoline and set on fire by 13 yearold Don Collins. Middleton received third degree burns to 99.9% of his body, but he survived the attack. Nearly eight years later he died of skin cancer, which doctors determined was caused by his burn injuries and the hundreds of skin grafts he received over the years. His death was ruled a homicide. At the age of 27, Collins was certified to stand trial as an adult for the 1998 burning of Middleton. On February 11, 2015, almost 17 years after Robert Middleton was set on fire, a jury convicted Collins of Capital Murder. This case study will discuss the many complex aspects of this successful cold case investigation and prosecution. The presenters will detail the 1998 criminal investigation, the decision to dismiss criminal charges against Collins in 1999, the 2011 cold case investigation that led to an indictment for Capital Murder, the legal hurdles dealt with regarding the video deposition given by Robert Middleton 17 days before his death, legal issues regarding Middleton's cause of death, witness issues, and the presentation of the case at trial.

Repeats Wednesday from 1:45-3:00pm. LONE STAR B

Sexually Violent Predators: Texas and Beyond

Erin Faseler

Approximately 20 states, the District of Columbia and the federal government have enacted Sexually Violent Predator laws. This workshop will discuss the development of the civil commitment process, as well as a brief synopsis of sexually

violent predator laws across the country. This presentation will further discuss the procedures for civil commitment, building a case for civil commitment, legal challenges currently facing sexually violent predator laws, and issues that commonly arise when trying these cases.

Repeats Thursday from 8:30-9:45am. AUSTIN 3

Twitter: Guidelines for Law Enforcement

Twitter Staff

In this workshop the presenters will discuss how Twitter works in tandem with technology companies and law enforcement on ways to eliminate child sexual exploitation online. They will provide an overview of the service and give context around what makes Twitter unique. Additionally, they will share the latest tools de-signed to help users stay safe and in control of their Twitter experience, as well as provide detailed guidelines for law enforcement seeking information about Twitter accounts.

Understanding Grooming Behaviors of Child Molesters and the Resulting "Counter-Intuitive" Behaviors of their Victims

Darrel Turner

This presentation explores behaviors of offenders, such as grooming of families, self-grooming, and grooming of victims that are engaged in to prevent disclosure and to gain the trust and sometimes even "love" of their victims. Also, subsequent behaviors of these groomed victims may appear counter to what would be expected from a victim of sexual abuse. This presentation examines this through personal experience, personal research studies, other available research, and uses video of interviews of sex offenders and victims. The presentation will also address how these variables impact juries' decisions in these types of cases.

Repeats Thursday from 10:15-11:30am. LONE STAR A1

Repeats Wednesday from 10:15-11:30am. DALLAS B, See pg. 20 for description.

Building a Community Education Program for Your CAC

Dianna Smoot, Autumn Williams

As part of a strategic planning process, the Dallas Children's Advocacy Center embarked on a significant community education program several years ago. Come and hear about strategies implemented to raise the profile of the agency and to become the "go to" for child abuse issues within Dallas County. Participants will be given ideas, tools and resources to take back to their communities, including creative ideas on what can be implemented on a limited budget. Think you don't have time to educate those in your community? You are leaving dollars on the table and uninformed community members in the jury box.

Repeats Thursday from 8:30-9:45am. SEMINAR

Child Fatality Review in Texas

Amy Bailey

Child fatality review teams in Texas meet to develop an understanding of the causes and incidences of child death in Texas. They identify procedures within agencies represented on the State Child Fatality Review Team (SCFRT) to reduce the number of preventable child deaths, promote public awareness and make recommendations to the governor and legislature for changes in law, policy, and practice to reduce the number of preventable child deaths. This workshop will describe current child fatality data trends in Texas, a review of recommendations and positions statements published by the SCFRT and local team activities to prevent child deaths.

Repeats Thursday from 10:15-11:30am. REMINGTON

Data is the Key to Prevention: NCMEC Attempted Abduction and KidSmartz Resources

Jessica Kenton, Russell Petty

The National Center for Missing & Exploited Children (NCMEC) is in an extremely unique position to use data to shape prevention education. NCMEC's Case Analysis Unit (CAU) collects data from law enforcement on attempted abductions that occur throughout the United States. The CAU provides free resources and analytical support to law enforcement investigating these crimes and is determined to proactively prevent these incidents through education and information sharing. KidSmartz, brought to you by Honeywell Hometown Solutions, furthers that mission with early interactive education for children, parents and educators. This presentation will review the resources provided by the CAU for law enforcement and share the free resources available through KidSmartz, a child safety program that educates families about preventing abduction and empowers kids in grades K-5 to practice safer behaviors.

CITY VIEW 7

Direct Examination of the Computer Forensic Examiner

Justin Fitzsimmons

This presentation focuses on the fundamentals of presenting a forensic examiner at trial. It highlights possible exhibits that prosecutors can use to help explain technology devices and computer forensics during the foundation portion of the examination. Attendees will be provided tips for effectively presenting computer forensic evidence at trial.

DALLAS D1

Effective Engagement with Male Survivors of Sexual Abuse (Part 2 of 2)

*Christopher Anderson*DALLAS A1, See pg. 20 for description.

Human Trafficking and Beyond (Part 2 of 2)

Tanisha Knighton DALLAS D3, See pg. 21 for description.

Interrogation: A 360-Degree Perspective (Part 2 of 2)

Interviewing At-Risk Youth

Julie Kenniston

As law enforcement officers conduct child pornography investigations, they often find that child pornography suspects have access to children. Sometimes these are biological children and sometimes they are other children known to the suspect. Based on the Butner study, we know that these children are at risk of sexual victimization. This presentation will offer suggestions for managing and conducting interviews of these at-risk youth.

Repeats Tuesday from 3:30-4:45pm. DALLAS D2

*Israel Berrios-Berrios: Priest, Godfather, and Predator (Part 2 of 2)

Marshal Morgan, Edgardo Motta, Alek Pacheco Repeats Wednesday from 3:30-4:45pm. LONE STAR A4, See pg. 21 for description.

Sharon Cooper, Paul Jackson Repeats Tuesday from 10:15-11:30am. LONE STAR A2, See pg. 21 for description.

*Joshua Karr: Preying on the Willing Victim

Lauren Hopkins, Crystal Levonius

Joshua Karr, a convicted sex offender, used social media to prey upon his sixteen yearold victim. Under his influence, she willingly went with Karr from her home near Houston to Collin County, north of Dallas, Through the cooperation of the National Center for Missing and Exploited Children, independent computer forensic analysis companies, multiple police agencies and the Collin County District Attorney's office, the victim ultimately was found in Karr's bedroom. Violent child pornography was also recovered on his cell phone. Karr was charged with multiple offenses and received two life sentences. Prosecutors will address the difficulties that arise in trial when a jury must reach a verdict without being aware of a defendant's criminal history or extraneous offenses. They will also address issues that arise when the victim appears to have become a willing participant in a predator's plan.

Repeats Wednesday from 10:15-11:30am.

Not One More Child; Not in Our Community (Part 2 of 2)

Kelly Blackburn, Rob Freyer Repeats Wednesday from 3:30-4:45pm. LONE STAR B, See pg. 22 for description.

Sexual Assault: Rape or Molestation

Ken Lanning

In a discussion of sexual assault, to what extent does the term "rape" apply to the sexual

victimization of children? Are there differences between rape and child molestation cases? Is a sexually victimized 14 year-old girl the victim of rape or molestation? Although these terms have legal definitions and elements, societal perceptions often control their use and subsequent criminal justice consequences. Perceptions about terms such as "rape" and "molestation" influence expectations and can have significant affect on media coverage, investigation, prosecution, and sentencing. In this workshop, contrasting dynamics and their significance will be clearly discussed and illustrated with the goal of improving clear and consistent definitions.

Repeats Tuesday from 12:00-1:15pm. LONE STAR A1

Sizing It Up: The Skinny on Failure to Thrive

Emily Lentz, Sandra Onyi

This talk will bring insight into the different categories for failure to thrive. It will walk attendees through proper ways to identify whether the condition is related to a medical or environmental cause. It will help to better facilitate understanding of what growth curves are appropriate according to the child's age and how to interpret the growth chart. It will emphasize the importance of a detailed diet history and use of a dietitian to properly manage a child's condition. Case examples will be utilized to illustrate each category of failure to thrive and management.

Tactical Polygraph

Michael Bourke

This presentation discusses the use of "tactical polygraphs," which are examinations that focus on identifying undetected sexual criminality committed by individuals who view child exploitation material. The technique has been remarkably successful in identifying victims of hands-on abuse. The presenter will summarize the findings from a study conducted by personnel from the Behavioral Analysis Unit of the U.S. Marshals Service, the Office of the U.S. Attorney, the U.S. Postal Inspection Service, the FBI, and the United States Secret Service. The presentation will include a discussion for why the technique works and suggested guidance on the application of the findings.

AUSTIN 2

Understanding and Investigating Burn Injuries

Jim Holler

Infants and toddlers are most likely to be burned intentionally. Child abuse burn victims are typically under the age of ten with the majority under the age of two. Immediate identification of intentional burn victims by those individuals first responding to the call for assistance is crucial because most of the victims are unable to

speak for themselves. This workshop will provide law enforcement officers and CPS workers with information that will assist them in distinguishing the difference between intentional and accidental burns. It will also assist the investigator by providing methods that can be used in recreating the incident to help prove or disprove the caregiver's statements as to how the burns were sustained.

Repeats Wednesday from 3:30-4:45pm. LONE STAR C2

*When the Bough Breaks

Matthew Cox, Sandy Moreland, Reynie Tinajero

One morning, Joniah Baker, a healthy 11 month-old baby, was left alone with his father Jonathan while the mother was at work. Later that day, when the mother returned home, she realized that her son was in trouble. Joniah was rushed to the hospital but he died two days later. Doctors found 26 marks on his tiny body, including burns, bite marks, broken ribs, and a subdural hemorrhage. There is no doubt that Joniah's final day was one of sheer torture. The presenters will detail both the criminal and the medical investigation that followed. The prosecution resulted in a conviction for Capital Murder for Joniah's father for killing his infant son. Repeats Wednesday from 12:00-1:15pm.

LONE STAR A3

When the Smoke Clears: Examining the Defendant and Defense Witnesses

Victor Vieth

This workshop details the art and science of preparing for and conducting a cross examination of a suspect or lay defense witness in cases of child maltreatment. Appropriate for prosecutors and child protection attorneys, other MDT members may also gain a deeper understanding of cross-examination practices. AUSTIN 3

Yahoo: Child Safety Investigations

Sean Zadiq

This presentation will provide a basic overview of Yahoo services that may be encountered by investigators conducting child exploitation investigations. These services include the Yahoo account in general, as well as Flickr, Yahoo Groups, Yahoo Answers, and Yahoo Messenger. This familiarization will focus upon how users utilize these services and how they have arisen in a few case studies from Yahoo's E-Crime Investigations Team. A short description of Yahoo's CyberTip reporting process and data disclosure policies will also be included.

Advanced Evidence Analysis For Internet Child Exploitation Cases with Magnet IEF

Rob Maddox

This hands-on lab session is for forensics examiners who use Magnet IEF in the investigation of Internet child exploitation cases. This lab session will provide a hands-on instruction on new and advanced features of IEF that will aid in the recovery and analysis of several types of digital evidence that are critical in these cases including: Using IEF with Project Vic and PhotoDNA to quickly identify illicit pictures and videos; Exporting pictures and videos recovered by IEF to NetClean for review and categorization: Recovering and analyzing browser history, parsed search queries, peer-to-peer file sharing, and chat threads to reveal intent to lure, download, or distribute. Session attendee's will receive a free trial copy of Magnet IEF and Magnet Acquire. This is an exhibitor workshop by Magnet Forensics exhibiting on the 2nd floor. Attendees will receive one entry (for each exhibitor workshop attended) to a tablet drawing, awarded Wednesday evening at the social event. You must be present to win.

Repeats Tuesday from 10:15-11:30am. CITY VIEW 6

*Ariel Castro: Working Together to Achieve Justice (Part 1 of 2)

Saleh Awadallah, Anna Faraglia

On May 6, 2013, the world watched as three women held captive in a house in Cleveland for more than a decade escaped their kidnapper. This case study will detail the investigation and prosecution of their captor, Ariel Castro. After his arrest, law enforcement agencies had to investigate, charge, and prosecute a case against Ariel Castro that would not only lead to his conviction, but would stand up under appeal and produce a sentence befitting his horrific crimes.

Repeats Wednesday from 12:00-1:15pm. LONE STAR B

Automated, Targeted Digital Forensic Examinations (Includes Free Evaluation Software)

Richard Drinkwater

In this hands-on workshop, attendees will learn how to use the newest ADF forensic tools. These

tools extend the initial examination process from triage to automated forensic exams by including a wider array of critical artifacts, while maintaining automation, enhancing ease of use, and increasing performance. This workshop will cover the set-up of an examination, scanning a suspect computer, and reviewing and reporting on collected evidence. All attendees will receive a FREE Evaluation Software Kit with a 90 day license. This is an exhibitor workshop by ADF Solutions exhibiting on the 1st floor. Attendees will receive one entry (for each exhibitor workshop attended) to a tablet drawing, awarded Wednesday evening at the social event. You must be present to win.

Repeats Tuesday from 10:15-11:30am, 1:45-3:00pm, and 3:30-4:45pm.
CITY VIEW 5

Because the Bible Tells Me So: Guidelines for Child Protection Professionals Working with Parents Using Scripture to Justify Corporal Punishment

Victor Vieth

As the legal definition of reasonable force continues to contract, there is increasing tension between criminal justice/child protection professionals and parents who physically discipline their children based on religious beliefs. Using a case study, this workshop offers concrete guidelines for MDTs working with caretakers whose physical discipline of their children exceeds the law but is rooted in their interpretations of scripture.

Brittle or Battered? Medical Evaluation of Multiple Fractures in Young Children

Matthew Cox

This lecture will review the types of fractures, the mechanisms of injury, and the medical diseases that can predispose a child to fractures. Recent media reports have reported on a rare genetic disorder (Ehlers Danlos syndrome) or Vitamin D deficiency (rickets) causing unexplained fractures in young children. The exisiting medical literature as it pertains to these disease processes and fractures will be reviewed. The lecture will utilize case studies to illustrate the spectrum of bone problems in children. LONE STAR C1

Cell Phone Forensis and ICAC Investigations

Sean Morrissey

Designed to provide hands-on instruction to extract evidence from cell phones and to examine that evidence in a timely and judicious fashion. A

range of searches including simple searches, hash sets, and third party applications will be discussed. Also, some of the common pit-falls encountered with modern cell phones and other technologies in investigations will be discussed and the methods to overcome some of those barriers will be addressed. This is an exhibitor workshop by Katana Forensics Research and Development Corporation exhibiting on the 2nd floor. Attendees will receive one entry (for each exhibitor workshop attended) to a tablet drawing, awarded Wednesday evening at the social event. You must be present to win.

(A) Child's Only Chance: Improving the Medical Community's Recognition of Maltreatment

Dyann Daley

A maltreated child, who is not in day care, can be isolated and invisible. Medical professionals and first responders may be the only people who can examine the child's body and get enough information to detect child maltreatment. Unfortunately, medical professionals either fail to recognize or fail to report child maltreatment up to 50-75% of the time. Would your police officer, EMT, nurse, pediatrician, or specialist recognize a child in trouble? Join us to explore options for improving the first responder and medical professionals' response to these children in your community. DALLAS A1

Comprehensive Offender Management: Exceeding the Letter and the Spirit of the Law

Joe Gauthier

This workshop will be a comprehensive look at how to leverage OffenderWatch® to effectively establish best practices for proactive sex offender management. The presenters will discuss the benefits of advanced data collection standards. communication public notification polices, and how and when to adopt advanced supervision and public notification policies. The workshop will include demonstration of techniques to help improve your agency's efficiency and effectiveness when conducting verifications, sweeps, and managing homeless offenders. Whether you are an existing OffenderWatch® client or not, this session will give you invaluable ideas and concepts to help your agency remain compliant with state statutes, while exceeding the expectations of the public.

Grooming: Making You See What I Want You to See and Believe

Chris Newlin

The investigation of child abuse is challenging, and the pursuit of evidence associated with the grooming of children, caregivers, and the community environment provides opportunities for investigators to pursue additional evidence. This workshop will provide an overview of research related to grooming and propose a new framework for the concept of grooming which could dramatically modify current investigatory practices and enhance current forensic interviewing efforts.

DALLAS A2

How Not to Help the Defense Attorney in Child Sexual Abuse Cases (Part 1 of 2)

Lawrence Braunstein

This workshop, presented by a defense attorney (and former prosecutor), will acquaint attendees with the intimate workings of the defense in child sexual abuse

cases: the preparation of a defense case, investigative techniques, pretrial motion practice and discovery, examinations before trial, jury selection, defense trial strategy, demonstrative evidence, trial exhibits, cross examination techniques, and courtroom psychology. By having a broad overview of both pretrial and trial procedures, and how the defense will approach its preparation during each phase of the litigation, the expert and lay (fact) witness will be better prepared in understanding his/her individual role in the proceedings, and better prepared to maximize his/her participation in the overall litigation.

DALLAS B

INTERPOL Resources for U.S. Law Enforcement

Michelle Ford-Stepney, Paul Layman

This presentation will consist of case scenarios that will explore how INTERPOL Washington assists U.S. law enforcement agencies in matters with an international nexus. This assistance generally involves the location and arrest of known sex offenders, criminal history information and records checks from member countries, requests to obtain evidence or conduct interviews for a judicial or law enforcement purpose, and preparation and issuance of INTERPOL notices. INTERPOL notices have demonstrated themselves to be very effective in locating and tracking high profile subjects of interest to U.S. law enforcement.

DALLAS D3

Interrogation Themes A-Z: 26 Themes for Child Pornography Cases (Part 1 of 2)

Chad Steel

This presentation will discuss setting the stage for and using themes when interrogating child pornography subjects. Building on existing techniques, two areas are focused on in detail. In the first session, informational, blocking, assessment, and behavior-provoking questions specific to child pornography cases are covered to set the stage for the interrogation. In the second session, specific themes that can be used successfully on child pornographers are introduced, including "The Collector," "The Artist," and "The Hail Mary." Repeats Thursday from 8:30-9:45am.

Knock and Talks: Maximum Results with Minimum Manpower

Michael Johnson, John Pirics

This workshop will draw from several years of experience in child exploitation investigations that have been initiated by consensual contact (knock and talks). The presenters will provide successful techniques to gain and maintain consent, tips on maximizing the interview, methods for triaging knock and talk targets, and overall strategies for the different types of situations and individuals that are encountered. This information will be blended with examples from cases that the presenters have worked together, many of which have resulted in child rescues and significant sentences.

Repeats Thursday from 10:15-11:30am. DALLAS A3

Multimedia Based Investigations: Early Discovery and Victim Identification Using FaceDNA™ Biometric Facial Recognition

John Bradley

This workshop will demonstrate how the use of Internet Examiner® Toolkit and FaceDNA™ biometric facial recognition can be used to abate bad practices while creating profound time savings opportunities. Learn how facial recognition can be used to detect, identify and reveal faces of victims, suspects and persons of interest in pictures, movie files and surveillance videos. This includes other sources such as browser cache files, the retrieval of Facebook Profile Photos and YouTube videos in real-time. The timesavings and cost savings benefits of using FaceDNA™ will be evident. The future research and development into FaceDNA™ will be shared and discussed. Attendees will be provided a fully featured 60-day evaluation copy of Internet Examiner® Toolkit and will be enrolled in a prize drawing for one full perpetual license with SMS. Drawing will be August 12th at 3:00 pm at SiQuest's booth. This is an exhibitor workshop by SiQuest, exhibiting on the 2nd floor. Attendees will receive one entry (for each exhibitor workshop attended) to a tablet drawing, awarded Wednesday evening at the social event. You must be present to win.

Protecting Yourself in a Tech World: Digital Officer Safety and Ethical Concerns

Justin Fitzsimmons, Lauren Wagner

Nothing is more important than officer safety, whether on the street or on the computer. Attendees will learn how they leave traces of themselves when visiting websites, what information can be traced, and how to ensure that they are not compromising their safety or their investigations by broadcasting this information. This lecture covers website data, IP tracing, cell phone considerations, Bluetooth snarfing, and home wireless networks. This lecture also addresses the unique responsibilities of those in the medical, legal, law enforcement, victim services, and advocacy fields to highlight common pitfalls of social media use by professionals. The audience will see examples from various media sites that could cause ethical issues. Hypotheticals are given to encourage audience participation and interaction in determining whether social media use crosses an ethical boundary. Privacy issues will also addressed.

LONE STAR C4

*Sextortion: How Facebook Tracked Down a Global Predator

Julian Sher. Carol Todd

It's considered one of the most widespread and pernicious online crimes today: Sextortion - young girls tricked into exposing themselves online and then blackmailed. Amanda Todd was a teenager who committed suicide after enduring blackmail and cyber-bullying and her online video plea for help went viral. After an intense investigation, Facebook tracked down her alleged tormenter and police arrested a Dutch man who used as many as 90 aliases and had more than 75 victims around the world. Online chats show the extent of his well-plotted extortion, and how a desperate 15 year-old Amanda tried to fight back. Julian Sher presents a gripping hour-long investigative TV documentary that tells the inside story.

Repeats Wednesday from 3:30-4:45pm. LONE STAR A2

(The) Six Principles of Successful Board/CEO Partnerships

Jonathan Schick

Boards are often riddled with political and functional challenges that creep into the running

of the organization, conflicting with operations and inhibiting effectiveness, despite everyone's devotion to the same set of goals. In this dynamic presentation, the presenter shares the Six Principles that can unlock an organization's potential and lead to successful board/CEO partnerships. During this workshop you will discover the simplest, but often overlooked, keys to strong Board-CEO relationships, uncover strategic ways to empower all members of your board, and develop skills to effectively set achievable goals and evaluation performance. SEMINAR

Testimony: The Art of Teaching Strangers How You Put on Your Pants

Roger Canaff

Even the most skilled clinicians can decompensate in the face of having to testify at trial. The best testimony is plainly worded, bite sized, and presented as a collegial conversation. But how do you teach strangers how you put your pants on? It's the words you use every day, the procedure you know like the back of your hand, and the mental gymnastics it takes you mere moments to complete; that is what your testimony is based on. This session will explore the art of explanation in the context of criminal trial testimony.

LONE STAR C3

Unmasking the Sexual Offender (Part 1 of 2)

Veronique Valliere

Sexual offenders present complex issues in investigation, prosecution, management, and treatment. This training will hope to unmask the sexual offender and reveal their thinking, fantasies, techniques, and influence of the victim and the community. Sex offender methods with victims, manipulation of the community, and deception of others will be explored.

Repeats Tuesday from 1:45-3:00pm. LONE STAR C2

What CAC & CPS Professionals Need to Know About Stalking

Rebecca Dreke, Sue Ryan

Stalking is a crime that is often misunderstood and missed, yet one that affects millions of individuals each year. It is essential for all professionals to understand the dynamics of stalking in order to enhance the safety of stalking. In this session we will explore the prevalence and dynamics of stalking, the effect on victims, and the implications for child protection and child advocacy center professionals. In this interactive workshop, participants will have an opportunity to learn about the common ways

offenders stalk, and will explore preventative measures, safety planning, and legal remedies available to victims of stalking and their families. DALLAS D2

Working with Victims of Commercial Sexual Exploitation and Domestic Trafficking: Do's and Don'ts for Law Enforcement (Part 1 of 2)

Al Krok, Ali Wolf

Girls Educational and Mentoring Services (GEMS) is the nation's largest service provider to commercially sexually exploited (CSE) and domestically trafficked girls and young women. GEMS will present a workshop adapted from its highly rated Commercial Sexual Exploitation of Children Community Intervention Project training curriculum. While open to all audiences and all experience levels, this workshop is specifically designed to provide law enforcement professionals with information needed to work with victims and address the crime of CSE and domestic trafficking of youth. The presentation will pinpoint best practices in identifying, engaging, and interviewing victims.

Alternative Response: An Alternative Path to Safety

Joshua Martin

This presentation will discuss a new stage of service in the Child Protective Services Investigations division called Alternative Response (AR). AR is a more positive, family-friendly, and collaborative approach to working with families in the CPS system. It encourages a caseworker/family partnership and families have an active and important voice in the process. It promotes a more flexible, family engaging approach while still focusing on child safety. In AR the family is recognized as the expert of the family. AR caseworkers will work with families in a deeper level, developing a rapport that will enable them to be an ally, not an adversary. This presentation will provide a detailed overview of the AR program,

its beginnings, foundational tenets, and current implementation plans and strategies for Texas.

Facebook: Working with Law Enforcement

Jason Barry, Emily Vacher

In this workshop, the presenters will discuss how Facebook works with law enforcement to combat crimes against children. Discussed during this presentation will be Facebook "basics," the latest safety and privacy controls available to prevent and reduce risks for users of the site, safety initiatives designed to combat crimes, and a detailed review of Facebook's on-line records request system for law enforcement use. Repeats Wednesday from 1:45-3:00pm.

LONE STAR A2

From Dispatch to Verdict: Corroboration in Sexual Abuse Cases

Nancy Hebert, Todd Hoff

What do law enforcement, CPS, forensic interviewers, therapists, SANE nurses, and prosecutors have in common when it comes to child sexual abuse? They are all MDT members who within their independent disciplines ensure a child's well-being and enhance a child's credibility through the development of corroborating evidence. This presentation will consist of real life case examples that demonstrate how unexpected evidence will impact an investigation or a trial. These examples will include how graphic videos, DNA collection. SANE exams, information from forensic interviews, and how what seemed insignificant became vital corroborating evidence. Many times verdicts depend on the child's credibility. This presentation emphasizes ways to develop corroborating evidence to provide a safety net of credibility for a child at trial.

DALLAS B, See pg. 27 for description

Ignoring Doctor's Orders: The Spectrum of Medical Neglect

Matthew Cox

The neglect of children is often underappreciated, under reported, and under evaluated. This case based talk will serve to define medical neglect by using numerous case examples ranging from failure to treat common childhood diseases (asthma, diabetes) to the more severe, sometimes fatal forms of medical neglect.

DALLAS C, See pg. 21 for description.

Long-Term Missing Guide for Law Enforcement

Robert Hoever

The recent recoveries of long-term missing children have generated much-needed public interest in other long-term missing children. The recoveries resulted in a Long-Term Missing Summit at NCMEC in which leading experts provided valuable input helping develop a guide to help law enforcement address these difficult cases. This presentation will discuss Scope and Scale, investigative techniques pertaining to long term missing children and unidentified bodies, resources such as technology, comprehensive case reviews, biometric data collection, and forensic imaging.

DALLAS A3

Online Investigations: Track, Identify, and Locate Cyber Criminals, Associates, and Website Targets Using Internet Examiner® Toolkit

John Bradley

This workshop will introduce attendees to the new "live analysis" features of Internet Examiner® Toolkit (IXTKTM) and describe how to incorporate and act on clues derived from conventional hard drive analysis. The use of integrated domain research tools within IXTK will be covered in detail, along with how to capture and save real-time results within an active case file. Domain search options to be covered include Whols, Reverse DNS, Reverse IP, Reverse MX, Domain IP Whols, Email Address, and Name Searches. At the conclusion, attendees will have newfound skills and knowledge to be more effective in their online investigations. Attendees will be provided a fully featured 60-day evaluation copy of Internet Examiner® Toolkit and will be automatically enrolled in a prize drawing for one full perpetual license with SMS. Drawing will be August 12th at 3:00 pm at SiQuest's booth. This is an exhibitor workshop by SiQuest, exhibiting on the 2nd floor. Attendees will receive one entry (for each exhibitor workshop attended) to a tablet drawing, awarded Wednesday evening at the social event. You must be present to win. Repeats Wednesday from 10:15-11:30am. CITY VIEW 7

Physical Child Abuse Injury Reconstruction Techniques (Part 2 of 2)

Robert Farley

DALLAS D1, See pg. 21 for description.

Prosecuting Human Trafficking Cases

Brooke Grona-Robb

This workshop is designed to assist prosecutors and investigators who are tackling human trafficking cases, from initial investigation to post-conviction. A team approach between prosecutors, law enforcement, and victim advocates allows for simultaneous goals of rescuing victims and prosecuting their offenders to the fullest extent. This course will help prosecutors work with law enforcement to investigate cases involving trafficking, and to gather the evidence necessary to make a successful case. We will discuss charging decisions, trial preparation, accomplice testimony, defense strategies, and witness preparation. Working with trafficking victims to prepare them for trial requires knowledge of their individual trauma experience, interpersonal dynamics, their needs, and their recovery process. Addressing witness issues and anticipating the unexpected is crucial for a successful prosecution.

Repeats Wednesday from 3:30-4:45pm. DALLAS A2

Teens and Stalking

Rebecca Dreke, Sue Ryan

Research indicates that many stalking victims report being stalked before the age of 18. Although the dynamics of stalking of teens and adults are often similar, including primarily intimate partner offenders, low reporting rates, and connection to sexual and physical assault, practitioners should know how they differ to better serve teen victims. Participants will learn about the dynamics of teen stalking, developmental considerations related to pursuit behavior, the types of technologies teens use and how they are misused, and how to work with teen victims. Presenters will discuss the parent/adult knowledge gap in the use of technology, safety interventions, and prevention efforts. A discussion of how stalking intersects with other forms of teen victimization including bullying and dating abuse will also be included.

DALLAS D2

Tips for Testifying: Presenting a CAC Case Through Investigators

Justin Fitzsimmons

Receiving a notice to appear in court or a subpoena can cause a potential witness to feel nervous and anxious. This interactive presentation discusses testifying and provides concrete suggestions for enduring the witness stand. Attendees will learn the difference between direct and cross-examination, as well as common defense attorney tactics intended to destroy witness credibility.

LONE STAR C3

Triage and Analysis of Mac Computers for Sexual Exploitation Investigations

Steve Whalen

Join SUMURI's founder and CEO, Steve Whalen, as he walks you through best practices for conducting sexual exploitation cases when a Mac computer is involved. All of us know time is of the essence in most sexual exploitation or predator cases. SUMURI will show you the fastest and easiest way to conduct Mac forensic analysis, triage, timelines, and reporting using their newest software - RECON for Mac OS X. Designed for both the experienced Mac examiner and any investigator in the field. Thorough exams and reports can be done in minutes, not weeks! All conference attendees will be given the opportunity to obtain a 30-day demo of RECON for Mac OS X. This is an exhibitor workshop by SUMURI, LLC, exhibiting on the 2nd floor. Attendees will receive one entry (for each exhibitor workshop attended) to a tablet drawing, awarded Wednesday evening at the social event. You must be present to win.

Accident or Inflicted: Investigator, You Decide

Jim Sears

This interactive workshop will look at many common injuries in children from an investiga-

tor's point of view. Attendees will learn how to differentiate between accidental and inflicted abusive injuries and will learn ways to improve abuse investigations.

Repeats Wednesday from 10:15-11:30am. DALLAS D1

Advanced Cold Case and Long Term Missing Children Cases

Brian Killacky

AUSTIN 3, See pg. 20 for description

(An) Advanced Social Network Analysis of Child Exploitation Networks

Petra Talens, Madeleine van der Bruggen

The presentation will provide insight into the structure of online child exploitation networks. The presenters will discuss their project that differed from other (operational) studies conducted on child exploitation networks as it did not only align at high-status members but at those key players who, by their knowledge, behavior or leading position, enable these networks to exist and prevail. Law enforcement personnel will be taught a valid method of extracting key players from online child exploitation networks. The method focuses on offender behavior and network ties on a deeper level than regular social network analysis most commonly used in running operations. This method is very innovative in nature, empirically validated, and it directly offers possible key targets for future operations.

Repeats Thursday from 10:15-11:30am. DALLAS A3

Behind the Mask of a Child Rapist: "Hope's Journey"

Jim Holler

This workshop will follow the life of a young child who was molested and raped by caregivers. We will follow the traumatic events of her life into adulthood. This story will give participants the tools to investigate similar crimes and provide ongoing services for child victims. This information will help participants complete more thorough investigations, greatly improving the odds of a successful arrest and prosecution of the perpetrator.

Repeats Tuesday from 3:30-4:45pm. LONE STAR A4

Child Neglect: Intervening in Cases that are Hard to See

Amy Russell

The effects of neglect are destructive and potentially lifelong for child victims. Neglect can impact children in multiple areas, including health and physical development, intellectual

and cognitive development, emotional and psychological development, and social and behavioral development. This workshop examines the multiple areas of impact neglect has on a child's development and offers suggestions for investigating and responding to cases of child neglect through child welfare, criminal and mental health systems.

AUSTIN 1

Courtroom Psychology: How to be a Good Witness and Survive in the Courtroom (Part 1 of 2)

Lawrence Braunstein

This workshop is designed for the expert and lay (fact) witness, and will "demystify" the trial process. It will address and explain the different layers of action in the courtroom, how to "read" it and how to effectively respond. Issues such as body language, the importance of what you say and how you say it, demonstrative evidence and effective presentation, the trial as theatre, establishing a level of comfort in the courtroom, how to defend yourself on cross examination and how to protect yourself in the witness box (when no one else will). The more comfortable and confident a witness is in the courtroom, the more effective their testimony can be.

DALLAS B

Domestic Minor Sex Trafficking Investigations 101

Michael Barker, Carrie Landau

Sex trafficking cases are among the most complex and difficult, yet most rewarding, cases to work. This lecture will focus on some strategies that will ensure the success of your investigation, providing an understanding of the human trafficking victim in order to start your case out right, and keep your investigation on target. Using case examples, the presenters will discuss the psychology behind human trafficking, how traffickers gain and maintain their control, and strategies for overcoming these effects. They will discuss recent trends in recruiting, victim control and coercion, and strategies for responding to, and creating effective relationships with victims of all circumstances. Lastly, they will discuss collaboration between federal and local entities, and strategies for sharing resources and working successful joint human sex trafficking investigations.

Repeats Thursday from 8:30-9:45am.

12:00-1:15 PM CONT'D ON NEXT PAGE.

12:00-1:15 PM CONT'D

Investigation of Sudden, Unexplained Infant Deaths

Candace Schoppe

This lecture focuses on the Sudden Unexplained Infant Death Investigation (SUIDI) "Top 25" produced by the Centers for Disease Control. The "Top 25" represents the 25 most important pieces of information that the medical examiner needs in order to facilitate an appropriate death investigation and interpret autopsy findings (or lack thereof). The discussion will include common autopsy findings in "SIDS" or "SUIDI" cases, and emphasize the importance of scene investigation, doll reenactment, and communication between various investigating agencies and the medical examiner.

Repeats Thursday from 10:15-11:30am. LONE STAR A3

It's a Crisis for Me Too! Helping Non-Offending Parents in Child Sexual Abuse

Jeff Wherry

Non-offending parents play a key role in the recovery of sexually abused children. This workshop will review the importance of social support in the recovery of sexually abused children, examine ways in which systems have neglected the psychological needs of non-offending parents, discuss myths and controversies which complicate the non-offending parent's ability to be supportive, review the needs of non-offending parents, and discuss ideas for engagement of parents.

DALLAS A2

*Mark Berndt: Sexual Abuse at the Miramonte Elementary School

Peter Hahn

This case study will detail the investigation of Mark Berndt, a 30-year veteran teacher, whose sexual abuse of children included feeding them semen-laced cookies. Documents made public in the related civil lawsuit revealed that the L.A. Unified School District had received complaints as far back as 1983 about possible sexual misconduct by Berndt. The school district eventually settled the lawsuit for nearly 40 million dollars over its handling of the sexual abuse case involving Brandt. In this presentation attendees will learn how to handle the problems and issues that will arise with a major investigation that gathers worldwide media attention, how to interview hundreds of children, and how to handle political interference and civil attornevs distorting the truth prior to trial.

Repeats Thursday from 8:30-9:45am.

DALLAS C

*(A) Perverted Pair: The Investigation of a Child-Molesting Couple

Tyler Smith, Aaron Spivack

In this presentation, the case agent and lead prosecutor will discuss how to make a bulletproof case against a sophisticated defendant and his girlfriend starting from an unreliable informant. They will take you through the investigation and successful prosecution of a couple who planned to set up a babysitting business to molest children and who possessed the largest child pornography collection seen by FBI New York, which the couple kept hidden in sophisticated encrypted containers on over 65 terabytes of computer media. The presenters will talk about how to best use a variety of investigatory techniques including an informant, a jailhouse informant, undercover Agent, and cryptanalysis, how to conduct a post-indictment obstruction of justice investigation, and how to pull together evidence and head off nearly every possible defense at trial. The presenters will also discuss how they prosecuted this case without calling either informant or the undercover agent.

Repeats Wednesday from 3:30-4:45pm. LONE STAR C4

*Randy & Me: A Prosecutor's Story of His Childhood Sexual Abuse

Kevin Mulcahy

Repeats Thursday from 8:30-9:45am.
LONE STAR A2, See pg. 17 for description

Sexual Assault: Rape or Molestation

Ken Lanning

LONE STAR A1. See pg. 23 for description.

Social Media and Ethics

Roger Canaff

Social Media use by professionals is both useful for career enhancement and a great way to stay in touch with family and friends. However, ethical rules of professionalism are implicated when comments related to work are posted. This workshop will highlight the ethical rules for lawyers, social workers, nurses, physicians, and law enforcement and demonstrate ethical and also troublesome content.

DALLAS A1

*Trafficking Children for Sexual Exploitation

Joe Sullivan

This case study will focus on an offender who provided children for adult perpetrators for the purpose of sexual exploitation. The presentation will follow the life of the offender and highlight some of the important features of this type of sexual offending. The offender shares insights

into his mind-set and the steps he took to avoid detection from law enforcement. The presentation contains video of interviews with the offender which some might find disturbing or distressing.

Repeats Wednesday from 3:30-4:45pm. LONE STAR B

Utilizing MDTs to Effectively Address Cases of Domestic Minor Sex Trafficking

Caroline Diemar, Tammy Sneed, Erin Williamson Using case examples, this presentation will discuss how law enforcement, prosecutors, and victim advocates can effectively work together through MDTs to address human trafficking in their communities. This presentation will discuss how team members can collaborate to meet the needs of victims, support the successful prosecution of traffickers, and effectively address common challenges that can present themselves in these cases. Attendees will also learn about the systems and protocols the Connecticut Department of Children and Families has put in place to facilitate interagency collaboration and support the use of MDTs in addressing cases of human trafficking across the state.

Repeats Thursday from 10:15-11:30am. DALLAS D3

When a Child Takes It Back: Successfully Prosecuting a Case with a Recanting Victim

Mary-Ann Burkhart

Recantation is very common in child abuse cases, as evidenced not only by current available studies, but also in the personal experiences of child abuse professionals. This workshop will explore the realities of recantation, the common reasons for recantation, suggestions for avoiding recantation, and helpful hints to help recanting victims through the system; whether recantation occurs in the investigative stage, the pretrial phase, or during trial itself.

1:45-3:00PM

3D Printing: Non-Accidental and other Pediatric Trauma

Jonathan Morris

3D printing has continued to expand within the field of medicine. The Mayo Clinic has incorporated this technology into their imaging work flows. This presentation will give a brief overview of turning cross sectional images, including CT and MRI, into accurate life size models using additive manufacturing.

Specifically the presenter will discuss the role of 3D printing as a demonstrable aid in non-accidental trauma, varied pediatric traumas, and post mortem forensic pathology. 3D printing creates accurate life size models of pediatric trauma that may not be able to be recreated pathologically. For non-medical personnel it provides an easily understandable depiction of the injury sustained. At the conclusion of this talk the attendees will be able to see the benefits of 3D printing including education of the legal community, forensic pathologists, forensic radiologists and all who work with abused children.

Repeats Wednesday from 1:45-3:00pm. DALLAS A2

Automated, Targeted Digital Forensic Examinations (Includes Free Evaluation Software)

Richard Drinkwater

This is an exhibitor workshop by ADF Solutions, exhibiting on the 1st floor. Attendees will receive one entry (for each exhibitor workshop attended) to a tablet drawing, awarded Wednesday evening at the social event. You must be present to win.

Repeats Tuesday from 3:30-4:45pm. CITY VIEW 5, See pg. 26 for description.

Conducting Risk Assessments of Child Pornography Offenders

Darrel Turner

This workshop examines the risk factors that should be considered in a psychological risk assessment of child pornography offenders in comparison to a risk assessment of a contact child sex offender. This presentation will address ongoing research related to this topic, findings from the 2012 Congressional Report, and other available research including an analysis of studies frequently cited by the defense as evidence of general low risk of this population. Repeats Wednesday from 12:00-1:15pm.

Controversies in Abusive Head Trauma (Part 1 of 2)

Reade Quinton

LONE STAR A2

This workshop will cover current "hot topics" in abusive head injuries. The discussion will include sources of subdural hemorrhage, the debate over the significance of retinal hemorrhage, proposed mechanisms of injury in "shaking" cases, and an analysis of "short falls." Repeats Wednesday from 1:45-3:00pm.

Courtroom Psychology: How to be a Good Witness and Survive in the Courtroom (Part 2 of 2)

Lawrence Braunstein
DALLAS B, See pg. 31 for description

Craigslist Investigations

Wayne Nichols

Craigslist continues to be a target-enriched environment for exploitation investigations. This workshop will cover some critical changes that Craigslist has made in regards to communication on Craigslist. This lecture will discuss examples of good, bad, and ambiguous ads on Craigslist. Script ideas to personify a juvenile, parent, or Good Samaritan who are not only responding to ads, but also posting ads will be discussed. Attendees will also see several examples of different ways law enforcement can request information from Craigslist.

Repeats Wednesday from 8:30-9:45am. DALLAS D3

How to Create a Strategic Plan that's Inspirational, Inclusive, and Implementable

Jonathan Schick

Has your strategic plan been "museum quality, suitable for framing," nice to look at, but without any practical use? Or have you not even embarked on a plan, fearing it will be a waste of time anyway? This workshop will walk you through the steps of creating a 100% participant owned, user-friendly strategic plan. The Four Steps are: Practical Visioning, Identifying Blocks, Strategic Directions, and Realistic Implementation Steps. Take your organization to the next level through this process!

*Jessica Ridgeway Case Study: A Behavioral Perspective

Mark MacKizer

This presentation will focus on the behavioral analysis techniques used by the FBI's Behavioral Analysis Unit to assist the Westminster, CO Police Department in their 2012 investigation into the abduction of 10 year-old Jessica Ridgeway. It will specifically detail the on-scene behavioral analysis input provided to investigators of the abduction, homicide and dismemberment of Jessica. The presenters will discuss how these techniques assisted in narrowing the focus of the investigation, generated potential leads, formulated media strategies, interview strategies and assisted in the prosecution of the offender. The presentation will conclude with a dialogue, based on the post-offense behavioral

interview of offender Austin Sigg, highlighting his pre-offense behavior, victim selection, and possible motives.

Repeats Thursday from 8:30-9:45am. LONE STAR B

Jury Selection in Child Sexual Abuse Cases

Sherre Thomas

This workshop will discuss issues and challenges facing the prosecutor in selecting a jury in a child sexual abuse cases. This session will include topics such as the recanting victim, the young child victim, the teenage victim, the lack of medical and physical evidence, and punishment issues.

REMINGTON

*(The) Kidnapping and Murder of Polly Klaas (Part 1 of 2)

Eddie Freyer

This case study examines the various dynamics of a complex investigation involving an abducted child. The presentation reviews initial law enforcement responses and crime scene management protocols. A special emphasis is placed upon forensic evidence collection and interpretations. Major case management strategies will be discussed as well as resource supervision. The presentation follows investigators through the 65 days of intense investigation and includes family and community issues. Media and officer wellness issues will be closely reviewed giving the attendees a real feeling of stresses experienced by the investigative team. The attendees will be asked to "role play" and will make pivotal decisions during the investigation.

Repeats Wednesday from 12:00-1:15pm. DALLAS C

Kik and Law Enforcement

Nicole Nearing, Lisa van Heugten

This workshop will provide an overview of Kik's processes and resources for law enforcement in criminal investigations. The presenters will discuss how Kik works, new product features, data that might be available pursuant to legal process, and provide an update on the team's initiatives to keep kids safe on Kik.

DALLAS A3

1:45-3:00 PM CONT'D ON NEXT PAGE.

1:45-3:00 PM CONT'D

*Lessons from Amora (Part 1 of 2)

Jacob Crater, Micheal Jimerson

This presentation discusses the investigation and prosecution of the brutal sexual assault and murder of 13 month-old Amora Bain Carson. Specifically, speakers will focus on how different professionals, peace officers, social workers and prosecutors, faced the challenges of a crime so horrific. The medical examiner testified it was the worst he had ever seen. Presenters will address the stages and admitted mistakes of the case, from how the killers manufactured a "fake" crime scene, to the DNA bite mark evidence, and to a community's attempt to understand the viciousness of the crime. Included in the workshop will be the Texas Ranger's audio recording of the murderer's statement, which the Ranger initially mistook for a grieving parent. Members of the original prosecution team will address how each agency played a pivotal role in the trials of the mother and her paramour. Repeats Thursday from 8:30-9:45am.

LONE STAR C4

*Looking for Love in All the Wrong Places

Amy Derrick, Carmen White

This case study will examine the investigation and prosecution of Thomas Eppelsheimer aka Tommy Gunn. He was the promotions agent for Club Darkside, a teen club also purporting to be a religious institution. Gunn would routinely distribute narcotics to underage girls, and he was subsequently convicted of raping two girls from the club. This case study will focus on how prosecutors used the defendant's cell phone and the calls he made from jail to convince a judge to look beyond the actions of the teenagers and to look at the choices made by the defendant. Repeats Wednesday from 8:30-9:45am.

Mobile Forensics: Modern Ways of Communication, Hidden and Deleted Data

Galina Rabotenko

DALLAS D2

Modern devices are not just phones for calls but modern communication devices which store a lot of personal data. The experts' job is to analyze this information. The purpose of this workshop is to share knowledge on how to find and identify this data. The technology of mobile devices changes frequently. It is important your forensic tools stay up to date and highlight these changes. In this live demonstration find out what information mobile devices can hide about the device owner and what data can easily be overlooked. *This is an exhibitor*

workshop by Oxygen Forensics, exhibiting on the 2nd floor. Attendees will receive one entry (for each exhibitor workshop attended) to a tablet drawing, awarded Wednesday evening at the social event. You must be present to win. CITY VIEW 6

(An) Overview of the PRACTICE Implementation of Trauma-Focused Cognitive Behavioral Therapy with Children, Adolescents, and their Non-Offending Caregivers (Part 1 of 2)

Esther Deblinger

This workshop will focus on introducing clinicians to the PRACTICE components of TF-CBT and the basic principles guiding the implementation of this approach with families. This overview workshop is designed to give participants "a taste" of TF-CBT to enhance their understanding of the potential benefits of this early effective intervention for children, adolescents and non-offending caregivers impacted by trauma. The presenter will demonstrate methods of engaging in individual parent and child as well as conjoint parent child sessions via case examples, role-plays and creative interventions. The session will end with a focus on clinician self-care.

AUSTIN 3

Polyvictimization: The Victim Impact of Multiple Forms of Child Abuse

Sharon Cooper

Many victim impact statements focus on a specific form of child abuse, which may be the basis of charges in child maltreatment. However, psychological and social science research has revealed that when a victim has been abused by four or more different means over the course of a year, the impact is far greater. Investigators, prosecutors, and judges as well as mental health specialists must recognize the challenges of polyvictimization. The link between this outcome and the Adverse Childhood Experiences Study requires ongoing mental health and educational monitoring for children who have had this complex form of ongoing trauma.

(The) Power of 3: Combine Artifacts from Mobile, Operator, and Private Cloud Data Sources to Focus Your Investigations

Ronen Engler

Do you need to extract insights from an increasing number of disparate data sources, but also need to make sense of it in minimal time? In this scenario-based session, find out how to extract forensically sound data from private cloud and mobile data sources. Learn how importing it, together with carrier records, into a unified visual

view can help you efficiently contextualize the data to identify leads and make decisions—all within the confines of appropriate legal authority. Finally, understand how these efficiencies can accelerate your investigations, improving both their quantity and their quality. This is an exhibitor workshop by Cellebrite Inc. exhibiting on the 2nd floor. Attendees will receive one entry (for each exhibitor workshop attended) to a tablet drawing, awarded Wednesday evening at the social event. You must be present to win. CITY VIEW 7

Suffer from Burnout? Give'em the F.I.N.G.E.R.!

Mark Yarbrough

This workshop will discuss burnout, which affects millions of Americans each year and has been called "the disease of our civilization." Professionals who help protect children have a high risk of developing burnout. But there's good news -- burnout can be healed. The presenter, a former 20-year elected district attorney, personally experienced burnout and then conquered it. He has since become a "burnout expert" and has written and published on the subject and has taught thousands of people how to overcome burnout. Attendees will be laughing, and at the same time learning Mark's F.I.N.G.E.R. philosophy to help themselves or their co-workers avoid and/or recover from Burnout.

Repeats Wednesday from 12:00-1:15pm and Thursday from 10:15-11:30am.

LONE STAR C1

Suspect Interrogation Techniques in Child Abuse Cases

John Combs

Child abuse investigations can be very complex and difficult to prosecute. When given the opportunity to interview and interrogate the suspect we must make the most of it. This workshop will provide techniques to assist the investigator in obtaining a confession. We will discuss building rapport and learning about the suspect's life "stressors" that will be used in the latter part of the interrogation in order to obtain a confession. We will learn from the suspect what we can use as a "theme" as to how and why the offense took place in order to give the suspect an "out." Brief case studies will be referred to as well as excerpts from an actual interview.

Repeats Thursday from 8:30-9:45am. LONE STAR C3

Tools for Identifying Victims and Finding Producers

Glynn LeBlanc

Attend this session to see how multimedia files are extracted from evidence sources, analyzed and categorized, and then investigated to identify and build a case against the perpetrators and their associates. The presentation will include a demonstration and case study from Mike Johnson of DHS-ICE and will conclude with Q&A. This is an exhibitor workshop by Nuix North America exhibiting on the 2nd floor. Attendees will receive one entry (for each exhibitor workshop attended) to a tablet drawing, awarded Wednesday evening at the social event. You must be present to win.

Very Young Girls: GEMS Documentary Screening with Q&A

Al Krok, Ali Wolf

Girls Educational and Mentoring Services (GEMS) will screen their documentary, "Very Young Girls." The critically acclaimed documentary is used as a backdrop for probing insightful discussion about the commercial sexual exploitation of children (CSEC). After the viewing, audience members will have the opportunity to ask questions and react to themes raised in the film. AUSTIN 1

What Child Abuse Professionals Must Know About Domestic Violence (Part 1 of 2)

Jan Langbein

A growing body of research points to a definite link between adult domestic violence and child abuse. These are not isolated crimes. Whether the child is the unintended victim, the accidental victim or the deliberate target, the severity and manner of child abuse bears a strong resemblance to the type of maltreatment experienced by their mothers. The two populations share several similarities as well as some important differences. Understanding the impact of domestic violence on victims and their children can increase appropriate response and decrease the risk of child victims experiencing and perpetrating abuse in adulthood. This workshop will discuss how by knowing the dynamics and effects of domestic violence, law enforcement/CPS intervention and prevention can reduce crimes of tomorrow as they make children safer today.

LONE STAR A3

3:30-4:45PM

*Amanda's Story: The Perfect Storm

Carol Todd

This case study will detail the cyberbullying, exploitation and real life bullying that that led to the suicide of Amanda Todd at age 15. The presenter, Amanda's mother, will discuss the events prior to and following Amanda's death and how it started a conversation regarding cyberbullying and mental health issues. She will explain how Amanda's story brought to the world's attention the serious consequences that can result from such serious issues. Carol will discuss her efforts at helping kids stay strong by creating The Amanda Todd Legacy Society. The Amanda Todd Legacy Society is a non-profit that seeks to help youth, wherever they are, supplying resources and assistance for anti-bullying initiatives, mental health research, and cyber safety. Repeats Wednesday from 8:30-9:45am.

Highlighting the Legal and **Technical Challenges Faced by Both Law Enforcement and Industry**

Einat Clarke, Andrea Kirkpatrick, lan Quinn, John Starr

CyberTip reports from industry continue to rise exponentially. This workshop will explore the challenges faced by law enforcement in dealing with increasing volumes. Additionally, the presenters will touch on the implications of the Keith and Ackerman decisions in which defendants have tried to suppress evidence based on the allegation that service providers have acted as agents of the government.

AUSTIN 2

Internal Controls for Fraud Prevention in Non-profit Agencies

Lynn Davis, Heather Emmanuel

Internal controls form a complex system that involves the collaboration of the board of directors, the audit committee, external auditors, operations personnel, and others. This workshop will explore the key roles in preventive controls and essential components of internal control, inherent limitations of internal controls, and much more. The presenters will discuss several instances of fraud that occurred within not-forprofits and how they could have, potentially, been avoided. Attendees will learn how to outline key preventative controls, identify essential elements of an effective internal control system, categorize major fraud schemes, use controls to prevent specific fraud schemes, and evaluate controls and corrective deficiencies.

Jacob Crater, Micheal Jimerson Repeats Thursday from 10:15-11:30am. LONE STAR C4, See pg.34 for description

*Maurice Jerralds: The Popular **Cheerleading Coach Was a Predator**

Nancy Oglesby

This case study will examine the multiple investigations and prosecutions of Maurice "Moe" Jerralds, a private cheerleading coach. It will detail his victimization of young girls for more than a decade while parents failed or refused to recognize his abuse. In 2001, his prosecution for sexual abuse of two cheerleaders resulted in an acquittal when the cheerleading "community" rallied to his support, packed the courtroom, wore t-shirts displaying his picture, and treated the two victims as outcasts. For the next ten years, Jerralds abused five other girls on his cheer team almost right in front of their parents' eyes. In 2011, an outcry of abuse led to a second investigation and a successful prosecution. This case study will not only look at both investigations and trials but also discuss the difficulties of convincing this cheerleading community that the popular coach was in fact a predator in their midst.

Repeats Thursday from 8:30-9:45am. DALLAS B

OK. You Got This Case. Now What?

Jim Sears

You have been assigned "that case," now the challenge is how to proceed. This workshop will provide some ideas in overcoming obstacles in complex and challenging child abuse investigations. The presenter will discuss ideas for both physical and sexual abuse cases.

Repeats Wednesday from 1:45-3:00pm. DALLAS D1

Overcoming Anti-Forensics and Showing Intent

Zeus Flores, Jad Saliba

Successful prosecution of child pornography investigations often requires the core evidence. i.e. images and videos, to be present. Unfortunately, anti-forensics, encryption, and privacy software continue to pose a challenge. Proving intent is a key component in these cases. What clues should a forensic examiner look for when anti-forensics tools/techniques are used and the core evidence is gone? And how can you

paint a picture showing intent and sequencing? This intermediate-level technical lecture will discuss examination techniques, software tools, and provide information on various artifacts that can bolster a child pornography case or even reveal the "smoking gun" that secures a conviction. Jad Saliba, from Magnet Forensics, will join us to show how IEF can help in these types of cases.

Repeats Wednesday from 10:15-11:30am. DALLAS D3

(An) Overview of the PRACTICE **Implementation of Trauma-Focused Cognitive Behavioral Therapy with** Children, Adolescents, and Their Non-Offending Caregivers (Part 2 of 2)

Sex Offender Registration in the **United States: Update and Trends**

Lori McPherson

This presentation will provide participants with an overview of the state, territory, and tribal sex offender registration systems within the U.S. In addition, the role of federal standards (SORNA) and national-level databases housing sex offender information will be discussed. Participants will also gain knowledge about the special issues of sex offender registration for persons convicted in military courts, as well as trending legal and policy issues of interest to the practitioner such as retroactive application, risk assessment, and juvenile registration.

LONE STAR A4

Shades of Gray: Balancing Discovery Obligations and Victims' Rights

Linda Seabrook, Nathan Stump

The discovery obligations of state and federal prosecutors are established by numerous sources such as State or Federal Rules of Criminal Procedure, applicable federal or state statutes, Brady v. Maryland, Giglio v. United States, relevant case law, discovery orders entered in particular cases, and ethics rules. While prosecutors have the responsibility to provide broad discovery, they should also be mindful of appropriate concerns such as victim privacy. safety, and protecting the case from obstruction efforts. This seminar will discuss this tension in detail and provide practical tips for striking an appropriate balance in the best interest of the case and the victim.

Repeats Wednesday from 12:00-1:15pm. CITY VIEW 8

Somebody's Daughter: How Pimps Play the Prostitution PR Game

Julian Sher

Across the country, police are revolutionizing the way we tackle sex trafficking, treating teenage girls on the street as victims, not criminals. A federal prosecutor got the first ever convictions against "johns" under federal trafficking statutes. Judges set up a special youth courts to help the girls, not punish them. But we are still losing the battle because of the widespread "pimp culture" in TV, movies, and music videos that demean young women and turn the men who are their human traffickers into pop icons. Share the lessons and insights from Julian Sher's book, "Somebody's Daughter: The Hidden Story of Americas Prostituted Children." Repeats Wednesday from 12:00-1:15pm.

LONE STAR B

Technology Trends: What is the New Evil on the Internet?

Ben Butler, Chris Roosenraad

This workshop will review current and future trends in Internet technology with a focus on technical issues that can have an impact on Internet criminal investigations. Topics will include: the growth in end-to-end encryption, persistent monitoring, IPv6, NAT, CGN, the "Internet of Things," TOR, the rise of "2 factor authentication," and the growth of "multipathing." This presentation is designed for anyone who wants to know where the Internet is going.

AUSTIN 1

Tools in the Toolbox: NCMEC's Efforts to Help Combat Child Sexual Abuse Images Online

Jennifer Newman

NCMEC's efforts fighting online child sexual abuse goes well beyond the CyberTipline. Working globally with industry and law enforcement to protect child victims, NCMEC encourages a multi-faceted approach to attack this problem. In this workshop you will learn about the many tools being used around the world to reduce the amount of child sexual abuse material online. Highlighted topics will include PhotoDNA, blocking & filtering, industry reporting, and the policy implications of each.

DALLAS A1

Unmasking the Sexual Offender (Part 2 of 2)

Veronique Valliere

LONE STAR C2, See pg. 28 for description.

Vehicle System Forensics

Ben LeMere

Vehicle systems store a vast amount of data. This includes navigation history such as recent and favorite locations as well as calls logs, contacts and SMS messages. The amount of data these systems contain has increased to include emails, pictures, videos and social media feeds. Many systems record events such as when and where a vehicle's lights are activated, which doors are opened and closed at specific locations, and even the vehicle's location when Bluetooth devices connect. When vehicles with these systems are connected with criminal activity, this data can contain vital evidence. Retrieving this data can be challenging. In many vehicles multiple systems can be responsible for recording data, each requiring a difference method of acquisition and analysis. This presentation will address the data stored in several different systems and touch on methods used to acquire and analyze it. This is an exhibitor workshop by Berla Corporation, exhibiting on the 1st floor. Attendees will receive one entry (for each exhibitor workshop attended) to a tablet drawing, awarded Wednesday evening at the social event. You must be present to win.

Building Resiliency in the Workforce When Your Job is Investigating Child Abuse

Debra Anderson, Kimberly Day

Child abuse investigators know firsthand the impact child welfare work can have on staff and teams. This workshop will present tools for the development of an organizational resiliency model—based on OVC's National Victim Assistance Academy's curriculum on Resiliency. Participants will learn the five core elements of Resiliency and how this model uses policies, supervisory techniques, and training to implement specific strategies that support resiliency. This workshop will provide an overview of the organizational resiliency model and concrete strategies that organizations can implement.

Repeats Thursday from 8:30-9:45am. SEMINAR

Child Abuse and Neglect Fatalities: Learning from Tragedy

Kathryn Sibley Horton

Understanding child abuse and neglect fatalities is an important step to designing prevention and intervention strategies. This workshop will cover what is an abuse/neglect fatality, data and examples to help inform interventions, and various prevention strategies that go beyond the basics. Participants will walk away with several tools to help increase their knowledge about the difference between a child fatality caused by abuse/neglect

and an accidental child fatality, what information first responders/investigators can gather to help determine the difference, what data about CPS can confirm about child abuse/neglect fatalities, and innovative ways for communities to strengthen prevention and intervention efforts.

Repeats Thursday from 8:30-9:45am.

Defending the Forensic Interview in Court

Rita Farrell

The field of forensic interviewing is a constantly evolving profession. This presentation will give attendees concrete suggestions for defending their work in court and handling themselves in a direct examination. The presenter will discuss common cross-examination tactics and how to respond to them.

DALLAS D1

Empowerment vs. Expectations: A Revolution in Children's Safety

Stephen Dalev

This workshop will present a "revolution in prevention education," a methodology built on empowerment to provide children with real skills and the opportunity to recognize, avoid, resist, and escape predatory violence, harm, or manipulation. The presenter will discuss a formula that trains and empowers children with the ability to plan and react at both a cognitive and instinctive level if they find themselves in danger. If you are getting tired of responding after the crime and victimization and are hoping or looking for an effective way to make it harder for the predator to hurt our children in this world today, we hope you will join us.

DALLAS A3

Five B's of Child Physical Abuse: Bruises, Burns, Bones, Bellies, and Brains (Part 1 of 2)

Kristen Reeder

This workshop will review the variety of injuries seen in cases of child physical abuse. The discussion will be case based and include examples of abusive and non-abusive injuries. The lecture will be geared toward CPS workers, law enforcement investigators, and attorneys to learn the basic aspects of child physical abuse injuries.

DALLAS B

(The) Front Line Worker: Child Abuse and Injury Investigation and Reconstruction (Part 1 of 2)

Jim Holler

Physical abuse, sexual abuse, and neglect of children can happen anywhere. Anyone, regardless of social, economic, or educational level, can physically abuse or neglect a child. Investigators must be able to recognize the behaviors of abusive parents or caretakers and be able to process important information related to the assessment of soft tissue injuries in victims of child abuse. This workshop will address the duties of the investigating police officer and CPS worker as they begin to investigate a child abuse complaint and what evidence should be collected in every case. Investigators will be provided with the essential information on the abuse and neglect of children, the dynamics of physical abuse, and the reconstruction and investigation of soft tissue injuries.

LONE STAR C3

Gangs and Child Abuse (Part 1 of 2)

Jabari Howard, Doug Millican

The median age of criminal street gangs is getting younger. Popular culture and social media have made it "cool" to be in a gang. In the city of Dallas alone, there are nearly 10,000 documented gang members and over 100 documented criminal street gangs. For law enforcement, dealing with a criminal offense involving a member of a criminal street gang or gang-related conduct can present its own challenges. If that criminal offense involves elements of child abuse, the challenge is even greater. This presentation will give participants an understanding of the fundamentals of gang recognition, documentation and investigation. In addition, the presenters will discuss several prior cases where the worlds of gangs and child abuse met. Repeats Thursday from 8:30-9:45am.

LONE STAR A1

Handling Common Problems in Child Sexual Abuse Cases

Summer Elmazi

This presentation will explore problems that often arise in the investigation and prosecution of child abuse cases. The discussion will include examples of issues that prosecutors commonly encounter before and during trial and advice that each member of a multi-disciplinary agency team can use to improve the quality of child abuse cases filed with the courts.

REMINGTON

Interrogations and Confessions: A Debate Between Cops and a Defense Attorney

Mike Krapfl, Joshua Tepfer, Jonathan Turbett
From the unique perspective of a defence at

From the unique perspective of a defense attorney, this presentation will discuss evolving legal issues related to custodial interrogations and confessions, including special issues when your suspect is a juvenile. The presentation will discuss best practices to ensure that your interrogations result in constitutionally permissible confessions that can survive defense motions to suppress. The presentation will also explain how certain psychological tactics can induce false confessions and provide tips on how to how to distinguish between true and false confessions. Repeats Wednesday from 12:00-1:15pm.

LONE STAR C4

Just the Facts: Successful Interview Strategies (Part 1 of 2)

Thomas McGreal

"Just the facts" was what Sgt. Joe Friday of Dragnet used to tell the witness. Officers and investigators are called upon daily to interview victims, witnesses, and suspects to obtain case details, providing the foundation for investigations. But the fact gathering interview is much more than asking who, what, where, when, how, and why. This session focuses on new research into the fact gathering interview and how witnesses and victims store and retrieve memories. Learn a new structured approach to develop information without contaminating a witness's memory or eliciting false information.

Leveraging Cell Phone Numbers and Data to Locate and Convict Child Predators

Zach Artz, Richard Spradley

Do you need to know who belongs to a cell phone number? Discovering this quickly is key to the capture of child predators. Conversely, in order to build the case and ultimately convict these people, the data pulled from their phones can seal the deal. Learn how to leverage a

simple tool via text messaging to help you discover, in near real time, who belongs to a phone number and dramatically accelerate your investigations. In addition, learn how cell phone data has become one of the most utilized tools to apprehend and convict criminals. Gain an understanding of how and what data can be extracted from a suspect's phone to support the case; this includes data that the user believes is private and erased. This is an exhibitor workshop by HDREdge exhibiting on the 1st floor. Attendees will receive one entry (for each exhibitor workshop attended) to a tablet drawing, awarded Wednesday evening at the social event. You must be present to win.

This is an exhibitor workshop by SiQuest, exhibiting on the 2nd floor. Attendees will receive one entry (for each exhibitor workshop attended) to a tablet drawing, awarded Wednesday evening at the social event. You must be present to win. CITY VIEW 7, See pg. 28 for description.

Protecting Children by Getting Mom Out of a Domestic Violence Situation

Kristen Howell

Protecting children who live in a home with domestic violence is both frustrating and challenging for law enforcement, CPS, and child advocates. Children in these settings are not only exposed to the violence they witness, they are often abused themselves. To combat this problem, professionals must feel a sense of urgency to create a safe environment for the child—one that is free from domestic violence. This presentation will discuss ideas and strategies that will allow you to use your sense of urgency to prepare the mother for the long 'marathon' of leaving the violent relationship and protecting her children.

Barriers in Interviews of Spanish Speaking Children

Lisa Martinez

Many barriers arise during the investigation

and prosecution of child abuse cases involving Spanish-speaking families. Cultural and linguistic barriers can be addressed by properly trained Spanish speaking forensic interviewers, and through multidisciplinary team collaboration and training. This workshop will focus on identifying ways to overcome culturally influenced blocks to disclosure, and language barriers unique to the Spanish speaking population within the forensic interview and throughout the investigation. The impact of family dynamics on both the disclosure process and investigation process also will be explored. Portions of forensic interviews conducted in Spanish and case examples will be used throughout this presentation.

Repeats Thursday from 8:30-9:45am. AUSTIN 1

Compassionate Listening: A First Aid Tool for Interacting with Trauma Survivors

Christopher Anderson

For many survivors, disclosing a painful past is often met with doubt, anger, or apathy. These negative reactions can reinforce feelings of shame and fear. This workshop will discuss how the initial response to a trauma or abuse disclosure can dramatically influence whether the individual will further engage with law enforcement. Attendees will learn the basics of Compassionate Listening, a skill that can be learned and could have a powerful impact on our society.

"I Would Never Hurt My Child": Identifying Accidental vs. Non-Accidental Trauma

Deborah Kleypas

Every day children arrive in emergency rooms with injuries to their body. Many are diagnosed with abrasions, bruising, broken bones, and burns and head injuries. Some children are able to tell what happened to them, but many cannot. Often it is the parents or guardians who provide the history of what happened. "She fell off of the bed." "His brother pushed him down the stairs." "She grabbed the cup and spilled the hot water down her legs." Or sometimes simply, "I don't know what happened." When

caregivers are questioned about child injuries they often state, "I would never hurt my child." However, research and experience tells us otherwise. This presentation with case studies aims to provide information to help aid in the recognition of injuries caused by accidents vs. injuries inflicted by a caregiver, a vital skill necessary for all involved in the care of children. Repeats Thursday from 10:15-11:30am.

Revenge Porn: A New Crime Takes Shape Across the Country

Shannon O'Brien

"Revenge Porn" has become a well-known problem around the country in recent years, and as media coverage has increased, so too has the interest of legislators around the country. The number of states that have passed laws criminalizing such behavior has exploded. This workshop will discuss what investigators and prosecutors need to know about what behaviors are covered by the laws, how to present them to judges and juries, and the likely constitutional challenges that will be faced. The presenter will explain how these crimes apply to minors, both as victims and perpetrators, and how these new laws may present a charging alternative to other offenses that may label minors as sex offenders for the rest of their lives.

Child Pornography Offending: Analysis of Data from NCMEC

Cierra Buckman, Jennifer Newman

In an effort to better serve law enforcement and inform the field of child pornography offending, the National Center for Missing & Exploited Children (NCMEC) has partnered with both the THORN Foundation and a team of expert researchers to analyze over a decade of victim and offender data. Designated as the national clearinghouse for child pornography cases, NCMEC's Child Victim Identification Program (CVIP) provides insight into trends in child pornography

offending, including differences in familial and non-familial cases, egregiousness of sexual content, and case initiation methods. This joint presentation will give an overview of NCMEC's Child Victim Identification Program as well as the research team's preliminary findings.

*Decision Point: How and Why Did Jackson Curtis Really Die?

Daniel Dawson, Amy Zacharias

This case study details the life and death of abusive head trauma victim, Jackson Curtis. During his short five-month life, Jackson was repeatedly subjected to physical abuse by his biological father who was ultimately convicted of First Degree Murder. This presentation will detail successful investigative and prosecutorial techniques where abusive head trauma is suspected, including interview and custody issues, preservation of key evidence, as well as overcoming complicated victim medical histories. We will review the testimonies of defense medical experts from England, Colorado and North Carolina and show successful strategies in how to handle such experts and refute their conclusions. Lastly, this presentation will discuss how a close-working relationship with your own experts makes all of the difference in obtaining a conviction for murder.

Repeats Thursday from 10:15-11:30am. LONE STAR A1

Does Race and Culture Matter When Handling a Child Sexual Abuse Case? An African American Victim's Perspective

JJ Staples

How does child sexual abuse differ in the African American community? Or, is the problem of child sexual abuse considered to be the same in other communities? This workshop will delve into the differences in the African American community from those of other communities. Although there will be many similarities and overlap of African American children that have been sexually abused, the participants will be charged with drawing their own conclusions. The primary purpose is to stimulate healthy discussions and understanding for the need of further research to develop inclusive policies, investigative strategies, and treatment needs. This is an exhibitor workshop by JJ Staples Enterprises, exhibiting on the 1st floor. Attendees will receive one entry (for each exhibitor workshop attended) to a tablet drawing, awarded Wednesday evening at the social event. You must be present to win.

Innovations in Incident Response for Crimes Against Children

Jason Sanchez

Yaana's Mobile Investigation & Data Acquisition System (MIDAS) meets multiple challenges that Law Enforcement Agencies face today. Current methods and processes for critical investigations are tedious and extremely slow, marred with manual paperwork causing miscommunication and inefficiency between the field investigators and the command staff. MIDAS provides a unique mobile application along with a fully integrated Command Center system. The MIDAS mobile application offers a user-friendly, intuitive, and a case-oriented approach to instantly capturing and organizing various types of data (photos, videos, voice recordings, and notes) using standard smartphones or tablets. The MIDAS mobile application distributes the captured data in real-time from the field to the MIDAS Command Center system, which then processes the field data instantly using advanced text, image, and video analytics capabilities, allowing analysts to rapidly review, create leads, and assign tasks to critical points of interest. MIDAS allows the incident response team to focus on the critical details of a case by eliminating the significant overhead of manual data gathering processes. This is an exhibitor workshop by Yaana Technologies exhibiting on the 1st floor. Attendees will receive one entry (for each exhibitor workshop attended) to a tablet drawing, awarded Wednesday evening at the social event. You must be present to win.

Law Enforcement in International Parental Child Kidnapping

Kendall Beels, Nathan George, Daniel Githens

The Office of Children's Issues in Department of State is the U.S. Central Authority under the Hague Convention on the Civil Aspects of Child Abduction. In this role, the State Department handles both incoming abductions to the U.S. and outgoing abductions from the U.S., and also has a branch dedicated to preventing abductions from occurring; law enforcement is crucial in all three of these capacities. Law enforcement is especially important in the Texas area due to the high volume of cases and proximity to the border. This presentation will review law enforcement's

key role in locating children and taking parents in the United States, the Office of Children's Issues collaboration with our colleagues in the Bureau of Diplomatic Security, and how law enforcement can assist us in preventing international parental child abduction.

DALLAS A3

Legal and Ethical Considerations of the Use of Social Media in **Criminal Cases**

Nathan Stump

We live in the age of social media - of oversharing, "liking" and "checking in." Facebook, Instagram, Twitter, Snapchat and other applications have become useful tools in the investigator's or prosecutor's arsenal, but there are pitfalls to be aware of when using social media in investigating and prosecuting criminal cases. The presenter, an Assistant United States Attorney for the Southern District of Illinois, will discuss relevant case law and recent examples of when "friending" someone can go wrong, or oversharing on your own social media outlets can potentially derail your case, or your career.

Screening and Treatment of Sexually Abused Children Using Evidence-Based Approaches (Part 1 of 2)

Jeff Wherry

This training session will present a transactional model for understanding the impact of sexual abuse and placement on children in the foster care system. Differential diagnosis and misdiagnosis will be addressed utilizing research and clinical findings. Evidence-based screening and assessment will be discussed with protocols offered as examples. Evidencedbased treatments will be reviewed with special

emphasis designing treatments in response to assessment findings. Implications for systems reform and program evaluation will be discussed. Learning objectives include: Understand the complexity of symptom presentation among sexually abused children; identify measures for screening and assessment which are reliable. valid, and normed: review evidence-based treatments and the use of assessments in treatment planning; understand the rationale and implementation for the core components of TF-CBT; explore opportunities for system reform and program evaluation in state systems. (The) Tactical Polygraph: Àn Interviewer Team Approach

Brett Banner, Brant Ungerer

This presentation illustrates the need for an integrated investigative team approach that includes both the investigators and the polygrapher. Defense attorneys, legal scholars and some judges view sentencing guidelines as draconian for failing to distinguish between producers of child pornography and web surfers who are described as social misfits. The presenters use the Butner study as a guide to overcome the obstacles child pornography (CP) offenders present during the interview. A multipronged team approach, incorporating an initial interview, an on-scene preview of computers, the polygraph and a follow-up interview reveal that a high percentage of offenders have engaged in contact offenses with minors. The presenters have over a 90% success rate with CP offenders admitting to sexual contact with a minor.

U.S. Marshals: Fugitive Sex Offender Investigations and Resources

Eric Mayo, Justin Vickers

This presentation will cover topics related to the U.S. Marshals Service and its efforts to work with state, local, and other federal agencies to identify, locate, and apprehend unregistered or non-compliant sex offenders. Specifically, the presenters will discuss the U.S. Marshals and the Adam Walsh Act, registered sex offender compliance checks, and the variety of resources available to state and local agencies through the National Sex Offender Targeting Center, the Sex Offender Tracking Team, and USMS district offices located across the United States. Male vs. Female Perspective on Prosecuting Child Abuse Cases

Amy Derrick, Jason Fine

Ever feel uneasy asking a 7 year-old girl to describe how her stepfather sexually abused her? Ever had a 14 year-old boy deny that he had sex with his teacher despite her confession? This workshop will focus on the unique strengths and weaknesses of prosecuting child abuses cases from a female and male DA's point of view. We will cover issues ranging from the initial meeting with the victim and their family, to conveying the victim's story as effectively as possible in front of a jury, to dealing with the post-verdict stress associated with these cases. The workshop will offer an open and honest forum to discuss how we can best utilize our strengths to more effectively provide justice for our victims.

CITY VIEW 8

Missing Kids: Resources for Law Enforcement

Sherry Friedlander, Sonia Lucero

Non-profit organizations with expertise in missing and abducted children's issues can bring a

wealth of resources for law enforcement agencies when a child goes missing. This session will provide an overview of the services offered by two members of the Center for Missing and Abducted Children's Organizations (CMACO), a coalition of effective non-profit organizations funded by the OJJDP. The presenters will detail how their non-profits collaborate with law enforcement, bringing in specialized capabilities to cases involving missing children. They will also describe the importance of each partner's role in these collaborations, how their agencies have worked successfully with law enforcement around the country, and make recommendations for agencies wishing to form these partnerships. AUSTIN 3

(The) Path of Child Sex Abuse Images: From Victimization to Restitution

Lauren Coffren

Child sexual abuse images have a lifecycle that touches representatives from agencies throughout the world as we work collaboratively to combat this problem. From the abuse and its documentation, to distribution and investigation, and ultimately to rescue and restitution. child pornography images form part of an ecosystem that involves hotlines, NCMEC, industry, and law enforcement. Come learn about the path these files take from a victim-centered standpoint, and how your help and participation in the "chain" is pivotal to rescuing children featured in child sexual abuse images. The role of NCMEC's CyberTipline and Child Victim Identification Program, how they interact and are connected, along with their resources for investigators, will be discussed in depth. Case studies will be used to highlight the concepts. DALLAS D2

Microsoft

PhotoDNA Cloud Service

Fighting the spread of child-sexual-exploitation-and-abuse images

Microsoft devotes extensive resources to help protect children—and, indeed, all individuals—online. We innovate and invest in technology; collaborate with others, and educate the general public about online risks. Our work has resulted in services such as PhotoDNA Cloud Service, which enables qualified organizations to automatically detect and report distribution of child-sexual-exploitation-and-abuse images. Use of PhotoDNA Cloud Service has become a leading practice in the technology industry's fight against online child sexual exploitation.

For more information and/or to register for the PhotoDNA Cloud Service, go to: www.microsoft.com/PhotoDNA.

For technical investigative support related to Microsoft technologies and services to law enforcement, please contact the Microsoft Law Enforcement Assistance Program Portal: leportal@microsoft.com.

Become a Google Jedi: Save Yourself from Information Overload

Lauren Wagner, Elizabeth Tow, Chris Armstrong

This computer lab will teach students how to effectively use Google to filter search results to relevant and useable information. Students will complete hands-on exercises using Google Boolean and advanced Operators. Open to all attendees regardless of technology skill level.

HOUSTON C

Child Protection System (CPS) Update

William Wiltse

This hands-on lab is designed for currently licensed and experienced peer-to-peer investigators and will showcase the newest functionality built-in to the Child Protection System (CPS). Topics include new dashboard "perspectives" to provide triage assistance, arrestee/victim input form, task-force performance report, CPS Desktop integration and more. A current CPS license is not required to participate in this lab, nor will a CPS license be issued upon completion of this training.

Repeats Thursday from 10:00-11:30am. STATE 1

ICAC Investigative Tools

Mike Duffey, Wayne Nichols

This lab is aimed at those individuals who are new to investigating online child exploitation cases. Covered in this class will be the set up and configuration of a host of tools recommended for conducting online undercover investigations. The tools that will be discussed include Chrome browser with Google Drive, Exif Scrubber, Exif editor, Opanda, Fireshot, and Google Image search.

Repeats Tuesday from 10:00-11:30am and Wednesday from 1:00-2:30pm.

HOUSTON B

IP GEO Location: Tools and Tactics

Greg Kesner

This lab will discuss some tools and tactics available for identifying the location of IP addresses. The class will start with a short review of IP addresses, NATs and Proxies. We will then discuss and demonstrate various tools and tactics that are available. We will discuss free tools, paid tools, and other social engineering techniques that are available. The participants should have a good understanding of IP addresses and general networking. The labs will be set up to have the participants utilize tools

to identify the location of IP addresses during the exercise portion of the lab.

Repeats Wednesday from 1:00-2:30pm and 3:00-4:30pm.

STATE 2

ShellBags Explorer/Registry Explorer: Understanding the Registry and Leveraging its Contents

Scott Schofield, Eric Zimmerman

A vast amount of data is available in the Windows Registry, to include timestamps, directory access history, and program execution. By leveraging these artifacts, investigators can quickly generate a very complete picture of a user's activity on a system in minutes, which can then be used in interviews, etc. Attendees of this lab will learn to use both ShellBags Explorer and Registry Explorer to streamline Registry examinations, both in the field and in the lab.

Repeats Wednesday from 8:00-9:30am and 10:00-11:30am.

STATE 3

Smartphone Forensics: Finding the App

Amber Schroader

Smartphones have become as important as any computer in the digital investigation process. Learning where to look for valuable data and tips and tricks that are needed for processing is crucial. This hands-on computer lab will use both iOS and Android devices on processing and working through the data they hold. This lab is open to non-law enforcement attendees. This lab is open to all attendees.

Repeats Tuesday from 8:00-9:30am and 10:00-11:30am.

HOUSTON A

Social Media and Investigative Tools

Mark Bowser, John Sedoski

This workshop will give participants an up-to-date understanding of how many of the popular social networking sites work, what information is available on these sites, and how to integrate this information into their investigations. This lab will provide participants with hands-on experience, and will familiarize them with open source and commercial tools that can be utilized within their investigation.

Repeats Tuesday from 1:00-2:30pm and Wednesday from 8:00-9:30am.

SAN ANTONIO B

10:30 AM - NOON CONT'D ON NEXT PAGE.

10:30 AM - NOON CONT'D

Utilizing Virtual Machines in ICAC Investigations

Don Lewis

There are advantages to using virtual computer machine environments in investigations. This presentation will introduce the virtual machine concept and its application in a variety of uses. These concepts include using virtual environments to store and share active case data, keeping several investigations in separate containers, booting directly to a virtual machine for undercover investigations and how to utilize virtual environment components and utilities built in to current operating systems used today. Open to all attendees regardless of technology skill level.

Repeats Tuesday from 3:00-4:30pm. STATE 4

Windows Live Triage -Collecting Volatile System State

Cynthia Gonnella, Mike Stern

In this lab students will be presented with a live computer system in which they will triage the system and collect the system state data in order of most to lease volatility according to NIST recommendations. This is helpful in cases where it is necessary to prove Internet connections are present or cloud services are being accessed during the upload or download of child exploitation materials while on the crime scene.

Repeats Wednesday from 10:00-11:30am. SAN ANTONIO A

1:30-3:00 PM

Advanced Cell Phone Interrogation Techniques: Cell Phone J-Tag Overview

Mark Bowser, John Sedoski

In this presentation we will be discussing advanced techniques used to retrieve data from cellular telephones and devices after traditional methods don't work. Specific topics to be covered: What to do with damaged or broken phones, password or Pin locked phones and the techniques for recovery of them, devices unsupported by traditional forensic tools, how to gain physical memory acquisition using J-Tag and other methods, tools needed for these advanced techniques, advantages and disadvantages of these techniques.

Repeats Tuesday from 3:00-4:30pm and Wednesday from 10:00-11:30am. SAN ANTONIO B

Finding the Hands On Offenders via IRC and Databases (Part 1 of 2)

Kevin Laws, Michael Sullivan

This lab will look at ways to identify the hands on offenders using chat and peer 2 peer clients. Students will learn the advantages of the tactical polygraph and searching for specific torrent values. They will also use the ICACCOPS and CPS databases to identify hands on offenders in the chat client MIRC, Internet Relay Chat using the Undernet and Dalnet.

Repeats Wednesday from 8:00-9:30am. HOUSTON B

Forensic Artifacts from Wireless Routers

Cynthia Gonnella, Mike Stern

In this lab students will connect to a router to locate and document wired and wireless devices connected to the router, the router's security settings, and other artifacts pertinent to Internet facilitated crimes. These skills are especially helpful when proving a device had access to a certain network and the Internet for downloading files in cases such as leeching off the neighbor's Internet for downloading child exploitation material through an unwitting wireless network. Repeats Wednesday from 1:00-2:30pm.

Forensic Child Abuse Imagery Recovery Tool

William Wiltse

SAN ANTONIO A

Designed for forensic computer examiners, this hands-on lab will utilize cutting-edge technology under development for recovering child abuse imagery from digital devices. Revolutionary in nature, this application will locate 100% of known content (even from unallocated space) and requires only minimal effort by the examiner. This translates into significant time savings for your ever-increasing forensics backlog. Lab is for demonstration only.

Repeats Thursday from 8:00-9:30am. STATE 1

Introduction to Windows Forensic Environment (WinFE) (Part 1 of 2)

Dean Chatfield, Chris Armstrong

The Windows Forensic Environment (WinFE) is a new bootable forensic environment. WinFE does not mount the suspect's hard drive, which will allow investigators to operate in a traditional Windows environment and run their preview tools against a suspect computer. This lab and lecture will provide the attendee with the skills and software necessary to create a WinFE image, which can be booted by either CD or USB device. Students will also have the opportunity to practice booting a "suspect computer" with

their WinFE and run preview tools. **Note: Due to Windows licensing rules, students will create their cd and USB thumb drives using a 30-day evaluation copy of Windows. Lab suggested for attendees with intermediate technology skills. Repeats Wednesday from 8:00-9:30am. STATE 4

Life Beyond Facebook (Part 1 of 2)

Elizabeth Tow, Lauren Wagner

This computer lab will introduce students to social media sites of investigative value, beyond the common thought of Facebook. Twitter searching will be introduced to allow searching for Twitter profiles, tweet keywords and hashtags, and even searching for tweets from a particular latitude and longitude. These Twitter searching techniques will include both standard and hidden Boolean operators, ensuring that investigators have access to the best possible evidence. With 55 million photos being shared daily, Instagram is becoming a major player in the social networking world. In addition to searching Instagram through Google (using techniques similar to Facebook), participants will also be introduced to third-party resources that can be used to search Instagram all without having an Instagram account. Instagram searching for profiles, keywords, hashtags, and geographical information will all be covered. Other social networking websites will also be addressed, such as Vine, Ask.fm, Kik messenger, as well as others. Open to all attendees regardless of technology skill level.

Repeats Tuesday from 1:00-2:30pm. HOUSTON C

osTriage: Improving Workflow from the Field to the Lab and Beyond (Part 1 of 2)

Jeff Rich, Scott Schofield, Eric Zimmerman

This lab covers osTriage version 2, its capabilities, and how to leverage it in a multitude of ways to find relevant data faster. By getting answers to investigative questions in minutes, not months, osTriage helps move a case forward on both the investigative and prosecutorial fronts. Attendees will learn the advantages of using osTriage in a live response capacity including real time detection of encryption, user searches, device history, registry information and much more.

Repeats Tuesday from 8:00-9:30am. STATE 3

So You Want To Be A Cyber Sleuth? (Part 1 of 2)

Jim Tanner

This lab is for those who always wanted to try solving a crime through digital evidence. No

experience necessary, but participants should know how to use Windows® and Google®. In part one, we will train you on several tools you will use to solve a crime in part two. Part two is a tongue-in-cheek mystery that can only be solved through digital evidence. Come try your skills, have some fun, and learn a bit about digital evidence in crimes. Open to all conference attendees. Must participate in both part one and part two.

Repeats Tuesday from 1:00-2:30pm and Wednesday from 1:00-2:30pm.

HOUSTON A

Using Google in Your Investigations (Basic)

Nirupa Calvin, Denise Smith

This basic level lab will give investigators insight and valuable tips to conduct online investigations. The instructors will review investigative techniques and tools using many of Google's services (Search, Image Search, Google Account, Gmail, YouTube, Blogger) that can be used to supplement your current investigative process. Get ready to learn by doing! This lab is open to all attendees.

Repeats Tuesday from 1:00-2:30pm and Wednesday from 8:00-9:30am.
STATE 2

3:30-5:00 PM

Cyberbullying: Our Children, Our Problem

Mark Bowser, John Sedoski

This presentation is an overview of NW3C's new web education service that is an easy and effective way to educate children, parents, teachers, social workers, police officers and bystanders giving solutions on the identification and remedy for cyberbullying of today's children. Discussion topics will focus on current issues affecting children who are active on the Internet and encountering or participating in Cyberbullying, along with a demonstration of how to access the NW3C web education portal. This lab open to all attendees.

Repeats Tuesday from 8:00-9:30am and Thursday from 8:00-9:30am.
SAN ANTONIO B

Finding the Hands On Offenders via IRC and Databases (Part 2 of 2)

Kevin Laws, Michael Sullivan
Repeats Wednesday from 10:00-11:30am.
HOUSTON B, See pg. 54 for description

Intro to Macs

Mike Duffey

This lab is aimed at those individuals who have never used an Apple computer before or are brand to new to the Apple OS. Covered in this block of instruction will be the comparison between the PC world and the Mac world along with using virtual machines on a Mac and the iOS applications, iCloud, iPhoto, disk utility, network tools and various Mac hot keys and short cuts. This lab is open to all attendees. Repeats Tuesday from 1:00-2:30pm.

Introduction to Windows Forensic Environment (WinFE) (Part 2 of 2)

Dean Chatfield, Chris Armstrong
Repeats Wednesday from 10:00-11:30am.

HOUSTON A.

See pg. 54 for description

Using Google in Your Investigations (Advanced)

Nirupa Calvin, Denise Smith, Cathy McGoff

If you have attended the basic Google lab, or are familiar with Google services, this advanced level workshop will provide you with additional insight and valuable tips to conduct online investigations. The instructors will review investigative techniques and tools using many of Google's services (Google+, AdWords, AdSense, Wallet, Analytics, Voice) that can be used to supplement your current investigative process. Get ready to learn by doing! This lab is open to all attendees.

Repeats Tuesday from 3:00-4:30pm and Wednesday from 10:00-11:30am. STATE 2

Windows Event Log Artifacts

Cynthia Gonnella, Mike Stern

In this lab students will use Windows Native Event Viewer to import saved event logs for processing to collect artifacts pertinent to computer usage in criminal cases. These skills assist an investigator in determining when programs were installed successfully, what users were logged in during a specific time frame, what user changed certain system settings, and several other Internet related events such as the IP address associated to a specific machine.

Repeats Wednesday from 3:00-4:30pm. SAN ANTONIO A

Android Cell Phone Emulator: Bluestacks & Apple Emulator Solutions

Mike Duffey, Mike Sullivan

This lab will teach students how to use the PC based Android emulator, Bluestacks. This emulator allows for law enforcement officers to emulate an android mobile device using the Google play store on a windows computer thus filling the void when law enforcement needs the ability to use apps such as Kik and other apps for the collection of digital evidence. Also discussed will be alternative solutions for Apple based products.

Repeats Wednesday from 3:00-4:30pm. HOUSTON B

Basic Undercover Chat Investigations (Part 1 of 2)

Jesse Crowe, James Valley

This lab will cover basic undercover chat investigations. Presenters will discuss the tools needed to set your lab up and some of the considerations to think of. Students will be able to set computers up and troll through some specific chat sites on the Internet and learn common ways to chat to potential predators. Students will come away with the basic knowledge and capability to work undercover chat investigations. *Repeats Thursday from 8:00-9:30am.*

STATE

Cyberbullying: Our Children, Our Problem

Mark Bowser, John Sedoski

Repeats Thursday from 8:00-9:30am. SAN ANTONIO B, See pg. 55 for description

More Data, More Problems or More Data, More Possibilities

Jim Cole. Johann Hofmann

This computer lab will discuss how to avoid the risk of getting bogged down by millions of digital image and video files and instead get the time and tools to focus on connecting leads, identifying victims and perpetrators and solving crime. The attendees will get hands-on experience of using the latest features of NetClean Analyze DI, software specifically designed to manage, review and analyze visual data and create intelligence from visual big data. Students will learn how Analyze DI massively reduces caseload and case turnaround time, and actively supports you to find relationships and connections between digital files to dig deeper into case material. They will also learn more about the strengths of integrating Analyze with other tools to

improve workflow, and the full potential of the Net-Clean Analyze platform.

Repeats Thursday from 8:00-9:30am. STATE 2

Must-Have Technology Tools for Investigating Crimes Against Children (Part 1 of 2)

Chris Armstrong, Elizabeth Tow, Lauren Wagner

Using technology to investigate crime is challenging because there are so many different ways to turn and countless products to use—this lab demonstrates some of the tools investigators should focus on. Attendees see tools that can help accomplish a wide range of tasks, including pulling out critical data from photos, using a desktop computer to simulate a tablet, and "faking" a device's GPS to gain access to information that otherwise would have been unavailable. Attendees see how to download, install, and use portable apps in their investigations. This lab also covers resources attendees can pass along in their community safety presentations and other work with victims. **Those who bring a thumb drive with at least 3 GB of free space can copy our portable apps suite to take home. Lab open for all attendees with beginner technology skills.

HOUSTON C

osTriage: Improving Workflow from the Field to the Lab and Beyond (Part 1 of 2)

Jeff Rich, Scott Schofield, Eric Zimmerman STATE 3, See pg. 54 for description

Recovering Volatile Data

Dean Chatfield, Don Lewis

This lab and lecture will address the collection of "Volatile Data" in the form of a computer's Random Access Memory, or RAM. Volatile data is information, which Law Enforcement has historically overlooked. The presenters will use the free FTK Imager software to conduct a RAM DUMP, and then they will use a free demonstration version of FTK to open and view the contents of the Ram Dump. Open to all attendees regardless of technology skill level.

Smartphone Forensics: Finding the App

Amber Schroader

Repeats Tuesday from 10:00-11:30am. HOUSTON A, See pg. 53 for description

Timelining Artifacts in Criminal Cases

Cynthia Gonella, Mike Stern

In this lab students will use the Windows Native Registry Editor to navigate through the Windows Registry identifying and collecting artifacts pertinent to criminal cases. Important artifacts include computer name and system settings, operating system and program settings, and user specific settings. The user specific artifacts are particularly helpful to the investigator in proving what users opened certain files, folders, and programs in exploitation cases.

Repeats Thursday from 8:00-9:30am. SAN ANTONIO A

10:00-11:30 AM

Basic Undercover Chat Investigations (Part 2 of 2)

Jesse Crowe, James Valley
Repeats Thursday from 10:00-11:30am.
STATE 1, See pg. 56 for description

Cell Phone Mapping with Perphound

Mark Bowser, John Sedoski

This lab is for officers, investigators, and analysts who encounter cell phone evidence, and includes the acquisition and analysis of information external to the phone. Class concepts include instruction on how to request, read. and analyze Call Detail Records obtained from cellular providers and plot cellular site locations to determine the location of a suspect's phone during a given time frame. Students will be shown techniques for tying all this information together for case reports and/or courtroom presentations. No special hardware or software is required, just a new knowledge-base to apply to cell phone cases. This lab focuses heavily on analysis and, as such, a strong working knowledge of Microsoft® Office is highly recommended.

Repeats Wednesday from 1:00-2:30pm. SAN ANTONIO B

Connecting the Dots Between Multiple Cell Phones

Wil Hernandez

You've dumped cell phones belonging to a suspect, a victim, and a couple of witnesses. Who talked to whom? Who texted who? Who are their common contacts and who was at the same place at the same time? In this lab you will learn how to perform on-the-spot link analysis and visualize connections within the messages, calls, contacts, app data and geo-data between multiple mobile devices using XAMN. After going through the extraction process and analysis

of a device in XRY, students will learn how to give their cell phone dumps meaning by correlating the data amongst multiple devices and matching all common data and direct communications between devices via instantly plotted connection diagrams, timelines, and mapping of geo-data.

Repeats Wednesday from 3:00-4:30pm and Thursday from 10:00-11:30am. STATE 2

Forensic Artifacts from SQLite Databases

Cynthia Gonnella, Mike Stern

Students will use SQLite database browsers to open and run queries against SQLite databases. This is helpful for obtaining Firefox and Chrome Web Browser histories, parsing iDevice records, GPS history, and various other SQLite based applications and devices.

SAN ANTONIO A

ICAC Investigative Tools

Mike Duffey, Wayne Nichols Repeats Wednesday from 1:00-2:30pm. HOUSTON B, See pg. 53 for description

Tools for the Toolbox

Dean Chatfield, Don Lewis

This lab will introduce the investigator to a variety of free software tools to help them with their high tech investigations. The presenters will cover on scene triage tools to preview a network, recover WPAVWEP network passphrases and look for encryption or virus infection. They will also cover common everyday tools to deal with file compression and extracting data from iso files and creating DVDs. Open to all attendees regardless of technology skill level.

STATE 4

1:00-2:30 PM

(The) Adult Undercover Persona and Introduction to Internet Relay Chat (Part 1 of 2)

Kevin Laws, Michael Sullivan

This lab will provide a basic overview of IRC to include navigation and the logging function of the IRC client (mIRC). It will discuss building you IRC undercover persona and provide an introduction to the various chat rooms dedicated to the sexual exploitation of children. The presentation will also include tips about chatting and building your investigation based on experience. Finally, tips for court presentation will be provided, including information on presenting your evidence and jury considerations.

Repeats Thursday from 8:00-9:30am. HOUSTON B

Collecting Windows Registry Artifacts

Cynthia Gonnella, Mike Stern

In this lab students will use the Windows Native Registry Editor to navigate through the Windows Registry identifying and collecting artifacts pertinent to criminal cases. Important artifacts include computer name and system settings, operating system and program settings, and user specific settings. The user specific artifacts are particularly helpful to the investigator in proving what users opened certain files, folders, and programs in exploitation cases.

SAN ANTONIO A

Combating Child Exploitation Material with Project VIC Tools (Part 1 of 2)

Richard Brown, Jim Cole

This lab will walk through the Project Vic ecosystem of tools and how the Project Vic Hubstream hashing agent provides the VIC's hash records to end users. Participants will get hands on experience with NetClean Analyze, setting up databases, Acquiring cases, using technologies such as PhotoDNA and Image Vector Hashing to reduce workload. Students depart with access to the robust Project VIC hash sets and will be exposed to the other tools able to leverage the hash set or the VIC Data Model such as: Magnet Forensics IEF, Blue Bear LES, Zuiz Forensics, X-Ways, Autopsy, NUIX, Black Bag and other tools participating in the Project Vic ecosystem.

Repeats Wednesday from 8:00-9:30am.

1:00-2:30 PM CONT'D ON NEXT PAGE.

1:00-2:30 PM CONT'D

Intro to Macs

Mike Duffev STATE 1, See pg. 55 for description

Introduction to Wireless Geolocation

Don Lewis, Dean Chatfield

This course of instruction will introduce the investigator to the wireless network environment. Students will be taught how to geolocate a wireless network, then account for devices on the network. Documentation of network evidence available to the investigator will be covered. Lab suggested for attendees with intermediate technology skills. STATE 4

Budget Friendly Forensics (Part 1 of 2)

Jeff Shackleford

Unfortunately in today's age many agencies are still unable to fund computer forensic programs due to high costs associated with commercial software and the powerful machines they require to efficiently work. Is your budget preventing you from processing your own digital evidence? What if this presenter showed you a tool that could image hard drives, dump RAM, data carve, crack passwords, validate tools, decode the registry, prefetch, MRUs, cookies, event logs (and basically everything else you'd expect from a commercial forensic tool), and even reconstruct RAIDs? What if you could use this tool both in the lab and in the field from a thumb drive? Come see how cheap forensics can really be when you have the right tools.

STATE 2, See pg. 57 for description

Facebook Investigations: Searching, Saving and Addressing Legal Considerations (Part 1 of 4)

Justin Fitzsimmons, Elizabeth Tow, Lauren Wagner

This workshop will provide students with an overview of social networking websites and how these websites can be useful to investigations. Students will also learn how to set up an investigative social networking account to search for information. This workshop will teach participants how to effectively search the social networking website, Facebook, both using the internal search features on graph search as well as using Google Advanced Operators. This workshop will cover techniques on capturing profiles for evidentiary purposes and well as mapping tools for friend networks. Legal considerations for social media sites will be discussed including what legal steps must be taken to correctly seize and search information from social networking sites. The role of Federal privacy statutes will be explained. Additionally, hypotheticals will be used to demonstrate whether a defendant's status as a suspect or following an arrest might affect how information is gathered. Open to all attendees regardless of technology skill level.

Early Detection of Physical Child Abuse Training for First Responders and Medical Professionals

Dyann Daley

The medical community fails to recognize or report early signs of child maltreatment an astonishing 50-75% of the time. As physical abuse tends to escalate over time, the recognition of these early findings is critical for prevention of fatal physical abuse. Can you spot the signs?

Join us for an interactive course designed for first responders and the medical community. Included are virtual simulated patient encounters to test and improve your ability to recognize child maltreatment. This lab is open to all attendees. Repeats Wednesday from 3:00-4:30pm and Thursday from 10:00-11:30am.

SPEAKER BIOGRAPHIES

Speakers are listed alphabetically by last name. Visit cacconference.org for full biographies.

AMY ALLEN is currently a Forensic Interview Specialist for the Department of Homeland Security (DHS). With DHS she works cases involving child exploitation, human trafficking, and human rights violations. Amy lectures frequently to law enforcement, children's protective services, judges, and the community on child exploitation and human trafficking.

CHRISTOPHER ANDERSON is the executive director of MaleSurvivor, a nonprofit organization that provides male survivors of sexual abuse and their loved ones hope, healing, and support. He speaks about the unique challenges male survivors face, and about the need for greater partnership between professionals and survivors across disciplines.

DEBRA ANDERSON is the Director of Connections, a mental health program dedicated to early intervention services for children and families at the Project Harmony Child Protection Center in Omaha, Nebraska. She and her staff coordinate referrals for mental health services from schools and medical clinics, provide evidence based training for mental health professionals, and work to increase community capacity in serving children and families in need.

CHRIS ARMSTRONG is a High-Tech Crime Training Specialist in the High-Tech Crime Training Services department of SEARCH, where he coordinates and provides training on high-tech crime investigations and forensics. He is a national expert on investigating peer-to-peer networks that facilitate the distribution of child pornography. Chris served in law enforcement for 27 years before joining SEARCH.

SALEH AWADALLAH has been an attorney since 1994, and joined the Prosecutor's Office in 1998. As supervisor of the Major Trial Unit, he is responsible for the intake, charging, supervision, and assignment of all homicide, including capital murder, cases and all felony sexual assault and child abuse cases in Cuyahoga County.

MICHAEL BACHMANN is Associate Professor of Criminal Justice, the department's Internship Director, and the Editor-in-Chief of The Journal of Technology and Crime. His research spans all facets of the intersection of high technology and the law, ranging from computer hacker subcultures and ethics to the facilitation of

crime investigations through geospatial mapping applications.

AMY BAILEY is the State Child Fatality Review Coordinator at the Texas Department of State Health Services. Before returning to Austin, Amy spent seven years working at the Injury Prevention Center of Greater Dallas as the Dallas County Child Death Review Team Coordinator. She recently collaborated on a manuscript published in the journal Injury Prevention on Truancy and Injury-Related Mortality.

BRETT BANNER has been a Special Agent with the Federal Bureau of Investigation for the past 15 years and investigates Violent Crimes Against Children, including the possession, distribution, production and advertisement of child pornography. He is currently assigned to the Milwaukee Division Child Exploitation Task Force.

MICHAEL BARKER has been a Special Agent with the FBI since 2008 and primarily works Crimes Against Children matters. Prior to joining the FBI, he worked as a clinician for the Department of Children and Family Service in Idaho where he provided behavioral analysis, counseling, and analytical services forchild protection and endangerment cases, with a primary focus on endangered youths.

JASON BARRY is the Trust and Safety Manager for North America at Facebook. He is responsible for managing law enforcement relationships, including incoming requests and outgoing case referrals, as well as law enforcement security policy matters. Jason was a Special Agent with Homeland Security Investigations prior to joining Facebook.

JACQUELINE BEAUCHERE is the Chief Online Safety Officer at Microsoft. She is responsible for all aspects of Microsoft's online safety strategy, including cross-company policy creation and implementation, influence over consumer safety features and functionality, and communications to and engagement with a variety of external audiences.

KENDALL BEELS is a ten-year veteran and Special Agent with the Diplomatic Security Service. She is currently assigned to the Criminal Investigative Liaison Branch where she is the liaison agent who is assigned to Consular Affairs-

Office of Children's Issues and to the National Center for Missing and Exploited Children. She is a Task Force Officer with the FBI's Violent Crimes Against Children Section-Major Case Coordination Unit.

DONA BELLOW is a Legal Assistant who joined Google a year ago and has been working as a Child Safety Lead on the Legal Removals team, which handles reviews of child sexual abuse imagery and reporting to NCMEC. Dona has been involved in tooling and policy improvements of workflow for reviewers as well as wellbeing initiatives.

NAKISHA BIGLOW is the Forensic Interview Team Lead for the Dallas Children's Advocacy Center where she has been for the past 6 years. Nakisha and has conducted over 2,000 forensic interviews of children and has received over 1,000 hours of training in the child abuse field. She has also testified in both civil and criminal courts as a fact and expert witness of child sexual abuse.

KELLY BLACKBURN is an assistant district attorney in Montgomery County, Texas where he serves as chief of the Trial Bureau. In 2010, he joined the Montgomery County District Attorney's Office, where he has served as a chief prosecutor in multiple district courts, as chief of the Public Integrity Division, and in 2014 he was promoted to his current position.

KAREN BLACKWELL is currently employed as a Child/Adolescent Forensic Interviewer with the FBI. She is primarily assigned to the South Central Region of the United States providing consultation and interviews for FBI agents, Assistant United States Attorney's and other federal and state law enforcement agencies. Previously, Karen led the Denver Children's Advocacy Center's Forensic Interview and Evaluation Program.

ALL HANDOUTS ARE AVAILABLE ON DROPBOX.

The access link and password were emailed before the conference.

If you did not receive this email, please visit the Help Desk for information on accessing handouts.

TERRI BOTTERBUSCH is a Special Agent with Homeland Security Investigations (HIS) in Tampa, Florida. She has investigated child exploitation crimes since 2006. Her investigations focus on child pornography production, distribution, and possession. She has been involved in numerous ICAC traveler operations and her various undercover personas continuously troll the Internet for predators interested in engaging in sex with children.

MICHAEL BOURKE serves as the head of the Behavioral Analysis Unit for the U.S. Marshals Service. Prior to joining the Marshals Service he worked as a clinical psychologist for two sex offender treatment programs within the federal prison system. A graduate of DoDPI, he has conducted several hundred polygraph examinations with sex offenders.

MARK BOWSER has worked for NW3C since March of 2008, bringing with him over 30 years of law enforcement experience and over 10 years of computer forensic investigative experience. He is responsible for supporting the U.S. Great Lakes region of NW3C and is providing support and instruction for all of NW3C's offerings.

JOHN BRADLEY, a former police officer, is the founder, CEO, and Chief Technical Officer of Si-Quest Corporation, specializing in the research and development of leading Internet forensic software tools. John is the creator of Internet Examiner® Toolkit, featuring FaceDNA™ biometric facial recognition, a court approved and industry recognized investigative toolset that is fast becoming the tool of choice by law enforcement.

FREDERICK BRAGG is a Special Agent and 24-year veteran of the FBI currently assigned to criminal matters at the Syracuse, NY, Resident Agency. He is also the Primary NCAVC coordinator for the Albany Division and a firearms instructor. His previous temporary duty assignments include Legat Ottawa, Washington, DC, and Bagram, Afghanistan.

LAWRENCE BRAUNSTEIN is a partner in the law firm of Braunstein & Zuckerman, Esqs, in White Plains, New York, and an Adjunct Professor of Law at Hofstra University Law School. His practice focuses on matrimonial and family law and related criminal litigation. Since 1999 he has served on the faculty of the NYPD Sex Crimes and Child Abuse Investigation Course.

STACEY BRITTAIN is a Licensed Clinical Social Work Supervisor in Therapy Services at The Harris County Children's Assessment Center (CAC). As a therapist she provides individual, group, family, and play therapy to victims of child sexual abuse. She co-facilitates therapeutic services for domestic human trafficking victims through the development of Project LIBERTY.

RICHARD BROWN joined the International Centre for Missing & Exploited Children-ICMEC and serves Project VIC as the Project Coordinator. Project VIC is an international image video hash sharing initiative that has allowed investigators to swiftly process hundreds of images and videos from seized hard drives on criminal cases in order to identify and rescue these new potential victims.

SYLVIA BRUNI is the executive director of the Children's Advocacy Center of Laredo-Webb County. The Center has gained recognition throughout the community as a leader in protecting and healing children. The CACs crowning achievement is radKIDS LAREDO, a safety education and violence prevention program that is steadily growing systemically across the community and surrounding areas.

CIERRA BUCKMAN is the Senior Research Program Coordinator in the Moore Center for the Prevention of Child Sexual Abuse at Johns Hopkins Bloomberg School of Public Health. She currently coordinates multiple national research projects, ranging from a survey of the collateral consequences of juvenile sex offender registration and notification policies to a preliminary study of young adults living with attraction to minors.

IRISH BURCH serves as the Chief of Partner Operations at the Dallas Children's Advocacy Center where she is directly responsible for overseeing the forensic interview team and coordinating and facilitating relationships with 30 partner agencies. Her first-hand knowledge in investigating cases, interviewing children, and working with a variety of disciplines, assists her in effectively managing the needs of the multi-disciplinary team.

MARY-ANN BURKHART is the director of the National Center for Prosecution of Child Abuse. She is a career prosecutor with more than 20 years of courtroom experience in the area of abuse and neglect of special victims, from child and elder, in Miami, Florida and Baltimore, Maryland.

GUS BURNS is a Detective Sergeant with the St. Lawrence County Sheriff's Office, Canton, New York where he is assigned to investigate Major Crimes. He supervises criminal investigations at the Sheriff's Office and instructs in Firearms, Miranda rights, and Sex Crimes at the Regional Police Academy. Gus is a Child Forensic Interviewer in sex crimes and abuse of children.

RACHEL BURRIS is an Assistant District Attorney in the Dallas County District Attorney's Office in the Child Abuse Division. Currently, her responsibilities include coordinating physical and sexual abuse investigations for all of Dallas County law enforcement as well as acting as the liaison between the District Attorney's Office and the Dallas Children's Advocacy Center.

ROBYN BUSBY is a detective with the Plano Police Department and has been in law enforcement for 19 years. For the past three years, she has been assigned to the Crimes Against Persons Unit. Robyn has investigated numerous cases involving murder, kidnapping, robbery, and assault offenses.

BEN BUTLER is the Director of Security Operations for GoDaddy.com, where his team members have become experts and industry leaders in dealing with all forms of network abuse including spam, phishing, hacking, copyright violation, child exploitation issues, illegal pharmacies, and the network security problems that often accompany such abuses.

NIRUPA CALVIN is an investigator in Google's Trust and Safety team that is responsible for the protection of Google revenue, users, and brand. Her area of expertise is child safety investigations, wherein she investigates cases where it appears a child may be in immediate danger or if a user's conduct appears to be that of a producer who has access to children.

ROGER CANAFF is a widely known child protection and anti-violence against women advocate, legal expert, author, and public speaker. A career Special Victims prosecutor, he has devoted his legal career to the eradication of violence against women and children. He has worked as a prosecutor in Alexandria, Virginia, the Bronx, New York, and as an Assistant Attorney General with the state of New York as well as a Senior Attorney with the National District Attorneys Association, Child Abuse Unit.

LAURA CARROLL joined the National Center for Missing & Exploited Children more than eight years ago and is currently the Supervisor of the Child Sex Trafficking Team. He has investigated approximately 15 cases of medical child abuse since 2009, including six cases, which resulted in arrest and prosecution of the offender.

MELINDA WESTMORELAND is a prosecutor with the Tarrant County District Attorney's Office in Fort Worth, Texas. She has been with the District Attorney's Office for more than eight years. Melinda is assigned to the Special Victims Unit, which specializes in the prosecution of child sexual and physical abuse, child homicides and violent crimes to the elderly and disabled. She has provided training to prosecutors, law enforcement, Child Protective Services, and medical personnel.

STEVE WHALEN is the CEO and founder of SUMURI, a leading provider of training and services relating to digital evidence and computer forensics worldwide. Steve has developed and delivered forensic training to thousands of investigators and examiners around the world. Steve is also the developer of the successful Macintosh Forensic Survival Courses and developer of the popular PALADIN and RECON forensic software.

JEFF WHERRY directs the Research Institute of the Dallas Children's Advocacy Center. The Research Institute provides leadership on the effectiveness of interventions, investigations, long-term outcomes, and prevention services for child abuse victims. Jeff was the CEO of the St. Louis CAC, where he was involved in outpatient work with sexually abused children and research.

CARMEN WHITE is an Administrative Chief Prosecutor at the Dallas County District Attorney's Office. In this role, she supervises the Child Abuse Division, the Animal Cruelty Unit as well as 12 felony court prosecutors. She served in the Child Abuse Division for over ten years where she prosecuted crimes against children. Carmen speaks nationally on issues of child abuse.

JIMMY WIGGINS is an investigator with the County Attorney's Office in Montgomery County, Texas where he assists in the investigation and prosecution of juvenile crime. In this role, Jimmy has helped prepare cases involving juvenile sexual offenders and routinely works with law enforcement from the inception of a case through the final prosecution.

AUTUMN WILLIAMS is the Curriculum Specialist at the Dallas Children's Advocacy Center. In this educational role she focuses on preventing child abuse by developing child protection curriculum and providing professional training and consulting to child-serving organizations. The curriculum previously available only locally is now nationally-relevant and available through the launch of the DCAC Training Center.

ERIN WILLIAMSON is the Survivor Support Coordinator for Love146. Within this role, Erin sits on the New Haven MDT and has led the development, implementation, and operation of Love146's aftercare program for child survivors of human trafficking. She has more than 10 years of direct service, program management, and applied research experience in the fields of social service and criminal justice.

WILLIAM WILTSE has been a police officer for the past 23 years and is sworn with the Palm Beach County Sheriff's Office. He is currently employed by Child Rescue Coalition in Boca Raton, Florida, where he directs the development of software tools targeting those who create and disseminate child pornography over the Internet. He specializes in software development and conducts forensic computer exams for cases involving child sexual exploitation

GERI WISNER is a citizen of the Muscogee (Creek) Nation and a former U.S. Marine. Currently she is the Tribal Prosecutor for the Pawnee Nation and Wyandotte Tribe of Oklahoma, the Executive Director for the Native American Children's Alliance (NACA) and a partner with the Allen & Wisner law firm. Along with her prosecutorial duties, Geri presents nationally, addressing criminal justice issues specific to Indian Country.

RICHARD WISTOCKI is a detective and 25-year veteran of the Naperville Police Department. For the past 19 years he has been assigned as an Internet Crimes Investigator. He is responsible for the investigation of child exploitation, Cyberbullying, computer tampering, harassment through electronic communication, and computer fraud. Richard is a member of the U.S. Secret Service Computer Crimes Task Force.

ALI WOLF is the Training and Technical Assistance manager at Girls Educational and Mentoring Services (GEMS) in New York City. She manages curriculum development, facilitates trainings, and provides technical assistance to legal professionals, law enforcement and social service professionals on the issues of commercial sexual exploitation and domestic trafficking of youth.

CHRISTINE WOMBLE is an Assistant District Attorney with the Appellate Division of the Dallas County District Attorney's Office. Christine received her Texas law license in 2005. She is also licensed in the Supreme Court of the United States. As an appellate prosecutor, Christine handles direct appeals and post-conviction litigation in capital and non-capital cases.

MARK YARBROUGH was elected to five terms as the Lamb County District Attorney. He served for 20 years, prosecuting everything from death penalty cases to sexual assault and domestic violence cases. At the end of 2012, Mark retired as District Attorney and travels the country giving motivational speeches regarding Burnout. He has also written and been published on the subject of Burnout.

AMY ZACHARIAS is an assistant county attorney in the Pottawattamie County Attorney's Office and has more than 11 years of experience in criminal law as a defense attorney and a prosecutor. She is responsible for felony and misdemeanor child abuse prosecutions along with kidnappings, felonious assaults, and arsons.

SEAN ZADIG is the Senior Manager of the Yahoo E-Crime Investigations Team, located in Sunnyvale, CA. Sean and his team investigate a variety of abuse of Yahoo services or harm to Yahoo users, including child abuse material. He was previously an investigator at Google, and a federal agent with the NASA Office of Inspector General for seven years.

ERIC ZIMMERMAN is an FBI Special Agent assigned to the cyber squad of the Salt Lake City FBI field office where he has been investigating child pornography and computer intrusions since 2008. He is a member of the Utah ICAC and has provided training and assistance to dozens of local, state, federal, and international law enforcement agencies. Eric has developed several computer programs to aid in the investigation and prosecution of child exploitation matters that are used around the world.

AccessData

AccessData Group has pioneered digital forensics and litigation support for more than 20 years. Over that time, the company has grown to provide both stand-alone and enterprise-class solutions that can synergistically work together to enable both criminal and civil eDiscovery of any kind, including digital investigations, computer forensics, legal review, compliance, auditing and information assurance. More than 130,000 customers in law enforcement, government agencies. corporations and law firms around the world rely on AccessData software solutions, and its premier digital investigations products and services. AccessData Group is also a leading provider of digital forensics training and certification, with its AccessData Certified Examiner® (ACE®) and Mobile Phone Examiner Certification AME programs.

2ND FLOOR, BOOTH 12

ADF Solutions, Inc.

ADF Solutions, is the market leader in media exploitation and digital forensic triage tools used for scanning computers and peripheral devices. Leveraging an intelligence-led approach, these easy-to-use tools rapidly extract actionable intelligence to help identify and capture suspects who are a threat to public safety or national security, and accelerate prosecution of criminals. These proven tools are actively used by field operatives in defense, intelligence, law enforcement, border security, and other government agencies worldwide.

1ST FLOOR, BOOTH 51

Airbnb.com

Founded in 2008 and based in San Francisco. Airbnb.com is a trusted online community marketplace for people to list and book unique accommodations around the world. Airbnb is a global company that connects people to unique travel experiences in more than 34,000 cities and 190 countries. Come by Airbnb's booth to meet the Company's law enforcement liaison, learn how Airbnb responds to data requests from law enforcement, and pick up some Airbnb goods. Airbnb supports law enforcement, and we look forward to meeting you. Airbnb.com is a pioneer in the Sharing Economy, which is built on the centuries old practice of sharing assets. This economy has come on so powerfully that regulators and economists are still struggling to understand its impact. But one thing is clear: many of these companies have people engaging in behaviors considered risky by some groups, including law enforcement. People are hopping into strangers' cars and welcoming them into their spare rooms. The majority of these interactions between strangers are problem free, but human behavior is unpredictable. This is when Airbnb works with law enforcement.

1ST FLOOR, BOOTH 70

Atola Technology

Get more evidence faster with the first and only forensic data acquisition tool that works with both good and damaged media. Atola Insight Forensic can work with drives so damaged no other device can even detect them. Atola created Insight in collaboration with law enforcement agencies, private investigators and forensic experts from around the world. Not only is Insight Forensic the most powerful and guickest imager available, it is so simple to use. Very little, or no training, is required to be up and running in minutes. We have completely automated the entire hard drive recovery process: diagnosing, imaging and data recovery. Come visit our exhibit booth for a demonstration to see why so many forensic professionals rely on Insight for their most important work.

2ND FLOOR, BOOTH 18

Attorney General of Texas Crime Victim Services Division

The Crime Victims' Compensation Program is dedicated to ensuring that victims of violent crime are provided financial assistance for certain crime related expenses. The fund can help eligible victims pay for medical or counseling bills or cover the cost of a funeral for a loved one who has been killed.

1ST FLOOR, BOOTH 58

The Behavioral Research and Instruction Unit (BRIU - 3)

The FBI's Behavioral Research and Instruction Unit 3 (BRIU-3), formally known as the FBI's Behavioral Analysis Unit 3, provides behaviorally-based operational support and training to law enforcement agencies involved in the investigation of crimes against child victims. BRIU-3 staff members also conduct research intended to gain a better understanding of the motivations and behaviors of offenders who target child victims. Insights gained through BRIU-3 research are refined into investigative suggestions and techniques, which are used in support of BAU-3's operational and training missions.

1ST FLOOR, BOOTH 86

Berla

Since 2008, Berla has been a pioneer in the digital forensics field. With its origins in maritime, aviation, and handheld GPS devices, Berla's repertoire has expanded to include mobile devices, media exploitation, vehicle system forensics and vehicle cyber security. Located in the DC area, Berla is made up of a small, forward-thinking team with varied skill sets and backgrounds. The company has strong ties to the Department of Defense, Homeland Security and Law Enforcement communities, and is developing roots within the commercial realm. Berla strives to educate and support investigators during a time of vehicle cyber security uncertainty. Vehicle forensics is a newly emerging field, and Berla provides continuous solutions for clients as the technology develops. Vehicle forensics is proving relevant to nearly every digital forensics investigation, and is extremely helpful to accident reconstruction and insurance fraud investigation as well. Berla embraces ingenuity, innovation and creativity, and is focused on the future. The team takes great pride in solving tomorrow's challenges, today.

1ST FLOOR, BOOTH 87

BIS Digital Inc.

BIS has the unique ability to integrate communication, recording and multi-media system solutions with computers, networks, sound systems, video systems, camera and video recording systems, presentation technology systems, hearing impaired devices, digital audio and video recording software and operating systems for our customer's mission critical applications. From concept to completion, BIS Digital provides total turnkey solutions and integrated systems based upon the specific needs of our users that include concept and planning, engineering of solutions and systems, purchase of product, installation, personal product and service training, and on-going support and service.

2ND FLOOR, BOOTH 21

Bluebear LES

Bluebear LES is focused on forensic solutions in the fight against Online Child Exploitation. Our objective is to design and develop software that gives law enforcement the solutions they need to do their jobs effectively, efficiently and successfully. BlueBear's flagship product is called LACE. LACE is designed specifically to enable an investigator to review all visual content (images & videos) of a confiscated computer quickly, efficiently, and with minimal stress. The majority of the process is fully automated requiring only nominal input from the user such that investigators can do a complete and thorough analysis, rapidly create reports for court prosecution, and then immediately move on to the next case. LACE uses a superbly integrated solution to quickly process the overwhelming load of image and video evidence routinely associated with child exploitation cases.

2ND FLOOR, BOOTH 5

BookWoman

BookWoman is an independent feminist bookstore located in Austin, Texas. We specialize in providing diverse and unique resources in support of the mental health and cultural needs of women and children across their lifespan. Additionally, we curate and provide books and educational materials in support of conferences, presenters and attendees. We have been a community and statewide resource for 40 years.

1ST FLOOR, BOOTHS 33-34

Callyo

See what ICAC investigators nationwide are using to capture text messages and call recordings during traveler and sting operations. Callyo's Virtual Investigation PhonesTM (VIP) are saving detectives time and money by eliminating the need

to purchase "burner" phones and recording devices for undercover operations. Detectives can instantly generate new, recorded phone lines with voice and SMS capabilities in any area code that links to their existing cell phones. VIPs can also be used to make 3-Way controlled calls between a detective, a victim, and your suspect.

2ND FLOOR, BOOTH 30

Canine Companions for Independence

Canine Companions for Independence is a nonprofit organization that enhances the lives of people with disabilities by providing highly trained assistance dogs and ongoing support through quality partnerships. We train and place four types of assistance dogs: service dogs, skilled companions, hearing dogs and facility dogs in mastering over 40 specialized commands. Skilled companion dogs enhance independence for children with physical, cognitive and/or developmental disabilities. These dogs are trained to work with children under the quidance of a facilitator, typically a parent or legal quardian, who handles and cares for the assistance dog. Facility dogs are expertly trained dogs partnered with a facilitator working in a health care, education, visitation or criminal justice setting. Facility dogs can encourage and foster feelings of calm and security for clients in stressful or traumatic visitation or criminal justice settings.

1ST FLOOR, BOOTH 36

Cellebrite Inc.

Since 2007, the Cellebrite UFED has provided complete, standalone mobile forensics to investigative professionals worldwide. The UFED incorporates physical, logical and file system extraction, decoding and analysis of data and passwords from thousands of legacy and feature phones, smartphones, portable GPS devices, and tablets. It is regularly updated with ground-breaking physical extraction capabilities for the world's most popular platforms. Stop by our booth to learn more.

2ND FLOOR, BOOTHS 22-23

The Center for Missing and Abducted Children's Organizations (CMACO)

The Center for Missing and Abducted Children's Organizations (CMACO) is an organization dedicated to providing support to non-profits who serve families and communities of missing, abducted and exploited children. The goal of CMACO is to provide a platform for communication and collaboration between these organizations. Through training, technical assistance, travel scholarships and web-based meeting opportunities. CMACO creates a community where non-profits share best practices and resources with others who do similar work. Membership is free for non-profits working on missing, abducted and exploited children's issues. CMACO is a project of The Center for Innovation and Resources Inc. and is funded by the Office of Juvenile Justice and Delinguency Prevention.

1ST FLOOR, BOOTH 67

Child Welfare Information Gateway

Child Welfare Information Gateway provides access to timely, practical resources that help child welfare, adoption, and related professionals protect children and strengthen families.

1ST FLOOR, BOOTH 81

Children's Advocacy Centers of Texas, Inc.

Children's Advocacy Centers™ of Texas, Inc. (CACTX) is the statewide membership association representing all local children's advocacy centers in the Lone Star state. Founded in 1994 with a membership of 13 local centers, today the CACTX membership roster includes 68 developing and established centers in large urban cities as well as in small rural communities. Our membership reflects the vast diversity of Texas, all with their own unique approaches to fulfilling our shared mission of protecting and providing for children.

2ND FLOOR, BOOTH 15

Conference on Crimes Against Women

The 11th Annual Conference on Crimes Against Women will be held April 4-6, 2016 in Dallas, Texas at the Dallas Sheraton Hotel. We recognize that crimes against women are unique in nature and we seek to bring together all front-line professionals who respond to these crimes to arm them with the most effective, relevant, and up-to-date tools available to battle this epidemic. Stop by our booth and register for a chance to win a free registration to the 2016 conference. You won't want to miss CCAW!

1ST FLOOR, BOOTH 55

connect2annica

connect2annica is a grassroots organization that specializes in alerting children to the dangers of modern day threats like Internet predators, bullying, racial prejudice, and texting while driving. We use a children's book series main character, Annica, as our "Smokey the Bear" or "McGruff the Crime Dog" to give law enforcement, educators, and parents a way to start conversations with children about the threats that exist every day in this techno world. It is designed to be a first point of contact and resource for professionals and children.

1ST FLOOR, BOOTH 59

Crimes Against Children Conference/ DCAC

Stop by the Crimes Against Children's Conference/DCAC exhibit booth to purchase your conference t-shirts, as well as our nationally relevant child abuse education materials. We offer video-based curriculum packages for mandated reporters, Spanish speakers, parents, and children. In addition to hosting the Crimes Against Children Conference, DCAC also offers year-round learning opportunities in our training facility. We bring expert trainers from around the nation to offer half or full day workshops relevant to all child abuse professionals. Coming up in September - Robert Farley will present "Physical Child Abuse Injury Reconstruction Techniques" and "Critical Conversations for Child

Maltreatment: Interviewing the Suspect and the Caretaker" September 29, 2015.

1ST FLOOR, BOOTHS 64-65

Dallas Police Department Explorers

The Dallas Police Explorer Program is designed to introduce teens ages 14-20 to the career path of law enforcement. The Dallas program is an unfunded 501.c.3 organization that has around 150 participating kids in the program. The program sells Dallas PD memorabilia as a way to raise funds for the program. The explorers use these funds for uniforms, equipment and travel costs for competitions. The explorers participate in ride-a-longs with officers, competing in competitions, community service activities and public service activities. Many of our explorers go on to pursue careers with the Dallas Police Department and other law enforcement organizations.

2ND FLOOR, BOOTH 27

DCAC Animal Assisted Therapy Program

At DCAC, therapy dogs offer a unique form of support to children and families. Therapy dogs are different from service dogs in that they do not provide physical assistance but do their work by sitting quietly while providing emotional support and acceptance. Research has proven that contact with a therapy dog can lower blood pressure, decrease the heart rate and calm other anxiety related symptoms that are often associated with the type of emotional trauma victims have experienced.

1ST FLOOR, BOOTH 78

DME Forensics

DME Forensics is an innovative consulting company focused on video and image forensics with an emphasis on the analysis of surveillance digital video recorders (DVRs). Our flagship product, DVR Examiner, has revolutionized the process of recovering video evidence from DVRs. Coming summer of 2015 we will be expanding our line of software products to include Vehicle Examiner. This easy to use search tool will change the way investigators determine the make/model of an unknown vehicle. With over 25 years of combined experience, our instructors and examiners can offer expertise in a variety of digital and multimedia evidence analysis areas. DME Forensics provides local and onsite training, laboratory casework, and consulting to the civil and criminal justice community.

1ST FLOOR, BOOTH 43

EDAS FOX

EDAS FOX has been providing hardware and software options to the digital media forensics field for over 8 years. Each of our EDAS FOX computers come with 3 year warranties, giving you peace of mind for the life cycle of your machine.

2ND FLOOR, BOOTH 14

FBI - Violent Crimes Against Children

The mission of our Violent Crimes Against Children program is threefold: first, to decrease the vulnerability of children to sexual exploitation; second, to develop a nationwide capacity to provide a rapid, effective, and measured investigative response to crimes against children; and third, to enhance the capabilities of state and local law enforcement investigators through programs, investigative assistance, and task force operations. Our strategy involves using multi-disciplinary and multi-agency teams to investigate and prosecute crimes that cross legal, geographical, and jurisdictional boundaries; promoting and enhancing inter-agency sharing of intelligence, specialized skills, and services; and widely offering our victim/ witness services. All for the express purpose of protecting our nation's greatest asset—our children. 1ST FLOOR, BOOTH 85

GOAL Consulting Group

GOAL Consulting Group is your premier strategic planning and executive coaching agency. With offices in Texas and New York, the consulting team includes Jonathan Schick (New York City), Juliet Morphew (Dallas/Fort Worth) and Mary Connolly (New Jersey). 1ST FLOOR, BOOTH 48

Gundersen National Child Protection Training Center

Gundersen National Child Protection Training Center (Gundersen NCPTC) works to end all forms of child maltreatment through education, training and prevention while advocating for and serving children, adult survivors and communities. As leaders in the field since 2003, more than 100,000 child protection professionals have been trained on topics pertaining to child abuse investigations, prosecutions and prevention.

2ND FLOOR, BOOTH 16

HDREdge

Need to know WHO belongs to a phone number? Whooster is a reverse cell append product conducted all via text messaging designed for law enforcement officials. Whooster not only provides number-to-name capabilities, but also a cell phone directory function. Information is returned directly to the investigator within 5-7 seconds.

1ST FLOOR, BOOTH 32

High Tech Crime Institute

The High Tech Crime Institute (HTCI) is a global leader in the mobile device forensic analysis market, featuring its D.A.R.T. PRO + MapLink software, which imports mobile device data/CDRs then maps and analyzes

the information. HTCl is also a global leader in digital/cellular forensics training with courses encompassing the full spectrum of Media Forensics and Investigations. HTCl takes pride in offering cutting edge essential training and software to Law Enforcement and Military personnel throughout the world.

2ND FLOOR, BOOTH 1A

INTERPOL Washington

INTERPOL Washington, the United States National Central Bureau, serves as the designated representative to the International Criminal Police Organization (INTERPOL) on behalf of the Attorney General. INTERPOL Washington is the official US point of contact in INTERPOL's worldwide, police-to-police communications and criminal intelligence network. A component of the US Department of Justice (DOJ), INTERPOL Washington is co-managed by the US Department of Homeland Security (DHS) pursuant to a Memorandum of Understanding that ensures a continuing commitment to the guidance and oversight of the organization and reinforces its role in effectively sharing and exchanging international criminal investigative and humanitarian assistance information. INTERPOL Washington operates 24/7/365 and supports more than 18,000 local, state, federal, and tribal law enforcement agencies in the United States as well as their foreign counterparts that seek assistance in criminal investigations that extend beyond their national borders.

1ST FLOOR, BOOTH 53

JJ Staples Enterprises, LLC

Author and Child Advocate, JJ Staples shares her published fictional book entitled Deflowered Lyric. This novel brings attention to child sexual abuse through glimpsing the childhoods of three main characters. Their journey through life reveals brokenness and yet strength that are intertwined and expressed in a poetic prose. Each chapter starts with a lyrical poem to introduce the life stages of the characters. Although the topic of child sexual abuse is a somewhat forbidden and a hidden conversation, Deflowered Lyric introduces the readers to a cadence, which marches towards healing through exposing and acknowledging the secret sin to forgiving the reprobate. A strong religious faith by the character, Lyric, provides the roadmap to recovery. Deflowered Lyric has received the title of 'Award-Winning Finalist' in the "Fiction: African-American" category of the 2014 USA Best Book Awards. It also has received many positive reviews and accolades on the websites of Amazon and Goodreads. The author wishes to use exposure to bring immediate attention to the need of protecting our children from sexual abuse. She is dedicating the remainder of her life to walking and fulfilling her life's purpose. She joins many of you as she attempts to PROTECT OUR CHILDREN!

1ST FLOOR, BOOTH 56

Julian Sher - "Somebody's Daughter"

JULIAN SHER - BOOK AUTHOR. Come meet and talk with Julian Sher, an award-winning investigative journalist and the author of two books featured

regularly at the Dallas Crimes Against Children Conference: "Somebody's Daughter: The Hidden Story of America's Prostituted Children and the Battle to Save Them" was hailed as "the most definitive account of sex trafficking of children in the United States." He also wrote the book "Caught in the Web" about Internet child predators. His analysis and reporting on child abuse has been featured in the New York Times, USA Today and Readers' Digest. He will be speaking about his books at four sessions at this year's conference on Tuesday and Wednesday. Julian is the Senior Producer for "the fifth estate" - the premier investigative TV program in Canada for the Canadian Broadcasting Corporation.

1ST FLOOR, BOOTH 76

Netclean

Conquer Caseload and Accomplish More - The proliferation of smartphones, digital cameras, cheap storage devices and cloud services has soared the volume into huge quantity involved in digital forensic investigations. Most investigative tools lack the capabilities to intelligently deal with large quantities of image and video files. As a result, investigators are forced to go through the slow and laborious process of manually reviewing millions of seized files, regardless of whether it's pertinent or not. Analyze DI helps cut costs through significant reductions in investigators' workload and increases efficiency. However, more importantly, it increases the quality of investigations by freeing up time and putting better tools in the hands of the investigator.

2ND FLOOR, BOOTHS 27A-27B

North Texas Regional Computer Forensic Laboratory

The primary mission of the North Texas Regional Computer Forensic Laboratory (NTRCFL) is to serve the computer forensics needs of all law enforcement agencies and departments in the North Texas Region. The NTRCFL will provide quality technical and scientific investigative capabilities, forensic services, and expert testimony. Our services help support investigations that are reliant upon digital evidence, namely through the acquisition, preservation, examination, and presentation of digital information in computers and other electronic devices. The NTRCFL will provide training to agencies and departments in the proper techniques for seizing, storing, and analyzing digital evidence. In appropriate cases, the NTRCFL will assist in ongoing investigations of computer crime and cyber terrorism, using state of the art technology to obtain evidence in real time.

Nuix North America

Nuix is a technology company that frees the intelligence trapped inside unstructured big data. We have created the world's most advanced engine for indexing, searching, analyzing and extracting knowledge from all kinds of human-generated and machine data so people can make fact-based decisions. The patented Nuix Engine conquers the difficult file formats that make unstructured data hard to access and understand. Its unique parallel processing framework and powerful analytics capabilities transform any volume of data into valuable information at extraordinary speed and with forensic precision. Organizations around the world use Nuix software to solve sophisticated challenges including digital investigation, cybersecurity, eDiscovery, information governance, email migration and privacy. And the list of uses is always growing because our customers expect us to make the impossible possible.

Play it Safe!® Child Abuse Prevention

Do you provide child abuse education? Play It Safe!® is an Evidence Informed, age appropriate child sexual abuse risk reduction program for Prekindergarten through 12th grade students. Each grade level's unique program speaks to children in a way they can best learn, to identify abusive behavior and take safe action in threatening situations. It is provided one classroom at a time with curricula that have been researched, written and scripted over a 30-year period by The Women's Center of Tarrant County. Program topics for elementary aged children include identifying different kinds of touch and using the safety rule; and healthy relationships, sexting and abuse of power for middle/high school. The curriculum is now for sale for use outside of Tarrant County, Texas. Written to be presented in an interactive classroom setting, it is also appropriate for individual home use. Purchase just one grade level, or a bundle of grades. Included are that grade level's scripted curriculum, Tips for Successful Delivery, a pre/post test, a 10-20 minute DVD created for Play it Safe!®, and coloring books and dolls.

U.S. Marshals Service

The USMS is the federal government's lead law enforcement agency responsible for investigating sex offender registration violations and related offenses in connection with a violation of the Adam Walsh Child Protection and Safety Act, passed by Congress on July 27, 2006. As part of the Act, the USMS Sex Offender Investigations Branch is given three primary responsibilities: assisting state, local, tribal, and territorial authorities in the location and apprehension of non-compliant and fugitive sex offenders; investigating violations of the act for federal prosecution; and assisting in the identification and location of sex offenders relocated as a result of a major disaster. The National Sex Offender Targeting Center (NSOTC), serves as a resource to assist federal, state, local, tribal, territorial, and foreign law enforcement agencies in enforcing sex offender registration laws. The NSOTC is comprised of three units (Investigations, Intelligence and Behavioral Analysis) that work together to supplement registration enforcement efforts and provide a clearinghouse for information related to all sex offender investigations.

USA Certified Interpreters & Translators

In a criminal or civil case a Spanish or other foreign language AV - Audio/Video - may be introduced into evidence. A TT - Transcription Translation - of such recording is the best legal tool a prosecutor or law enforcement agency has that will stand up to scrutiny in the courtroom and that meets the legal evidentiary standards. A bilingual transcript is comprised of 2 parts: 1) A word-for-word transcript of source language in the original recording, and 2) the corresponding translation into English. The final product of this process is a two-column page placing both the foreign-language transcription and the English translation side by side, so that easy reference and checking for accuracy is possible. At USAitt we have the professional knowledge and technical experience to enhance recordings that appear unintelligible or inaudible, overlapping voices or multiple layers of noise mingled with dialogue. Regardless of the issue we, at USAitt.com have the professional team, equipment and in house technical support to be able to read and modify to read most AV files. Multiple satisfied clients endorse and recommend us because we are reliable, provide expeditious work and offer what we believe are the best rates in the national market.
