The Conference Has an App!

This year, attendees can use the app to access all program information, complete workshop evaluations, access handouts, take notes, and create your own schedule. Don't forget workshops are first-come, first-served, so choose a few options per time slot! No pre-registration required.

Download the **CACC 2017** app from the Apple App Store or Google Play Store. To start using the app, select "Create Account" and unlock the app using the **event code: CACC2017**.

Visit the Help Desk for assistance.

LYNN M. DAVIS

President & CEO, Dallas Children's Advocacy Center

Welcome to Dallas!

Thank you for choosing the 29th Annual Crimes Against Children Conference for your professional training, we are glad you are here. We hope you enjoy your week and take advantage of this year's outstanding learning and networking opportunities. Here are a few reminders so you'll have a successful week:

CACC2017 MOBILE APP

Visit the App or Google Play store and **search CACC2017 to download the app**, if you are unable to download the app to your mobile device, the app features are available in a web browser at www.eventscribe.com/2017/CACC/.

Use the CACC app to access all program information, make a customized schedule, access handouts, complete workshop evaluations and take notes. There is no advanced selection or registration for workshops.

SECURITY AND FIREARM POLICY

CACC name tags and badges must be worn throughout the event, no exceptions. Officers and Sheraton security will be stationed throughout the Conference and its events to ensure attendees are safe and able to focus on learning and networking.

If you've chosen to bring your firearm, we ask that you keep personal firearms either (a) on your person always, or (b) locked in your room safe. Do not leave your weapon unattended in your room or elsewhere. Any firearms left unattended will be turned over to the Dallas Police Department. Per hotel policy, the Sheraton prohibits the open and concealed carrying of firearms by non-law enforcement.

WORLD CLASS TRAINING AND RESOURCES

The Opening Plenary features **Emily Vacher** from our Platinum Sponsor, Facebook. Emily will give us a look at the State of the Industry. **Lou Luzynski**, co-founder and managing partner of Watch Systems, Inc., our Gold Sponsor, will present an award to a law enforcement professional. This year's keynote speaker is **Patty Wetterling**, mother of Jacob Wetterling, and advocate for families and children. She is a wonderful friend of the Conference with a powerful message – do not miss the chance to hear about her journey.

CACC 2017 again takes you behind the scenes of many complex investigations with in-depth case studies, including that of our keynote speaker's case.

Our hands-on computer lab trainings are back this year. We are now able to offer even more labs for non-law enforcement attendees. If you did not pre-register for the labs, visit the 3rd floor of the conference center to check for availability.

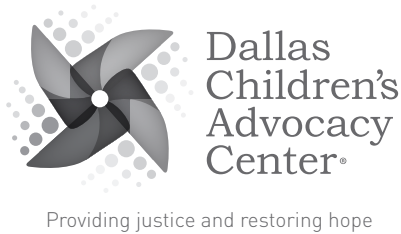

Our exhibitors offer a wide range of informational resources for all child abuse professionals. Some exhibitors also provide exhibitor workshops on Tuesday and Wednesday in the City View rooms. Participants who attend an exhibitor workshop will be entered in a drawing for an Apple Watch. The drawing will take place on Wednesday evening at the Conference Fiesta. You must be present to win!

Thank you for all that you do in our collective effort to protect and serve children around the world. Have an excellent conference experience!

Lynn M. Davis,
President & CEO
Dallas Children's Advocacy Center

PROGRAM OVERVIEW

Welcome to the 29th Annual Crimes Against Children Conference.

We are glad you have joined us and hope that you enjoy your week in Dallas at our internationally recognized conference! Monday morning begins with an opening session that includes the conference keynote presentations. It will also provide you with updated conference information.

During the conference, there will be [27 workshops](#) and [10 interactive](#) computer labs operating concurrently. Selected workshops are repeated. The schedule is broken down by date and time in this

program. Any updates to this schedule will be communicated via app notifications and information screens located throughout the conference center. If you cannot find something you are looking for, please do not

hesitate to go to the [HELP DESK](#) or ask one of our Conference staff or volunteers in aqua blue t-shirts. We appreciate the hard work you do, and hope you have a great conference experience!

CONFERENCE SCHEDULE

Please see page 28 for the Computer Lab schedule.

OPENING PLENARY

Monday, August 7th | 8:30–9:45 AM | Lonestar Ballroom

Keynote Speaker

Patty Wetterling

Patty Wetterling is the mother of Jacob Wetterling, who was abducted at the age of eleven by a masked gunman on October 22, 1989 near his home in St. Joseph, Minnesota. On September 1, 2016, nearly twenty-seven years after his abduction, Jacob's remains were found and his abductor arrested. Patty has become a nationally recognized educator on child abduction and sexual exploitation of children. Patty co-founded the Jacob Wetterling Resource Center (JWRC) and Team H.O.P.E. a national support group for families of missing children. Patty co-authored the books, "When Your Child is Missing: A Family Survival Guide," and "Perspectives on Missing Persons Cases." Patty was Chair of the Board of Directors for the National Center for Missing and Exploited Children from 2012-2015 and remains a champion of hope for families whose children are still missing and for prevention of sexual exploitation and abduction.

State of the Industry Remarks

Emily Vacher, Facebook

Emily Vacher joined Facebook in 2011 and is currently a Director with Facebook's Trust & Safety team. Emily is responsible for law enforcement outreach, global safety initiatives, safety education, and security policy matters. She is currently focusing on Facebook's AMBER Alert program and child safety issues. Emily works extensively with the National Center for Missing & Exploited Children (NCMEC) where she serves as a member of NCMEC's executive board and the law enforcement/operations committee, and also serves as a member of NCMEC's Team ADAM/Project Alert. Emily works closely with the International Center for Missing & Exploited Children (ICMEC) on global missing children's issues and alert system development and training. Before she joined Facebook, Emily was a Special Agent with the Federal Bureau of Investigation (FBI) for more than a decade, specializing in crimes against children matters. Emily holds a BS from Cornell University, an MS and MPA from Syracuse University/Maxwell School of Citizenship & Public Affairs and a J.D. from Syracuse University College of Law.

Presentation of Award to Law Enforcement Professional

Lou Luzynski, Watch Systems

Lou Luzynski is the co-founder and managing partner of Watch Systems, a public safety solutions firm founded in 2000 in Covington, Louisiana. Lou's vision of enhancing community safety through technology resulted in the development of OffenderWatch, the nation's leading sex offender management and community notification solution. OffenderWatch is used by over 3500 local, state, and federal law enforcement agencies to register 60% of sex offenders nationwide and to inform the public through agency web sites and by sending over 4 million postcards and 17 million email alerts annually. Lou works extensively with legislators, Sheriffs, state officials and victim advocacy groups to promote best practices in offender management and community notification and to educate the public of the dangers of sex offenders. Prior to Watch Systems, Lou was co-founder, President and Chief Executive Officer of Fuelman. Lou helped guide the fleet fuel startup in 1985 to a company with over 300 employees and \$100 million in annual sales in 1999. Previously, Lou was a Senior Manager of audit, tax, and management consulting services at KPMG Peat Marwick for early-stage, privately-held emerging growth companies. Lou earned a B.A. in Accounting with Cum Laude honors from St. Louis University and is a Certified Public Accountant.

FREQUENTLY ASKED QUESTIONS

DO I HAVE TO WEAR MY NAME BADGE?

Yes. For your safety, and the safety of others, you will not be permitted access into any sessions, special events, or common areas without your name badge. No exceptions. If you misplace your badge or leave it at your hotel, you can purchase a new badge for \$5 at the Help Desk. You will need a valid picture ID.

CAN I CARRY MY FIREARM?

Our policy on firearms will remain consistent with prior years. If you've chosen to bring your firearm, we ask that you keep personal firearms either (a) on your person at all times, or (b) locked in your room safe. Do not leave your weapon unattended in your room or elsewhere. Any firearms left unattended will be turned over to the Dallas Police Department. Per hotel policy, the Sheraton prohibits the open and concealed carrying of firearms by non-law enforcement.

CAN I TAKE PHOTOS OR VIDEOS DURING SESSIONS?

Please do not record or take any photos in workshops. This is against our policy, and you will be asked to leave the workshop and delete any recorded content. If the issue persists beyond the first offense, you may be asked to leave the conference.

DO I HAVE TO SIGN UP FOR CLASSES BEFOREHAND?

No. All workshops are first-come, first-served, with the exception of computer labs. If you have your eye on a specific class and want to ensure a seat, arrive early. Have back-up workshops in mind in case your first choices are full. Check the schedule for possible repeats of the most popular classes. If you are interested in open computer lab seats, please visit the 3rd floor.

WHY IS IT SO COLD IN THE CONFERENCE CENTER?

It is 100 degrees outside, and freezing inside. Texas is hot in August, what can we say? The hotel works their hardest to ensure the comfort of our attendees, however the air conditioning can be difficult to regulate with such extreme temperatures and the constant movement throughout the conference center. We are selling long-sleeved t-shirts – visit booths 76-78 to purchase yours!

HOW DO I ACCESS HANDOUTS?

All handouts are available on Dropbox AND on the app. Not all speakers will submit handouts, so all handouts we have been sent are available to attendees. The access link and password to the Dropbox account were emailed to each attendee before the conference. If you did not receive this email, please visit the Help Desk for access information.

IF I'M A NURSING MOTHER, WHERE CAN I GO TO NURSE PRIVATELY?

Privacy for nursing mothers can be found on the Skybridge next to the Question Desk. Please visit the Help Desk if you need assistance locating this room. There will be keycard access. Keycards can be accessed at the Question Desk, just next door.

I BROUGHT MY CHILD WITH ME, BUT NOT MY SPOUSE. WHERE CAN I ACCESS CHILD CARE?

The conference does not provide child care nor are children allowed in the workshops or to be left unattended in the conference center. If we discover you have left your child unattended, you will be asked to leave the conference until adequate care is found. Please see the concierge at your hotel and ask about child care options.

MY HOTEL IS OFF-SITE AND I FEEL UNSAFE TRAVELING ALONE. WHAT SHOULD I DO?

If you are ever uncomfortable or feel unsafe during the conference, please visit the Help Desk and we will address your concerns.

HOW DO I NETWORK WITH OTHER ATTENDEES?

The camaraderie and networking opportunities at our conference are unparalleled. Visit the exhibitors to learn about professional resources available to you. See page 59 for a map of exhibitor booths.

Don't forget to attend:

- Dallas Police Association Hospitality Event **Tuesday Evening**
- Conference Fiesta **Wednesday Evening**
- Session Forums (See Monday's schedule)
- Use the app! Our app has a feature where you are able to share your contact information with attendees and communicate with each other within the app. Please visit the Help Desk for assistance.

HOW DO I SUBMIT WORKSHOP FEEDBACK?

In order to provide a more seamless process, all evaluations are done on the Conference app. If you have any specific concerns about a speaker or workshop, see the Help Desk. Otherwise, please download the app to evaluate all workshops.

HOW DO I GET AROUND DALLAS?

We are proud to announce Uber as the preferred transportation sponsor for 2017! Dallas has many other transportation options, as well.

I CAN'T FIND ANY OF THE CLASSROOMS!

The Sheraton conference center and Marriott can be very confusing to navigate. See pages 7-9 to access maps or ask for directions from our staff in aqua blue t-shirts.

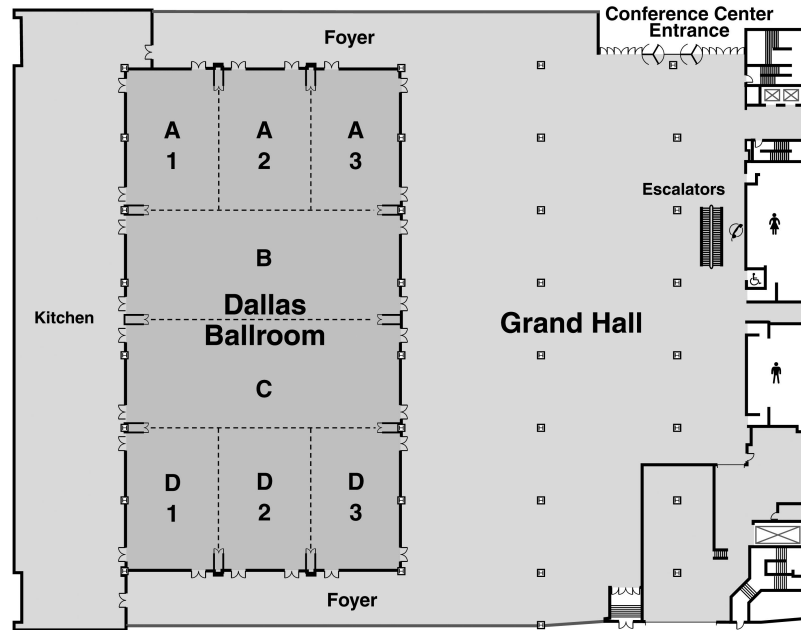

For all other questions, please visit the Help Desk located in the Lone Star Foyer or ask a staff member in an aqua shirt.

CONTINUING EDUCATION

The Crimes Against Children Conference is an approved provider of Continuing Education credit on behalf of the organizations listed below. Please read the information regarding your respective field carefully to ensure you receive credit. Please visit the Continuing Education booth in the registration area to sign in EVERY DAY. If you do not sign in every day, we cannot confirm that you attended the conference, and credit may not be granted.

National Board for Certified Counselors (NBCC)

DCAC has been approved by NBCC as an Approved Continuing Education Provider, ACEP No. 6602. Programs that do not qualify for NBCC credit are clearly identified. DCAC is solely responsible for all aspects of the program. Anyone seeking NBCC credit must sign in every day. Visit the Continuing Education desk for a list of approved courses of study.

State Bar of Texas (MCLE)

Anyone seeking MCLE credit must sign in every day. Bar number required. Those seeking ethics credit may visit the Continuing Education desk for a list of approved ethics courses.

Texas Center for the Judiciary

Anyone seeking CJE or Family Violence credit may visit the Continuing Education desk or the Special Registration area for CJE/Ethics and Family Violence forms and lists of approved courses of study.

Texas State Board of Examiners of Marriage and Family Therapists (LMFT)

Anyone seeking LMFT credit must sign in every day. License number required.

Texas State Board of Examiners of Professional Counselors (LPC)

Anyone seeking LPC credit must sign in every day. License number required.

Texas State Board of Social Work Examiners (LMSW)

Anyone seeking LMSW credit must sign in every day. License number required.

Texas Commission on Law Enforcement (TCOLE)*

TCOLE credit will be awarded to Texas Peace Officers through the Dallas Police Department. Anyone seeking TCOLE credit must sign in every day. TCOLE issued personal identification number (PID) required. If you do not know your PID number, contact TCOLE at 512-936-7700.

**Out of state peace officers should submit their conference certificate to their respective agencies for consideration of credit in their jurisdiction. You are not required to sign in daily.*

CERTIFICATE OF COMPLETION

You will receive an e-mail from us immediately post-conference with a link to a survey. Once you complete the survey, you will receive a second email containing the link leading to your certificate. You may print your certificate from that page.

No certificates will be handed out on-site.

HOW TO RECEIVE CREDIT

Your certificate will include the provider numbers for this Conference.

All attendees (except Texas Peace Officers seeking TCOLE hours) are responsible for turning in their hours to their respective fields.

CASE STUDIES & WORKSHOPS

Each session is listed by time block. See pgs. 29–51 for workshop descriptions and pgs. 52–58 for speaker information.

WORKSHOP DESCRIPTIONS

*This is a comprehensive list of Workshop, Case Study, and Exhibitor Workshop Descriptions.
Computer Lab descriptions can be found on the App and upstairs on the 3rd floor.*

A Deeper Look: What Can We Learn from Child Abduction Offenders?

Adrienne Isom, Kerri Reifel

Child abductions, while rare, can understandably result in panic within a community. Law enforcement is faced with managing the panic while focusing their efforts on the safe recovery of the child and apprehension of the offender. In this presentation, the FBI's Behavioral Analysis Unit will share investigative considerations from their analysis of child abduction offenders. The overview will also include the findings from a review of cases in which a child was abducted from inside their home. Using case examples and offender interview clips, investigators will gain a greater understanding of offender behavior and motivation.

A Sister's Pact: The Successful Prosecution of a Grandfather Despite All Odds

William Pitmon

This presentation will detail the successful criminal investigation into the continuous sexual abuse of two sisters by their step-grandfather over the span of several years. The presenter will explain the struggle to overcome disbelieving prosecutors and colleagues, uncooperative victims, and a family as wealthy in their finances as they are in denial. This case study will examine the mindset of the dedicated criminal investigator that stopped at nothing to reveal the truth about the sexual abuse that two young girls had endured. This case study will also describe what obstacles were overcome to reach the conviction resulting in lifetime incarceration for an evil man hidden deep in high society's clothing.

A Visual Atlas of Child Abuse

Ryan Brown

Child maltreatment is a medical condition that can manifest itself in different ways. No child is immune to it and it is also a very serious and often dangerous condition that should be recognized by health care providers and investigators. The purpose of this lecture is to introduce the audience to the various presentations of abuse. Though most people think of physical manifestations to be solely physical abuse, one objective of the talk is to show that all forms of abuse can be demonstrated in physical signs and/or symptoms of its victims. Since physical findings play a role in the investigation and determination of abuse, medical mimics of child abuse will also be discussed and shown. The presentation will also touch on how to differentiate between abuse, accident, or medical mimic and how to properly work the child up to make a diagnosis. The audience will be shown photos of

patients and will be asked to determine if the child was abused or not based only on the viewing of the picture. Then, the audience will be given a description and workup, if any, of the condition.

Abusive Minds Think Alike

Kristen Howell, Carrie Paschall

As investigators we know that usually where there is one form of abuse and there may likely be others. Because of this, it is imperative that we know the characteristics of the many different crimes and offenders we are investigating, as they often reside in the same home and often are the same person. This presentation will discuss some very basic dynamics of child sexual abuse and will correlate the similarities in characteristics of the crime, characteristics of the offender, disclosure process and patterns, victim grooming, recantation, and compliant victim characteristics to those that also exist in domestic violence. Attendees will be able to identify multiple similarities between these two types of offenders.

Advance Data Collection and Crisis Management

David Bachemin, John Strain

This presentation will discuss setting best practices on data collection for your agency or state, and then using that information in a crisis management scenario.

Advanced Cold Case, Long Term Missing and Unidentified Human Remains Investigations

Brian Killackey

This presentation will discuss the strategies, effort and initiative required to revisit cases involving cold cases, long term missing and unidentified human remains investigations that may have become closed, suspended, forgotten or never even initially reported to authorities. This presentation is sponsored by the NCJTC.

Advanced Safety Planning

Bronwyn Blake, Amanda Elkanick

In this workshop participants will learn how to help victims of intimate partner violence and sexual assault create an individualized plan to help reduce the risks they and their children face. This presentation will move beyond the basic safety plan and identify unique circumstances that require additional safety precautions and practices.

Adverse Childhood Experiences (ACE) Study: What You Need to Know to Identify, Intervene and Interrupt

Jane Straub

Experiences in childhood matter. Numerous research studies have shown how childhood stress and trauma can impact adult health. The Ace Study is the largest study investigating the health and social effects of negative childhood experiences. Now that we have the research, what can we do about it? The cycle of violence, generational poverty and abuse, homelessness, substance abuse, incarceration, perpetration and victimization of violence are all related to ACE's. Strategies such as identification and assessment, reducing risk and exposure and nurturing resiliency and skill building are effective interventions. Changing the negative course that many children are on is our best way to prevent abuse in future generations. This presentation will increase your knowledge of trauma and provide ways to work with children, families and communities to reduce the impact of trauma.

Ages and Stages of Child Sexual Abuse

Sandra Onyi, Lisa Schuster

This presentation will discuss elementary information regarding sexual abuse and how each child is affected differently depending upon their stage of development. Normal sexualized behaviors will be reviewed as well as techniques on how to make the examination and entire process more comfortable for the child. Each developmental stage (i.e., toddler, preschool age, school age, adolescent, etc.) will be explored including typical sexual contacts at the age, normal and abnormal sexual activities, and possible adverse effects on the child. The medical examination will also be reviewed according to age of the child.

Anatomical Dolls and Diagrams

Rita Farrell, Victor Vieth

In recent years, several researchers have challenged the utility of both anatomical dolls and diagrams in a forensic interview. Although some researchers have recommended caution or limitation on the usage of media, others have boldly called for a "moratorium" on the usage of these tools and have said those who use dolls or diagrams are engaging in conduct "eerily similar" to "ancient divination techniques." Although there is a small body of research on the use of anatomical diagrams, there are more than 100 studies on the usage of anatomical dolls and most of this research supports their usage. The presenters will provide an overview of their

recently published position paper on Anatomical Dolls and Diagrams, exploring the research to date, critique it in light of actual practice, and offer suggestions for future research on the use of media in forensic interviews.

Anonymization/De-Anonymization/ Anti-Forensics in Crimes Against Children Cases

Don Colcolough

Child predators and child pornographers are now more than ever integrating complex computer technology and Internet facilitated anonymization programming. De-Anonymization comprehension is a must for an exponentially growing number of crimes against children investigators and prosecutors as criminals are adopting these technologies prior to their illegal acts. This workshop will introduce and demonstrate state-of-the-art tools, networks, online services and techniques. Onion Routers, VPN Anonymizers, Web Beacons/Bugs will be highlighted along with other anti-forensic technologies. Legal considerations on these advanced Internet technologies will be discussed within this workshop. Criminal investigators and prosecutors should simultaneously comprehend these growing subject matters as they are being intertwined in a growing number of state, federal and US military crimes against children cases.

Apple Law Enforcement Response Forum

Ryan Kubasiak, Pat Burke

Attend this forum if you have questions about what data Apple can provide to law enforcement. The presenter will answer any questions you have about how Apple can help with your investigations. This session is restricted to law enforcement only.

Attempted Child Abductions: Tracking and Sharing the Data

Rebecca Butler

Attempted child abductions are often under reported due to the nature of these investigations. Suspect identifiers are often minimal, and the incident happens so quickly that it becomes complicated to piece together. Law enforcement is faced with the question of what information to collect and who to report that information to. This presentation will cover the steps law enforcement can take to report an attempted child abduction. The presenters will provide options and resources available to law enforcement to include critical analysis and development of suspect information. Attendees will leave this presentation with the ability to identify resources available to them and how to report and track attempted abductions in their jurisdictions. This presentation is sponsored by the Texas Department of Public Safety Foundation.

Behind Closed Doors: A Truly Evil Person

Stacy Burke, Kristen Sharpe

This case study will take you behind the scenes of the investigation and prosecution of a Misty Rae Hopkins, who with her husband, continuously abused, manipulated, silenced, and isolated their five biological children for years. The presenters will explain how the couple hid behind their religion and taught the children how to behave in a way that protected their unimaginable secret, and did so successfully for 14 years. This complex delayed disclosure case included conflict amongst the four siblings who came forward, including convincing one brother to testify who carried such shame he had no desire to proceed with prosecution. The presenters will discuss Hopkins' attempt to blame her husband for his constant teachings of submission and obedience to him as the leader of the church and the house, and a defense of a mental breakdown. Lastly, they will discuss how they overcame these defenses and obtained a conviction with five life sentences for Hopkins. See this link for more information.

Best Practices: Working with Families of Missing Children, Part 1 & 2

Craig Hill, Colleen Nick

Working with families of missing children can be challenging, yet it is critical for law enforcement to develop and maintain strong relationships throughout the life of the case. The willingness and ability to communicate with these families not only contributes to their ability to cope with the crisis; it can be instrumental in successfully resolving the case and bringing that child home. This presentation provides the context and perspective from the parent of a missing child, along with the emotional shock as it may relate to law enforcement's interactions with the family of a missing child.

Better Than a Confession: The Power of the One-Party Consent Phone Call, Part 1 & 2

Dave Clark

This presentation will discuss how to use the one-party consent phone call in criminal investigations, as well as the importance of this tool in delayed outcry cases or cases where the detective has no other evidence besides the outcry itself. This presentation will show you how to prepare your victim before the phone call and how to overcome other obstacles the detective may be confronted with if the victim wishes not to cooperate. Case studies will be discussed in which one party consent phone calls were used to prosecute cases and also used to force the defendants to confess to the offense as well as plead to their cases. This presentation will decipher through the conversations between the victim and the defendant and help you to understand it's not always what is said but sometimes it's more important as to what is not said.

Beyond Parent Engagement: Changing How Caregivers Parent

Katrina Cook

Agencies and staff can proactively respond to and support families in crisis, family assistance, case management, assessment, and therapy. In this workshop, ideas on when and how to proactively engage families across several domains will be discussed. Additionally, information will be provided on the most effective ways to encourage positive and supportive parenting among caregivers of the children we serve. Evidence-based interventions targeting parent behaviors will be identified and described. Online resources to help case workers and mental health service providers to be informed in their referrals and treatment planning will be provided.

Blazing through Massive Amounts of Pictures and Videos with Griffey Analyze

Rey Navarro

The explosion and volume of digital images and videos captured by CCTV, smartphones, tablets, digital cameras, body worn cameras, and dash cams presents significant challenges to analysts, investigators, and forensic examiners. In this presentation, you will learn how to process vast amounts of multimedia data collected from multiple sources and forensic tools, automatically eliminate and prioritize information, detect and highlight critical clues through automated routines and visual navigation, and ultimately identify relationships to prosecute criminals and identify victims. Attendees will also learn about photo matching in the absence of EXIF data, object recognition in videos, and how to easily integrate Project VIC's Alert System and hashes into your ICAC-related investigations.

Blocked? Now What? Practical Tips for Interview Challenges

Cathy Davis, Jennifer Sherfield

This presentation will review what are child driven and interviewer driven blocks that interviewers often face in their day-to-day practice. The presenters will offer practical strategies to reduce barriers to disclosure in interviews and at all parts of the assessment. This training looks at proactive and reactive measures that can be utilized by the interviewer to eliminate challenges while impacting the child's willingness and/or ability to disclose. The presenters will walk through specific case examples and review what not to do, and what to do if you find yourself getting stuck in an interview.

Building an Education Program for Your CAC

Sarah Burns, Dianna Smoot

As part of a strategic planning process, the Dallas Children's Advocacy Center embarked on a significant community education program several years ago. Come and hear about strategies implemented to raise the profile of the agency and to become the "go to" for

child abuse issues within Dallas County. In this workshop, participants will be given ideas, tools, and resources to take back to their communities, including creative ideas on what can be implemented on a limited budget and how to leverage MDT relationships to raise child abuse awareness.

But I Love Him: Investigating and Interviewing Children Who are in Love with Their Offender

Kim Skidmore, Bernadette Yupit-Martinez

Investigating cases where children and teenagers who have been sexually victimized can in itself be challenging, but it can be especially challenging when they do not see themselves as a victim, but rather feel that they are in a loving relationship with the offender. The feelings they have can often create blocks to disclosure that can be difficult to overcome. The presenters will offer research based suggestions to help understand these victims by exploring grooming behaviors these offenders use to exploit their victims and gain their trust. The presentation will also offer suggestions on how to ask questions in a way that can gather helpful investigative information without further complicating the emotional challenges the victim already faces. The presentation will include lecture, case study, and video clips to assist in the learning process.

But I Love Him: Treating Children Who are in Love with Their Offender

Kelly Slaven

In this workshop, the presenter will discuss the clinical treatment of a compliant victim who loves their perpetrator. The Stages of Change model will be used to conceptualize the process of supporting a client/victim from a pre-contemplative stage of change all the way into full acceptance and maintenance. Trauma informed use of evidenced based therapies, such as Trauma Focused Cognitive Behavioral Therapy (TFCBT) and Eye Movement Desensitization and Reprocessing (EMDR) will be used in case examples as well.

Child Abuse in the Army: When the Accused Wears a Uniform

David O'Dea, Eleanor Odom

The Army places extraordinary emphasis on child abuse cases, using specialized prosecution teams dedicated to bringing soldiers who harm children to justice in the military courtroom. This presentation will explore the roles of the special victim prosecutor, the special victim witness liaison, and the highly experienced civilian litigation experts who make up these teams. The presentation will benefit prosecutors and law enforcement whose communities are located near military installations and those who work with cases involving veterans. The presentation will also explain the unique challenges they face when prosecuting cases involving soldiers and children of military families, while also explaining

how to effectively liaise with military investigators and prosecutors.

Child Fatality Investigations

Leigh Bishop

This presentation is designed to outline best practices in pre-arrest investigative protocols for cases involving Abusive Head Trauma and other types of inflicted injuries in pre-verbal age infants and toddlers.

Child Homicide Investigations

Brian Killacky

This workshop is for those professionals conducting investigations and prosecuting those responsible for the murder of children. The presenter will discuss the methods required to establish the fact a crime has been committed, the process to identify those responsible and to prove these allegations beyond a reasonable doubt. This presentation is sponsored by the NCJTC.

Child Pornography and the Relationship to Contact Offending

Joe Laramie

Participants in this workshop will gain a better understanding of child pornography offenders and dispel the "it's just pictures" myth. Attendees will hear of the devastating and long-term impact on victims, and research highlighting the possible correlation between those who collect child pornography and those who molest children. The benefits of aggressive investigations into collectors as a child sexual abuse prevention tool will be discussed. This workshop is sponsored by the NCJTC.

Child Safety Efforts at Yahoo

Matt Healy, Holly Lawrence

This presentation will provide a basic understanding of the proactive and reactive methods in which Yahoo detects and investigates content related to child exploitation and how abuse policies surrounding child safety are enforced and communicated. It will include an overview of Yahoo services, such as Yahoo Mail, Messenger and Flickr, with an emphasis on how users can interact and utilize the products, and how law enforcement may encounter these during the course of their investigations. With specific examples pulled directly from Yahoo's E-Crimes Investigations Team cases, the presentation will describe Yahoo's CyberTip reporting process and how child sexual abuse material may surface on these products. It will also describe Yahoo's current efforts to encourage awareness and education regarding child safety and promoting good digital citizenship.

Child Sex Trafficking in Indian Country

Josefina Sabori

This workshop will explore the dangers faced by children in Indian Country that contribute to victimization through abductions, exploitation,

and maltreatment. Participants will discuss various contributing factors such as runaways and throw away children, technology facilitated crimes, luring techniques, trafficking, and the exploitation of Native American Children. This presentation is sponsored by the NCJTC.

Child Sexual Abuse: Understanding the Perpetrators

Graham Hill

What makes the perpetrators of child sexual abuse think the way they do? For many, the answers to these questions are unimaginable, but for professionals involved in child protection those answers could provide that important clue, that vital final behavioral indicator that enables intervention before a young life is irreparably damaged. This presentation will demonstrate the origins and maintenance of perpetrator behavior. The discussion will provide essential knowledge to help professionals keep children safe. The presentation utilizes video of perpetrators speaking candidly about their behavior.

Child Trafficking and Exploitation: A Prevention Perspective

Kimberly Casey, Aria Flood

Through an interactive presentation informed by Love146's experience working with at-risk and exploited youth in diverse settings, the presenters will provide information on how systems can effectively reach and empower at-risk youth through prevention education. The focus will be on vulnerabilities among youth from all backgrounds and the connections between those vulnerabilities, and grooming tactics and recruitment. Participants will analyze case studies and vulnerability factors, and discuss how to prevent, identify, and respond to vulnerabilities, risky behaviors, or existing exploitative situations. Presenters will also model examples from the implementation of Not a Number, Love146's child trafficking and exploitation prevention curriculum, as well as other practical programming designed to equip youth to navigate risky and exploitative situations and move beyond awareness to behavioral change.

Childhood Fall Injuries: Accident vs. Inflicted

Jim Holler

Falls are the leading cause of unintentional injury for children. More than half of all nonfatal injuries to children are associated with falls, and falls are the leading cause of nursery product-related injuries. Head injuries are associated with the majority of severe injuries and deaths resulting from falls. Because falls are associated with a child's curiosity and development of motor skills, children ages 10 and under are at the greatest risk of fall-related death and injury. This workshop will focus on identifying non-accidental fall injuries on children and will emphasize the specific techniques that can be used by the investigator in the assessment,

investigation, and reconstruction of injuries sustained from a fall.

Childhood Neglect: Abuse is More than Skin Deep

Ryan Brown

Child Maltreatment is a terrible condition that hundreds of thousands of children suffer from in the United States alone. Of all of the forms of abuse, neglect is the most common, the most deadly, and yet the least understood. The purpose of this presentation is to introduce the audience to the statistics involving childhood neglect as well as samples and anecdotes of the various forms of neglect.

Children in a Digital Age

Joe Laramie

In an age where technology is in the hands of youth of all ages, the dangers of abuse can affect any child, from any background. These dangers, ranging from cyberbullying to self-victimization (sexting) to sexual exploitation (sextortion) and abuse, can be difficult to identify. Also, preventing these digital abuses has often relied upon the failed use of scare tactics, where children and teens don't see themselves as vulnerable. This workshop will focus on the variety of digital dangers affecting our youth, the best methods of obtaining disclosures along with effective messaging to prevent digital abuses. This workshop is sponsored by the NCJTC.

Children Who are Stalked: What You Need to Know

Jane Straub

When the word "stalking" is searched in google, quite a few results will try to compare stalking to romance, many minimize the harm and others confuse harassment with protection. Our culture uses terms such as "Stalking", "Creeping/Creeper" and "Hanging Around" to normalize this real, extremely harmful and scary criminal act. Due to the availability and use of technology, children are becoming victims and offenders of digital crimes at earlier ages. This presentation will provide information on stalking including; the definition, statistics and prevalence, technology and the connection to children used in domestic violence situations. Links to other crimes such as exploitation, sextortion, revenge porn, sexual abuse, vandalism, identity theft and harassment will also be discussed.

Combating Sexual Exploitation One Stop at a Time

Derek Prestridge, Melanie Malterer

How can you more effectively identify victims of child exploitation and trafficking during a seven-minute traffic stop? Are there indicators you might be missing? Presenters from the Texas Department of Public Safety and the United States Marshals Service will present an innovative program designed to combat all types of child victimization during roadside encounters. They will share techniques that can be coupled

with routine police practices to significantly increase the likelihood of identifying victimized children and their offenders. The workshop will include examples of cases where officers used these interdiction techniques to rescue children.

Commercial Sexual Exploitation of Children (CSEC) Protocol and CACs: An Always Moving Target

Elizabeth Mendoza

In this workshop attendees will learn about the development of a CSEC protocol at a child advocacy center and how it changed the 'who' of the MDT and normal case process. Attendees will hear about the challenges of developing a protocol when new agencies come on board and successes through relationship building.

Community Prevention: Trends, Tools and Lessons Learned

Eliza Harrell

We all want to stop crimes against children before they ever happen. And increasingly our agencies and organizations are asked to help educate our communities on how to do this, but our time and attention is often drawn elsewhere. In this session, you will get a quick refresher on trending prevention topics, along with easy-to-use tools, current resources and lessons learned to help you build or enhance prevention efforts in your community.

Como Reconocer y Reportar El Abuso Hacia Menores

Ray Lara

This Spanish presentation offers culturally relevant content and information for Spanish speaking audiences on recognizing and reporting child abuse. This curriculum will educate child-serving professionals or volunteers on the basic issues of child abuse, how to recognize physical and behavioral signs of the varying forms of child abuse, and how to make a report.

Comprehensive Offender Management: Exceeding the Letter and the Spirit of the Law

Joey Gauthier

This workshop will be a comprehensive look at strategies to help agencies exceed both the letter and spirit of sex offender management and public notification statutes. The presenter will discuss data collection standards, effective public communication policies, as well as how and when to adopt heightened supervision practices. A demonstration of techniques to help improve your agencies efficiency and effectiveness when conducting verifications, sweeps and managing homeless offenders will also be included in this workshop. This workshop is recommended for supervisors, investigators, prosecutors, probation, parole and anyone that handles sex offender registration.

Conducting Multi-Agency Traveler Operations

John Madsen

This presentation will discuss the training, tactical, supervisory, and logistical considerations for conducting a successful multi-agency operation targeting travelers and human trafficking patrons. Case examples, chat techniques, and statistics will be presented to illustrate the operations of the North Florida ICAC model.

Conducting Successful Consensual Monitoring of Telephone Calls in Child Sex Abuse Investigations

Robert Young

This presentation will discuss how to successfully use the controlled phone call to solve child sexual assault cases where evidence is often lacking or weak. By learning the lawful, warrantless, and successful techniques, protocols, and strategies discussed in this workshop attendees will be able to utilize the control call to gather admissions, gain insight into the offender before interviewing, corroborate outcry details, and begin the healing process for the victim. Post-call interrogation strategies will also be discussed. Successful calls will be played during the presentation and equipment, preparation, and best practices will be discussed.

Coordinated Family Support Services: NCMEC's Family Advocacy Division

Abby Potash, Shannon Traore

This presentation will provide an overview about how the Family Advocacy Division (FAD) works with families in crisis at NCMEC to support their recovery and healing. The presenters will discuss how FAD supports the analytical and case management work at NCMEC by coordinating all aspects of a family's emotional and mental health care. Case studies of reunification will be discussed, through the personal lens of a searching parent, as FAD tackles the time, distance and emotion that can prevent families from healing and moving forward in a healthy way. The gaps in family and support services that are seen nationally are discussed as NCMEC introduces participants to the services of FAD and Team HOPE, and the notion that families are searching for appropriate resources and will always fight for justice for their child.

Countering Child Sexual Exploitation @Twitter

Twitter Staff

In this workshop, the presenters will highlight how Twitter works with Non-Governmental Organizations (NGOs), other technology companies and law enforcement towards the eradication of online child sexual exploitation (CSE). Included in this presentation will be a discussion of Twitter CyberTips and Guidelines for Law Enforcement.

Countering Technology-Based Criminal Defenses within Crimes Against Children Cases

Don Colcolough

There are a growing number of technology-based legal defenses being cultivated by defense attorneys and their subject matter experts across the United States. This workshop is for prosecutors and the investigators who work technology facilitated crimes against children cases. Prosecutors, their supporting investigators and computer forensic technicians should comprehend these defenses and how to counter them. Malicious software defenses, Trojan Horse defenses, Wi-Fi defenses and compromised Internet account defenses are several examples of this workshop's focus. Even confusion is a defense within these criminal cases at this point. Also, this workshop covers common objections used by both prosecutors and defense attorneys when fact and expert witnesses are in court offering testimony.

Courtroom Psychology: How to be a Good Witness and Survive in the Courtroom, Part 1 & 2

Lawrence Braunstein

This presentation is designed for the expert and lay (fact) witness, and will "demystify" the trial process. It will address and explain the different layers of action in the courtroom, how to "read" it and how to effectively respond. Issues such as body language, the importance of what you say and how you say it, demonstrative evidence and effective presentation, the trial as theatre, establishing a level of comfort in the courtroom, how to defend yourself on cross examination and how to protect yourself in the witness box (when no one else will). The more comfortable and confident a witness is in the courtroom, the more effective their testimony can be.

CPS Forum: Can You Hear Me Now?

Alfred Birtz

Communication, communication, communication; this is the backbone of all that we do. Interagency communication is vital to a strong working relationship. This forum will examine common issues with the breakdown in communication between child protective services and law enforcement in the multi-disciplinary team setting. We will discuss ideas and ways to better your understanding of what law enforcement needs/means/wants and how you can ensure that you are maintaining an open dialogue about your understanding and the needs of your own agency throughout an investigation.

Creative Corroboration in Child Abuse Cases

Bill Fulbright

Identifying, gathering and presenting corroborating evidence is the key to avoiding the dreaded "he said - she said" scenario, and to successfully prosecuting child abusers.

This presentation will detail various types of corroborating evidence that must be considered in a child abuse investigation, particularly following a disclosure of sexual abuse. The attendees will come away with a good outline that will assist experienced and inexperienced investigators and prosecutors at each step of a case.

Cross-Examination

Victor Vieth

In this workshop, you will learn the keys to a successful cross-examination. The presenter will discuss how to prepare and gain a thorough understanding of the case. You will learn about including the evidence to be presented by both sides, drafting cross-examination topics and questions and understanding the limitations of cross-examination. Finally, you will learn concrete examples of how to box the witness into a corner.

Cultural Considerations in Working with Trauma in Child Abuse Cases

Al Killen-Harvey

Traumatic experiences often elicit a wide variety of responses from those who are impacted. What is often missing in the investigation, screening and treatment of trauma cases is an exploration of the cultural factors that may have been at play. This workshop will explore why we oftentimes are uncomfortable and or unprepared to "welcome" culture into our trauma responding organizations and agencies. Through both a didactic and experiential approach this workshop will attempt to create a more culturally inclusive and inquisitive approach to trauma work.

Dallas Children's Advocacy Center Virtual Tour

Kristen Howell

Join us for an interactive walkthrough of our facility lead by a member of the DCAC Executive Team member. In January 2013, the Dallas Children's Advocacy Center moved into a state-of-the-art, 56,000 square foot facility following a successful \$11 million capital campaign. The building was designed from the ground up to enable our teams to deliver best practice care in serving the most severely abused children in Dallas County. The Center has a nurturing environment, connected to nature through the use of warm, organic and familiar textures and shapes. Our comfortable, safe, and inviting space is a place where hope and healing begin.

Dealing with Difficult Victims in Human Trafficking Cases

Brooke Grona-Robb, Roquel Mayhorn, Victor Vasquez

Perhaps the hardest part of addressing human trafficking cases is dealing with the victim's issues. Yet victims are crucial to human trafficking cases and are often unstable, uncooperative, and difficult in court. In Dallas County, they have a trifold approach: caseworker,

investigator, and prosecutor. In this presentation we will discuss how each role is necessary to find, prepare, and deal with troubled victims. We will discuss how we approach victims, from the initial investigation through the prosecution of the case. Working with trafficking victims to prepare them for trial requires a knowledge of their individual trauma experience, interpersonal dynamics, their needs, and their recovery process. The presenters will discuss why addressing witness issues and anticipating the unexpected is crucial for a successful prosecution.

Deception and Denial Patterns Among Adult Child Molesters, Part 1 & 2

Jim Tanner, Darrel Turner

Both speakers have presented independently of one another on the topic of deception and denial among child molesters. Dr. Tanner teaches on detecting deception in general and among sex offenders and Dr. Turner presents research findings from exciting ongoing research designed to create a rating instrument for interviewers to use to assess patterns of deception and denial frequently used by adult child molesters. The presentation is a two-part session that introduces the rating instrument and includes video clips from actual interviews with offenders that demonstrate these various denial patterns in action. In addition, these interviews are tactically analyzed to demonstrate the various methods of deception used.

Demonstration of OffenderWatch Mobile, Express and Booking Alerts

Scott Freeman

This presentation will demonstrate the new version of OffenderWatch Mobile and answer questions on how various agencies are using Mobile Express and Booking alerts to streamline their processes.

Digital Forensic Analysis of Chat Apps Popular Among Children

James Cooksey, Yuri Gubanov

There are literally hundreds of internet chat applications today for different platforms, including computers, mobiles, tablets and game devices. Among them there are ones you haven't even heard about. Some of such apps are very popular among youngsters. On this session we will go through several chat programs and explain how they store their data, is there a possibility to recover deleted chats, how to find sent or received files, media, calls or SMSes. This session is aimed to everyone who is doing digital forensic analysis of devices owned by victims or suspects.

Domestic Violence and the Impact on Children

Jane Straub

Domestic violence is pervasive in our communities with 1 in 4 females experiencing abuse at the hands of partner during her lifetime. Children are not immune or shielded from the

violence. Not only do millions of children witness the abuse of their mother, but experience child abuse themselves. This session will discuss the prevalence of DV, the intersection of DV and Child maltreatment and how these behaviors permeate the day to day climate of the home which leads to the cycle of abuse being handed down from generation to generation. Identification of harm will be discussed as well as strategies to support the mother and the children. Skill building and increasing resiliency will be presented.

Don't Tell Me About Predators - Teach Me What to Do to STOP Them!

Stephen Daley

Is prevention or protection part of your mission? Are you tired of responding after the crime? If you could be more proactive (fight back) in addition to responding and recovery (trying to catch up), would you? If you answered "YES" to any of these questions, join us, because, "Together, We Can!" We will share an evidence based methodology and a revolutionary formula that is working today, in prevention and as a therapeutic response to predatory victimization. An education not based on expectations, but instead providing personal skill development and opportunity for our children to be safer in this world today.

Driving your Investigation with Vehicle and Cell Phone Forensics

Kipp Loving

If you have a car, you probably own a cell phone that you've synced to your vehicle as well. Together, they hold an abundance of digital evidence to give investigators a view into how a crime took place as well as the owner's pattern of life. Learn about the basics of vehicle forensics and what data can be retrieved from a car's infotainment and telematics systems. Students will also learn how to consolidate their cell phone and vehicle forensics evidence into a single analysis platform to quickly analyze all sources of data instantly plotted connection diagrams, timelines, and mapping of GPS coordinates. Additionally, the class will present and demonstrate current software, techniques and resources for both investigation and forensic examinations that are not commonly known. They will also present items that will become problems in the future for investigations.

Effective Communication and Influence Through the Use of NLP Techniques

John Pizzuro

This presentation will discuss NLP which stands for neuro-linguistic programming, which focuses on an understanding of human behavior and how to effectively communicate and influence the people around them. Individuals and team success depends upon the ability of individuals to communicate with others, face to face, as well as virtually. Whether your speaking to a victim, witness, suspect, patient or co-worker, every

interaction with another person determines how you are perceived and every interaction is an opportunity to develop trust and exert positive influence. This presentation develops your ability to focus on your outcome and develop your message for clarity and impact, while understanding how individuals communicate. The communications and influence skills covered in this presentation will increase your ability to exercise choice and control for every type of conversation.

Emerging Issues and Insights Related to Child Pornography Cases Based on CyberTipline Reports

Yiota Souras, Rebecca Sternburg

To date, the National Center for Missing & Exploited Children has received over 17 million reports relating to child sexual exploitation images and videos submitted by the public and electronic service providers to NCMEC's CyberTipline. Building on years of experience assisting with thousands of reports, join staff from our Office of Legal Counsel and from our Exploited Children Division team for an in-depth look at the CyberTipline. Topics will include: how reports are received and processed, the holding in US vs. Ackerman and specific challenges to anticipate and address in the aftermath of this decision, and free legal resources and technical assistance available from NCMEC.

Emerging Issues in the Field of Forensic Interviewing

Rita Farrell

The field of forensic interviewing is ever changing. This presentation will discuss emerging issues in the field including; new research, use of diagrams, forensic interviewing protocols, introducing evidence into interview, peer review and mentoring.

Ethical Considerations in Child Abuse Investigation and Prosecution

Edward Chase

As prosecutors, we are entrusted by society with enormous responsibility. Charging decisions can be some of the most difficult decisions made by the prosecuting attorney, especially in child abuse cases, resulting in profound effects for victims, the defendant, and even society at large. Often, the only evidence is the word of a child. Or in physical abuse cases, merely identifying the correct perpetrator of the crime can be difficult. But a difficult case does not necessarily mean it is a case that should not be prosecuted. This lecture will examine the common ethical considerations that arise with charging decisions and beyond.

Ethics, Please! Or Ethics, Please? Demystifying Boundaries and Dual Relationships

Tanisha Knighton

As mental health professionals, we have all been faced with situations where it was unclear

if a boundary has been crossed or an unethical dual relationship exists. In these situations, we must rely on internal cues and personal characteristics to assist us in our decision making process. This interactive presentation is designed help professionals navigate ethical decisions regarding boundary violations, boundary crossings, and dual relationships. By reviewing various ethical codes and case studies, an understanding of the main arguments for and against dual relationships, judicious boundary crossings and non-sexual dual relationships can be gained.

Facebook: 101

Jason Barry

In this workshop, the presenter will discuss the latest safety and privacy controls, safety initiatives designed disrupt and prevent child exploitation, a detailed review of Facebook's Law Enforcement On-line Records Request System and guidelines for interacting with our Law Enforcement Response Team.

Facilitating Experiential Trauma Information: A Real Change in the Conversation, Part 1 & 2

Russell Strand

The Forensic Experiential Trauma Interview (FETI), designed to improve facilitation of critical information from trauma victims, has proven to be a game changer in the investigation and prosecution of many forms of violence, including child abuse and adult sexual abuse. Use of the FETI process in domestic violence cases is also extremely promising for increasing successful interventions, investigations and prosecutions. This interview technique draws on the best practices of child forensic interviews, critical incident stress management, and neuroscience - combining them all into a simple three-pronged approach that unlocks the trauma experience in a way that we as professionals can better understand. This two-part presentation will address the neuroscience research, trauma memory and recall and will provide practical application of the FETI process.

Facilitating Forensic Interviews of Cyber Crimes

Crystal Gregory

This presentation will discuss each step of a legally-defensible forensic interview while working with electronic evidence, whether it is prior to or after the collection of evidence by law enforcement. The presenter will provide case examples and techniques of gathering details surrounding evidence to gain more investigative knowledge. The presenter will focus on preparing the interviewer and victim for the use of images, chat logs, and other evidence while keeping with the needs of the victim. Various victims' needs will be discussed, including emotional reactions, compliancy, relationship with offender, concern of images being distributed, and preparing for parental reactions. The presenter will also

discuss the use of bait images/videos and how to inform the victim that offender is not who he or she portrayed him/herself.

FBI's Operation Rescue Me and Endangered Child Alert Programs

Amanda Strickland

Operation Rescue Me (ORM) is a strategic partnership between the FBI's Violent Crimes Against Children Section and NCMEC. ORM is an aggressive program which focuses on utilizing image analysis to determine the identities of child victims depicted in sexual exploitation material. The Endangered Child Alert Program (ECAP) is a proactive approach to identifying unknown individuals involved in the sexual abuse of children and the production of child pornography. ECAP seeks national and international exposure of unknown adults whose faces and/or distinguishing characteristics are visible in child exploitation images. This presentation will include an overview of the programs, case examples of successful identifications and provide attendees with tips and tools to conduct victim identification investigations.

Female Genital Mutilation in the United States

Kristen Acton, Kerry Sparks

This presentation will discuss the emerging threat of the practice of female genital mutilation (FGM) in the United States. While not a new practice, the US Government and the FBI's International Human Rights Unit recently made preventing and combating FGM a priority in order to safeguard children. The presentation will detail key facts regarding FGM, including education on the various types of FGM, health effects, and prevalence within certain ethnic communities. The presenters will discuss methods of performing the procedure, potential medical concerns, and typical justifications for having FGM performed. Additionally, the presenters will discuss legal and jurisdictional issues when investigating FGM cases, the current threat and prevalence of FGM within the United States, and the FBI's strategy to combating FGM. (This presentation may include some graphic and sensitive material, to include video clips of survivor testimony.)

Finding Tara: The Race to Save a Girl and Catch a Predator

Francey Hakes

This presentation will take attendees behind the scenes of the dramatic worldwide search for one little girl after pornographic pictures of her being threatened at knifepoint surfaced half a world away in New Zealand. The clear link between collecting child pornography and hands-on offending will be explored in two federal case examples. Attendees will learn about the focus required to search for victims appearing in the images of child sexual abuse and see clear evidence of what drives child sex

offenders to abuse children and how some are so desperate to abuse children they will travel thousands of miles to do so. The presenter will offer insight into the minds of these predators and display some of their own words, photos, and the evidence that brought them down.

Forensic Experiential Trauma Interviews and Application to Child Forensic Interviews

Julie Kenniston, Russell Strand

Child interview forensic techniques have been a topic of substantial research for several decades. Recent advances in our understanding of neuroscience and trauma memory has informed additional research and practice. The Forensic Experiential Trauma Interview (FETI) was developed using sound child forensic interview techniques such as open-ended and non-leading questions, impact & experience aspects of critical incident stress debriefings and what we now know about the advances in neuroscience, memory, and trauma memory. This presentation will address the concepts and application of FETI as they may relate to child forensic interviews. The two interview approaches will be compared and contrasted. Concerns for interviewers trained in both methodologies will be addressed. Participants should have completed forensic interview training and FETI training prior to attending this session. This workshop is co-sponsored by the NCJTC.

Forensic Interviewer Forum

Bibiana Dominguez, Jesse Gonzalez, Kim Skidmore

This Forum will present opportunities for networking with others in the field of forensic interviewing. This forum will host forensic interviewers from around the country to discuss relevant topics in the field and discuss current trends in best practice.

Forensic Interviewer in the Courtroom, Part 1 & 2

Rachel Burris, Carrie Paschall

This presentation is specifically for new or relatively new forensic interviewers. It will provide an in-depth overview into best practice in record keeping and training documentation for forensic interviewers right when they enter the field. The presenters will also talk about how to prepare for your testimony including how to watch your forensic interviews in an efficient manner to maximize the quality of your testimony. Attendees will also learn important concepts to remember when taking the witness stand and will get to observe some mock direct and cross-examination between the presenters. Attendees will also be given the opportunity to ask questions and participate interactively if they wish.

Forensic Pathology and the Investigation of Sudden Unexpected Infant and Child Deaths, Part 1 & 2

Candace Schoppe

Understanding the needs of the forensic pathologist is an important skill for those involved in investigating the deaths of infants and young children. Despite close working relationships, information needs are not always well-communicated between the pathologists and the investigators. Gaps in information may result in an undetermined ruling on cause and manner of death, which heavily rely on scene and investigative information in the pediatric population. This lecture will cover the basics of medicolegal death investigation and the pediatric autopsy. Emphasis will be given to the "SUIDI Top 25" which details the 25 most important pieces of investigative information needed by the forensic pathologist prior to beginning the autopsy, as compiled by the CDC for SUID investigators.

From Sticks to Flowers: Working with Parents Justifying Corporal Punishment with Scripture

Victor Vieth

As the legal definition of reasonable force continues to contract, there is increasing tension between criminal justice/child protection professionals and parents who physically discipline their children based on religious beliefs. Using a case study, this workshop will offer concrete guidelines for MDTs working with caregivers whose physical discipline of their children exceeds the law but is rooted in their interpretations of scripture.

From the Mouth of Babies: What Kids are Telling Us about Delayed Disclosures

Allison Alstott, Elizabeth Mendoza

As research shows, disclosure of sexual abuse is a process and happens along a continuum. Many factors play a role in the process of disclosure including family relationships, lack of parental support, fear of consequences, etc. In this workshop, the presenters will review information obtained during the forensic interview directly from the child regarding their delayed disclosure. Attendees will obtain further insight on children's reluctance to disclose and discuss how interviewers and multi-disciplinary team members can navigate through the disclosure process with kids and families.

Gentle Child Murder: Suffocation/Strangulation/Drowning, Part 1 & 2

Jim Holler

Gentle homicides encompass smothering, strangulation and drowning and are the second most common type of child murder and the most difficult for investigators to discover. In most cases, there is no evidence of any type of trauma and there are no tests at autopsy that could help determine this type of death and many cases

are ultimately listed as Sudden Infant Death Syndrome (SIDS) when in fact it was murder. These cases are most likely discovered through admission from caregivers or witness accounts. This presentation is a comprehensive overview for investigating gentle homicides in children and will cover in detail suffocation, strangulation, and drowning homicides and will provide the investigator with the knowledge they will need to successfully conduct this type of homicide.

Geronimo Aguilar: The Grooming of a Congregation, Part 1 & 2

Eric Nickols, Kerri O'Brien, Michael Weber

Geronimo Aguilar was a youth minister at a small church in Fort Worth, Texas in the late 90s. During this time he lived with a family that included two sisters whom he groomed and molested. Aguilar later moved to Richmond, VA where he built the fastest growing church in America according to one religious publication. His sexual abuse continued openly, against an underage girl and adult female members of the congregation. In this case study, the presenters will discuss the failure of police agencies, fellow clergy and members of his congregation to step forward and stop the abuse. Eventually a Richmond reporter, one of the presenters, broke the story, which led to the re-opening of the investigation and a successful prosecution for the Texas offenses, then almost 20 years old. The presenters will discuss the extensive investigation and long road to justice for not only the Texas victims, but for the congregation that he groomed and victimized in Richmond, VA.

Get Involved!: CPS Leadership's Role on the Multi-Disciplinary Team

George Cannata, Matthew Gilbert

CPS supervisors, program directors, and others in leadership positions struggle to find their place on the Multi-Disciplinary Team. The Dallas Children's Advocacy Center now has a CPS Program Director and CPS Program Administrator co-located with staff at the center. This provides a multi-layer support structure for CPS field staff and supervisors investigating the most serious cases of child abuse and neglect and the partner agencies with whom we work and are accountable. This workshop will teach CPS leaders how to become and stay engaged with their local Children's Advocacy Center through executive team collaboration, board participation, and development of knowledgeable and skilled field staff and supervisors.

Google Data Disclosure Policy

Cathy McGoff

This presentation provides an overview of Google's services and technologies, including Gmail, YouTube and Voice. In addition to describing the types of data available to law enforcement from those services and technologies, the presenters will review the policies and processes by which Google may

provide data to law enforcement, consistent with state and federal law, including the Stored Communications Act. The presentation will also provide a demo of the Law Enforcement Response System (LERS) where law enforcement can securely submit legal process and download their productions.

Google User Services: What You Didn't Know Was Out There

Justin Fitzsimmons, Lauren Wagner

Everyone with a Google account has access to a robust history of information through Google Dashboard, My Activity, and Google Takeout. Google Dashboard shows information such as search history, location history, payments profile, and if the user has an Android phone you can even see what apps and installed and track the phone's location live. My Activity will show all of the Google Account information in a chronological order. Google Takeout allows a Google Account user to download a copy of their Google data. While most of this history and tracking information can be disabled or deleted, much of it is on by default and users are not aware to go delete it. This makes Google Dashboard, My Activity, and Google Takeout a powerful tool for law enforcement if they can convince a suspect to hand over the login credentials to their Google Accounts on consent. This lecture will address both how to access this data and legal considerations associated with Google user data.

Google: Combatting Child Exploitation

Alexander Gee

This is a workshop that will provide an overview of Google's efforts to combat child exploitation, including content reporting, product safety and deterrence efforts.

Grooming Behaviors of Child Molesters and the Impact on Victims

Darrel Turner

This workshop will discuss grooming behaviors engaged in by child molesters in order to secure victims and prevent disclosure. In addition, grooming of the environment (family, friends) in order to facilitate abuse is discussed. Findings from in-progress research by the presenter on grooming will be presented. Video clips from actual interviews/evaluations of sex offenders will be utilized to provide examples of grooming behaviors "from the mouths of the offenders." Videos with victims will be utilized to examine the psychological and behavioral effects of grooming and abuse that exist often long after the abuse has stopped (i.e., recantation, delayed disclosure).

Harnessing the Force Multiplier of NCMEC's Resources

Dan Mills

The National Center for Missing & Exploited Children® offers a remarkably diverse array of resources to law enforcement, child-

serving professionals, parents, children, and other government agencies that are crucial to help solve cases of missing and/or exploited children. This presentation will highlight what agencies need to know to bring these resources to bear in their investigations and to implement various prevention programs in their communities. Participants will learn about NCMEC analytical resources, the CyberTipline®, programs designed to identify potential victims, and additional free training opportunities.

Hiding Abuse Behind Mental Illness: The Prosecution of an Abusive Father

Ashley Keil

This case study will take you into the world of two autistic boys, a world shaped by their diagnoses of Autism Spectrum Disorder (ASD) and sexual abuse at the hands of their father. The father sexually abused the victims hoping that he could hide his crimes behind their mental illnesses. The limited communicative ability of the both boys made the investigation and prosecution of this case unique and problematic. Issues including medication history, multiple forensic interviews and immunity agreements will be addressed. The presenters will discuss how prosecutors, psychiatrists, therapists and law enforcement worked together to overcome the communication impairments of the victims to secure a conviction for a man who abused the most vulnerable in our society.

Hiding in Plain Sight: The Steven Sherwood Investigation

Mary Nguyen, Brent Pucci

This case study will take you behind the scenes of the five-month investigation into the sexual abuse perpetrated by Steven Sherwood on multiple victims. An email sent to a detective turned into the largest child molestation case in Solano County history. Sherwood, a handyman by trade with access to vacant homes in the Fairfield, California area, used his bilingual skills and personality to insert himself into the homes and lives of undocumented Mexican nationals. Sherwood gained the trust of the parents while grooming their children ages five to 15 before sexually abusing them. The presenters will guide you through the many hurdles encountered during the investigation and prosecution of the case. Among the issues they will discuss are the difficult task of gaining the trust of the families; the multi-agency coordination between State and Federal agencies to obtain Visas and return victims to the United States for their testimony; trial complications; legal issues, and the problems encountered with having eleven child-victims testify at trial.

High Crimes, High Times: How to Investigate and Prosecute Drug-Endangered Children

Jenni Morse, Kristen Reeder

After seeing a dramatic spike in the number of children testing positive for methamphetamines

and amphetamines, the presenters decided to change the way we handled their cases. This workshop will discuss those efforts and educate prosecutors, law enforcement, CPS workers and medical staff in how to identify, test, and investigate these cases so that the prosecution can receive the strongest case possible. The presenters will also discuss how to incorporate these drug-endangered children cases into your MDT model.

High Risk Missing Children: Not “Just a Runaway”

Rebecca Butler

Missing and runaway children are one of the most vulnerable populations law enforcement officers encounter and these children are more prone to abuse, sexual violence, and can become ideal targets for sex traffickers. This presentation will provide criteria that can be used to establish if a child is considered high risk missing. It will share newly designed reporting procedures that can be adopted by other law enforcement agencies nationwide. The presentation will also describe the benefit of applying analytical techniques to locate these children. This presentation will address challenges and gaps that prevent an expeditious recovery of these missing children and what agencies can do to close these gaps. This new concept will help alleviate the case load of investigators, as well as serve as a resource. The presenter will share case examples outlining the techniques that have led to the recovery of children since being implemented in Texas.

Homicidal Drowning and Immersion Abuse, Part 1 & 2

Andrea Zaferes

This presentation will describe in detail the six types of immersion abuse. The presenter will explain how to distinguish each type of immersion abuse; how they can happen; and what factors generally contribute to the abuse. Participants will also learn how abusers can make the abuse seem accidental. Lastly, the discussion will explain how Munchausen by Proxy and other apparent life threatening events can easily be created by forced water aspiration.

How Not to Help the Defense Attorney in Child Sexual Abuse Cases, Part 1 & 2

Lawrence Braunstein

This presentation, presented by a defense attorney (and former prosecutor), will acquaint law enforcement, prosecutors, medical practitioners, mental health practitioners, child protection caseworkers and victim assistance agency personnel with the intimate workings of the defense in child sexual abuse cases: the preparation of a defense case, investigative techniques, pretrial motion practice and discovery, examinations before trial, jury selection, defense trial strategy, demonstrative evidence, trial exhibits, cross examination techniques, and courtroom psychology. By

having a broad overview of both pretrial and trial procedures, and how the defense will approach its preparation during each phase of the litigation, the expert and lay (fact) witness will be better prepared in understanding its individual role in the proceedings, and better prepared to maximize its participation in the overall litigation.

How the US Marshals Service Can Assist You with Investigating Crimes Against Children

Jerry Dysart, Mike Wagner, Rebekah Young

This presentation will provide an overview of the United States Marshals Service resources that are available to any state/local/tribal/territorial partners to assist them in protecting our most vulnerable population, i.e., children. Among the topics to be discussed will be the USMS core mission under the Adam Walsh Act: resources provided by the National Sex Offender Targeting Center: International Megan's Law; USMS new authority for critically missing children; and operational assistance provided to state/local partners, and more.

How to Survive Cross-Examination for Forensic Interviewers: It's Not What You Say, It's How You Say It, Part 1 & 2

Lawrence Braunstein, Julie Kenniston

Successful child sexual abuse prosecutions depend in large part on the quality of the forensic interview of the child, and the testimony of the forensic interviewer. This presentation will focus on the various protocols used during the interview process, disclosure as a process or event, forensic linguistics, videotaping of forensic interviews, and how to best present your testimony in the courtroom both on direct examination and cross examination. The goal of the presentation is to “re-educate” forensic interviewers to understand and consider how what they do in the forensic interview room/CAC will “play out” in the courtroom. This workshop is co-sponsored by the NCJTC.

Human Trafficking and Beyond Part 1 & 2

Tanisha Knighton

This workshop will focus on the different types of missing persons, analyze the profiles and vulnerability factors of “victims”, recruitment and grooming tactics used by traffickers of both sexual trafficking and labor trafficking, terminology and rules associated with the pimping subcultures, provide tips on how to identify and interact with “victims.”

I Can't Hear You! What Happens When Police and CPS Don't Communicate

Alfred Birtz, Sabra Garibay

This presentation will examine what happens when good communication goes bad. This case study will detail a child abuse investigation conducted by the Dallas Police Department and

the Texas Department of Family and Protective Services. The presenters will examine where the breakdown in communication occurred and how it impacted the investigation from initial onset through the prosecution. The presentation will discuss how to identify and correct communication breakdowns as they occur in order to ensure that they do not have an impact later on in the investigation.

I Take It Back: Investigating Recantations

Russell Strand

Child abuse, sexual assault, and domestic violence – what do these all have in common? Often the perpetrator is the same, these crimes are frequently traumatic to their victims, and the impact is generally harmful. Another common distinction between these reported crimes – the victim often recants their initial complaint either partially or completely. All recantations should be properly investigated to determine if the recantation itself is true or false. A case determination should not be made until a proper investigation as to the facts and circumstances of the recantation. This presentation will increase understanding of the dynamics surrounding recantations. Case studies and research about this vital topic will be presented along with practical tips and investigative steps to take to ensure a proper case determination.

I Take It Back: When a Child Recants Allegations of Sexual Abuse

Carrie Paschall

Investigating cases of children and teenagers who have been sexually victimized can be challenging, but it can be especially challenging when the child later recants their initial allegations. Many in the field become concerned about the credibility of both the child and the case once this occurs and it becomes difficult for the MDT to know what to do next. Many times, cases are not pursued and children are left in situations that put them at risk for re-victimization. This presentation will discuss recantation and its place in the normal process of disclosure, how to investigate a recant and when and how to interview a child who has recanted. A case study with excerpts from forensic interviews will be used to assist in meeting learning objectives.

Identification, Notification and Interviewing All-In-One

Alexandra “Ale” Levi

More and more common is the case where your suspect/target is enticing minors to self-produce pictures of themselves, producing images/videos of them without their knowledge, using sextortion methods or baiting them in with a false identity. This presentation will discuss new investigative techniques regarding how to locate victims while minimizing the impact on the victim and family; how and when to identify the victims of child exploitation; and how to notify the families of the child exploitation through the use of the

forensic interview process. These techniques are helpful with cases ranging from one victim to those with multi-victims spanning the globe. Discussions of protocols and venues for these options will be presented using case examples as well as presenters experience.

Improper Relationships

Crystal Levonius, Shannon Miller, Brandon Wonacott

There are increasing numbers of cases filed where a teacher or other educator is a perpetrator and a student is the victim. Often, victims of these crimes are easily identifiable and become the subjects of ridicule within a school. Presenters will discuss investigations, charging decisions, and the prosecution of educators for sexual related crimes. Several cases will be discussed along with the unique issues they each presented.

Initial Response to Unexplained Child Death Investigations, Part 1 & 2

Jim Sears

Most child deaths appear natural or accidental, but sometimes it is later determined that foul play was involved. This presentation will take you from the initial response to a child death or unconscious child and show you how to properly investigate the case from the very beginning. The discussion will include information on using your multi-disciplinary team to make your cases stronger and ensure important issues are not overlooked. The presenter will also discuss the utilization of information and evidence found during your initial scene response and using that information to move the investigation forward. Lastly, the presenter will include information the medical examiner, doctors, and other members of the MDT will need to make rational and logical decisions on the death of the child.

Inside the Mack Mansion: The United States v. Jeremy Mack

Kelly Liberti

This case study will show how a local drug search warrant led to the discovery of large scale sex trafficking ring being run out of a house known as the "Mack Mansion" in Ohio. The presentation details the investigation, prosecution and trail of Jeremy Mack and his co-conspirator Ashely Onysko. It will show how young girls and women fell victim to Mack, how he controlled and influenced them, the dense campaign he ran from jail, and the involvement of his entire family in his criminal enterprise. The presentation will cover Mack's obstruction and how it led to his attorney's being removed from the case. Focus will be on the victims and how the coordinated efforts of local, county, state and federal officials led to Mack receiving a guilty verdict and four life sentences.

Insights from the Virtual Global Taskforce International Online Child Sexual Exploitation Police Personnel Health and Wellness Study: Taking Care of the Protectors

Roberta Sinclair

The Virtual Global Taskforce (VGT) is an international police alliance dedicated to the protection of children from online sexual exploitation and transnational child sex offences and is comprised of national law enforcement agencies, private partners and non-government agencies. Understanding the unique stressors of working in online child sexual exploitation units, the VGT commissioned the Psychological Care International Research Project, led by the Royal Canadian Mounted Police. This global study provides empirical data such that law enforcement agencies and employees can take a more proactive approach in safeguarding and maintaining employee psychological wellbeing. Over 650 participants responded to the survey, including both current and past employees, and representing over ten countries. Preliminary findings in this critical area of policing will be presented.

INTERPOL and the Fight Against Global Child Exploitation

Drew Viney

This lecture provides insight into the INTERPOL Crimes Against Children Team and the role it plays in the global fight against child exploitation. In this increasingly technology-driven and therefore borderless crime type it is critical for every law enforcement agency to 'act locally while thinking globally'. The aim of this presentation is to raise awareness of how INTERPOL can assist you with identifying offenders and their victims throughout the world. There will be discussion in relation to a number of initiatives and projects, including the International Child Sexual Exploitation database (ICSE), an ever-expanding collection of seized and catalogued child abuse material. This platform allows investigators to securely share data with colleagues, conduct image and video analysis and comparisons against current holdings and leverage the collective expertise of the global law enforcement community. Some short case studies will be discussed to illustrate the successes that can be achieved through INTERPOL-facilitated cooperation.

Interpreting Child Sex Trafficking CyberTipline Reports and Resources Available for Law Enforcement

David Eliff

This presentation will demonstrate the National Center for Missing and Exploited Children's (NCMEC) resources available to investigators working to identify and recover victims of child sex trafficking. Attendees will become familiar with the free analytical resources provided by the Child Sex Trafficking Team (CSTT) at NCMEC, who process hundreds of online advertisements a month, as assist NCMEC CST Case Managers

by providing analytical support for missing cases assigned to them. At law enforcement's request, CSTT can also assist by completing comprehensive analytical reports regarding possible child victims and their traffickers to provide technical assistance and support to their child sex trafficking investigations.

Interrogating Sex Offenders: Gaining Maximum Tactical Advantage, Part 1 & 2

Mike Krapfl, Jon Turbett

This presentation will identify the limitations of current law enforcement training on interview and interrogation and describe how those limitations adversely affect the investigation of sex offense crimes. It will introduce an evidenced-based model of interview and interrogation practiced by the presenters that maximizes current research and legal advantages for officers. This model will be presented in the context of a sex abuse investigation involving a former law enforcement officer and no physical evidence - a scenario that is not often likely to produce a conviction. The presenters will address the interview and interrogation tactics that produce the slightest edge with sex offenders.

Interviewing Child Victims with Disabilities, Part 1 & 2

Scott Modell

Studies have long established that children with disabilities are disproportionately criminally victimized. Specifically, the rate of violence experienced by children with disabilities is triple the rate compared to children without disabilities. Many significant barriers exist, both real and perceived, that limit investigation and prosecution of these cases. Understanding and communicating effectively with children with disabilities who come into contact with the criminal justice system are necessary skills for child protective services, law enforcement, children's advocacy center staff, and other social service personnel. The participants in this workshop will develop a broader understanding of children with disabilities as well as new strategies for effective interviewing and communicating. Video clips of real individuals with disabilities are integrated into the presentation to maximize the effectiveness of the training. This session is sponsored by the National Children's Advocacy Center, funded by the Office of Juvenile Justice and Delinquency Prevention (OJJDP).

Interviewing Male Perpetrators of Child Sexual Abuse

Graham Hill

Interviewing those suspected of child sexual abuse is a skill that can only be acquired and enhanced by continual practice. This presentation uses interviews with perpetrators and case study material to demonstrate the presentation styles of these offenders and highlights the techniques that can work when interviewing men suspected of child sexual abuse. Such information is vital

if professionals are to effectively engage with those suspected of child sex crimes.

Interviewing the Reluctant Child

Rita Farrell

This workshop offers concrete guidance for forensic interviewers or investigators called on to interview a child who is reluctant or fearful of making a disclosure. The presenter will discuss different blocks and challenges that may come up and students will review forensic interview video clips and discuss.

Interviewing Travelers

Mike Duffey

This lecture will provide students with considerations when interviewing individuals who travel to meet undercover officers. Discussed will be types of approaches to use, interviewing styles, overcoming potential defenses and solidifying your case during the interview. Sample video interviews will be used along with possibly integrating themes into your interview.

Intrafamilial Sexual Abuse: The Monster Within

Susie Striegler, Ann Marie Willoughby

This presentation details the case study of “Kelly.” Kelly was abused by a family member beginning at age six. This abuse lasted until she ran away at age 17. This presentation will discuss Kelly’s struggle with familial abuse from her father and how the abuse was able to continue for over a decade because of fear, deceit, shame, denial and retribution. Bringing awareness and recognition to the signs of abuse within a family is discussed in this presentation as is techniques used to manipulate and “groom” victims of all ages. Secondary victimization is often associated with familial abuse. This type of abuse is also discussed. Finally, a roadmap describing how Kelly survived the abuse from her father and later became a victim advocate and devoted her life to helping others to overcome and survive a life of sexual abuse by a trusted family member.

Investigating Child Sexual Assault Cases

Michael Milnor, Nancy Oglesby

Child abuse cases should never be prosecuted with only, “he said, she said,” evidence. It is imperative that a child’s statement of abuse be corroborated in as many areas as possible. This workshop will discuss the multiple pieces of evidence that can be obtained during a sexual assault investigation. Attendees will learn how to make a “corroboration checklist,” and to dissect the child’s statement for areas to gather evidence. This presentation will enable investigators, prosecutors, and associated child abuse professionals to surround a child’s statement with layers of credible, corroborating evidence, and witness testimony to present the strongest possible case at trial.

Investigating Serious Injury and Fatal Child Abuse Cases, Part 1 & 2

Michael Milnor, Nancy Oglesby

Child abuse investigations can be extremely difficult for several reasons. The level of medical knowledge necessary is more than most crimes because often the victim can’t or won’t tell what happened. This session will cover in-depth procedures for investigating serious injury and fatal child abuse cases. The first part will discuss an overview that is applicable to any child abuse investigation with an emphasis on a multi-disciplinary response. The second part will cover investigation techniques specific to certain types of abuse, including those most often explained as accidents such as burns, failure to thrive/neglect, and abusive head trauma. It is intended primarily for law enforcement officers and CPS investigators, but it will include a prosecutor’s perspective throughout so that the likelihood of success at trial is increased.

Investigating Sexual Misconduct in Schools: What You Must Know About Title IX and K-12 Institutions

Rebecca Veidlinger

While Title IX is most readily associated with college sexual assault, K-12 institutions are also subject to the federal mandate prohibiting sex discrimination in education. In the K-12 setting, sex discrimination can manifest itself as sexual harassment, gender-based bullying, and sexual assault. Like institutions of higher education, school districts nationwide must be working to prevent, address and remedy sexual violence that impacts their educational community, an obligation that extends far beyond what most districts are currently doing. In this workshop, attendees will learn about how Title IX functions at the K-12 level, including what prevention efforts are required, how investigations are conducted, and what remedies are required under federal law. Attendees will further learn about potential intersection and overlap of schools’ Title IX investigations and criminal investigations, and how to partner with—rather than work against—those doing the Title IX work at K-12 institutions.

Investigative Searches and Collaborating with the US Marshals within OffenderWatch

Dan O’Donnell, John Strain

This workshop is an overview of how to run various types of searches within OffenderWatch and collaborate with the US Marshals through the OffenderWatch network.

It’s Not Easy Being Green, or Do THIS for a Living

Dan Powers

This motivational talk is meant to provide you with the insight and knowledge to help survive in a job no one else really understands. Others “outside the business” don’t want to hear about this stuff! You can clear a restaurant with a discussion of

what you did that day. We see and hear things on a daily basis our mom and dad never told you existed in this world. Participants will learn how dynamic determination and working as a member of THE TEAM will help you survive in “our world”. Participants will be encouraged to look at themselves, why they do “this” for a living and most of all learn to laugh at it all.

Jacob Wetterling: A Quarter Century Search for Jacob, Justice, and Answers

Shane Ball, Chris Boeckers, Patty Wetterling

This presentation details the 27-year missing person investigation of 11 year-old Jacob Wetterling. On a Sunday night in 1989, Jacob was abducted by an armed masked stranger who confronted him, his younger brother and a friend while they were riding bicycles near his home in St. Joseph, MN. For nearly three decades following the crime, his parents Patty and Jerry Wetterling courageously advocated on behalf of Jacob, other missing children nationwide, and their families. The presenters will discuss Jacob’s abduction, previous assaults against boys in nearby communities, and, ultimately, the re-identification of Danny Heinrich as the primary suspect in these crimes. Heinrich was arrested in 2015 on federal child pornography charges and later agreed to a “global resolution” plea deal which resulted in the recovery of Jacob’s remains, admissions from Heinrich regarding his crimes, and a federal prison sentence. The presenters will also discuss challenges and lessons learned from the long-term investigation and prosecution.

James McCurdy: Adoption Champion to Sexual Predator

Suzanne Owens, Mary Sirna

This case study will detail the investigation and successful prosecution of James McCurdy for multiple counts of child sexual abuse. Prior to being convicted, McCurdy worked as a school bus driver, was a Boy Scout leader and foster parent, and unsuccessfully ran for the local school board. In addition to his employment involving children, McCurdy taught adoption classes, was named “Adoption Champion” for the Ames area, and was the adoptive father of three boys. This presentation will detail how McCurdy’s years of grooming, and sexual abuse of children, came to light only when a young victim came forward to express his concern over other children’s’ victimization. It will detail the complex investigation that was undertaken, and the multi-disciplinary approach involving: law enforcement, DHS, advocacy, forensic interviewers and prosecution that ultimately led to this sexual predator’s demise. The presenters will also share investigative techniques, pre-trial motions and trial strategy.

Jean Marston: Female Incest Offender *Corine Moulton, Nancy Oglesby*

This case study will take you through the investigation and prosecution of Jean Marston, a female sex offender and adopted mother of the victim. The victim entered the social services system because his biological parents lost custody of him and his four siblings. This caused the children to be separated and placed in foster care. The victim was adopted into an upper middle class family by the offender and her husband. This presentation will describe Marston's grooming and bribery of the victim to keep silent about the sexual abuse. This included lack of parental supervision, a continuous flow of gifts, and producing, selling, and using drugs. After years of being sexually abused, he became involved in the juvenile court system and lacked respect for authority. He disclosed the abuse and then recanted and had one jurisdiction refuse to prosecute his case. The presenters will discuss the unique challenges of dealing with a male teen incest victim and how an extensive investigation led to a successful prosecution despite the obstacles presented.

Karl Barnes: Prosecuting the New Age Pedophile, Part 1 & 2

Tony Godwin, Mark Sims, Brandie Wade

This case study details the investigation and prosecution of a diagnosed pedophile, who began abusing children at the age of seven and continued until he was sentenced to 99 years in prison at age 26. Karl Barnes sexually assaulted an eight-year-old boy who he photographed and videotaped, then shared those images of online. The presenters will cover how a thorough forensic interview pointed detectives to the evidence they needed to collect. Included will be a discussion on the noncustodial and custodial interviews of the defendant, how to overcome possible suppression issues, the search of the defendant's electronics and how to present those findings to a jury. The presenters will discuss how the defendant's "suicide note" led to additional victims, and how to present victims who do not remember their abuse. Lastly, the presenters will discuss juvenile probation records, and how they can be a wealth of information.

Kenneth Stokes: Web Master and Child Molester

James Holdman, Jr.

This case study details the investigation of Kenneth Stokes, a registered sex offender living in the Philippines, who produced and distributed large amounts of child pornography all over the world and sexually abused children daily. The presenter will discuss his initial contact with Stokes through a Craigslist ad and the chats that set the hook on an evil monster. What followed was distribution of child porn to Missouri and a six-month online conversation that led to Stokes inviting the presenter, in an undercover capacity, to his highly-secured compound on Cebu Island,

Philippines. The case study will discuss the coordination with numerous agencies, both in the United States as well as other countries. Lastly the presenter will discuss deportation versus extradition, evidence collection in foreign countries and the additional charges filed in Missouri that led to a 120-year sentence for Stokes who admitted to sexually abusing children for almost 60 years.

Kenwanee Tate: Child Sex Trafficking Investigation

Kelly Harrison

This case study will discuss the investigation of Kenwanee Tate, who operated an online based sex trafficking enterprise primarily in Charlotte, North Carolina. Tate forced two juvenile females and at least two adult females to engage in commercial sex for his sole profit. He was a previously federally convicted sex trafficker and state convicted sex offender, who was taught at a young age by his own family members how to "pimp and control little girls". Tate maintained control of all aspects of his victims' lives using specific rules, and he enforced those rules through violence, threats of violence, and mental abuse. The presenter will discuss how investigators initially learned of Tate's activities, how they overcame difficulties with victims and victims' family members, and the investigative techniques used to build a case for successful prosecution. The attendees will see footage from Tate's ultimate confession, offering a glimpse into the mind of a lifetime sexual predator. Tate was convicted and sentenced to 40 years in federal prison and ordered to pay \$42,000 in victim restitution.

Kids in Court

Judy Hoffman, Eren Price

For over 20 years, the Dallas County District Attorney's Office has collaborated with community volunteers from the National Council of Jewish Women to make testifying in court a little less scary for children by hosting Kids in Court, a Saturday session at the courthouse for kids and families. This presentation, by a prosecutor and a community volunteer, will include suggestions on starting your own program and lessons learned from 20 years of experience.

Knock and Talks: Maximum Results with Minimum Manpower

Michael Johnson, John Pirics

This presentation will draw from several years of experience in child exploitation investigations that have been initiated by consensual contact (knock and talks). The presentation will provide successful techniques to gain and maintain consent, tips on maximizing the interview, methods for triaging knock and talk targets, and overall strategies for the different types of situations and individuals that are encountered. This information will be blended with examples from cases that the presenters have worked

together, many of which have resulted in child rescues and significant sentences.

Lead or Lead Not, There is No Try

Dan Powers

Do you want to be known as the Yoda or Darth to your organization? Would you like to convey wisdom or deliver fear as part of your leadership style? You cannot deny that Darth Vader's leadership style gets results, but Force choking may not be the best way to lead your team. As leaders in "our world" we are faced with challenge of needing to influence many different types of people. The team looks to you to lead with knowledge, compassion and empathy. You have a choice, use the force or go to the dark side. Attend this presentation and learn how to do it.

Life Without Parole: Using Trauma Focused Cognitive Behavioral Therapy and the Trauma Narrative for Criminal Prosecution of Child Sexual Abuse

Kelly Slaven, Brandie Wade

This workshop will appeal to mental health professionals and attorneys working in a multidisciplinary team to promote justice and healing for the victims of child abuse. The use of assessment and the evidence based treatment of Trauma Focused Cognitive Behavioral Therapy is not just useful in healing families, but also in prosecuting crimes against children. In this presentation, prosecutors will learn how to best utilize the mental health professional's testimony and treatment to contribute to a guilty verdict.

Lightning Session: Five Topics in 75 minutes

Graham Hill, Jim Tanner, PhD

Do you want solid information fast? This is the session to attend. The presenters join forces to provide an information packed, fast paced session covering five important topics: Grooming, Targeting Children, Distorted Thinking, Self-Conditioning Among Sex Offenders, and Sex Offender Digital Behavior. This workshop will provide essential information will be presented on each topic and accompanied by handouts which provide extended information. Join us for a "TED talk" on steroids.

Live Analysis: '5-Minute Forensics' in P2P Cases

Jeff Shackelford

Law enforcement investigators are encountering more digital evidence than ever before. Unfortunately, this translates to more backlogs for the forensic labs and longer waits for the investigators. But what if you could find everything you needed on-scene at the suspect's house by conducting a basic, automated forensic exam in a matter of minutes? In this presentation, attendees will learn how anyone (including non-technical personnel), can utilize a simple methodology to rapidly and automatically simulate a full computer forensic exam in just

five minutes or less - including tasks like data carving, password extraction, registry analysis, timeline creation and report generation. And the best part is that you will leave here with the tools and techniques to do this successfully on your own.

Long-Term Missing Children: NCMEC's Summit and Guide for Law Enforcement

Leemie Kahng-Sofer, Robert Lowery

This presentation will discuss long-term missing child cases and recoveries that provided the catalyst to NCMEC's Long-Term Missing Child Summit of 2014. Each of the eight different summit tracks and corresponding guide chapters, addressing topics such as risk assessment; investigative methodologies related to long-term missing children and unidentified remains; offender and victim behavior; forensic and biometric considerations; and missing child family dynamics will be covered.

Medical Child Abuse: The Medical Evaluation and How to Use it for the MDT Evaluation

Arne Graff

This workshop will discuss medical child abuse, a much more common identified concern in children with chronic diseases. The presentation will detail when to suspect it, know what medical staff can offer in its evaluation and discuss how to involve medical staff in the evaluation, as well as how to help avoid getting to this point of abuse.

Microsoft Cybertips and Legal Requests

Tracy Ingle, Jeff Lilleskare, Matthew Sullivan

This presentation will provide a high-level overview of Microsoft products and services, including connectivity to OneDrive and Skype. The presenters will also provide an understanding of PhotoDNA and how Microsoft reports detected hashes to NCMEC. The discussion will also go over what Microsoft may provide in response to legal demands about their services and products.

Multi-Disciplinary Teams and Child Sex Trafficking: What You Need to Know

Joe Laramie

The Multi-Disciplinary Team (MDT) approach is the standard response to child sexual abuse, yet the MDT approach for responding to child sex trafficking requires a different and more flexible approach. This workshop will provide an overview of child sex trafficking indicators and identify the approach teams can take to include new members, as well as steps toward altering the team's methodology and procedures for this new type of case and victim. This workshop will provide information relevant to professionals serving on the MDT, or anyone serving at-risk youth. This presentation is sponsored by the NCJTC.

Myth Busters: Breaking Down Common Misconceptions About Victim Disclosures, Traumatic Memories, and Problematic Behaviors

Leslie Boutte, Ana Guzmán

In an effort to more effectively work with sexual abuse victims and their families, it is important to have an understanding of common myths regarding sexual abuse. Delayed disclosures, the process of disclosure, recants, memory discrepancies, and problematic victim behaviors can be frustrating for law enforcement, CPS, prosecutors, and mental health professionals. In this workshop, presenters will break down common myths in an effort to facilitate a non-judgmental and collaborative approach to investigating and treating child sexual abuse cases.

NCMEC Referrals: Finding a Way Forward

Cathal Delaney

This workshop will be based on the Europol experience of dealing with and disseminating NCMEC referrals for 18 partner countries. This presentation will provide an explanation of where improvements can be made through the entire chain of the referrals system to benefit the investigators who are assigned to work those leads. It will include a description of how NCMEC referrals are created and dealt with by the referring platforms, how they are distributed through NCMEC and then translated into working intelligence packages for law enforcement and the stages along the way.

Noncompliant Sex Offenders and the Military

Katrina Mitchell, Brian Healy

This presentation will explore the partnership between the Sex Offender Tracking Team (SOTT) at the National Center for Missing and Exploited Children (NCMEC) and the Department of Defense (DoD) at the National Sex Offender Targeting Center (NSOTC). We will outline US Military post adjudication sex offender registration requirements and will detail the free resources available to you in an ever-expanding effort to assist in locating noncompliant sex offenders, specifically those offenders who have a nexus to the United States Military. This can include offenders who may have served in or have some other direct link to the military, as well as offenders who may have a more indirect association to the military. Finally, this presentation will provide case examples on which SOTT and DoD liaisons have provided assistance and the outcomes that have followed.

OffenderWatch Best Practices for Proactive Sex Offender Management Training

Kathy Taylor, Joey Gauthier

This session is an overview on OffenderWatch. Training topics include best practices for initial registration verifications/re-registrations, running investigative searches.

OffenderWatch CommSYS Mobile Connector

Scott Freeman

The OffenderWatch and CommSys ConnectCIC gives the end user accessing the OffenderWatch Sex Offender Registry a more robust and detailed stream of data to resemble the state's CJIS information. This workshop will discuss how this has been used with the Baltimore Police Department to enhance their officers investigation and management procedures.

OffenderWatch Q&A Session

David Bachemin, Kathy Taylor, John Strain

An open session to answer any questions you have on OffenderWatch.

OffenderWatch Training on Best Practices for Supervising Your Sex Offender Registry

Joel Shoultz, David Bachemin

This session will focus on best practices for maintaining your registry. We will discuss key items to be looked at on a quarterly or yearly time table as well as how to work with our staff to update school districts, points, parcels and 911 files.

OffenderWatch Training on Investigative Searches

Joel Shoultz, Kathy Taylor

This session will focus on conducting searches in OffenderWatch. The instructors will be going over search parameters used is several recent cases and the best practices for maintaining your data to optimize search functionality.

OffenderWatch Training on Law Enforcement Community Outreach, Notifications and Integrating These Efforts with Social Media

Joey Gauthier, Joel Shoultz

This workshop will be a discussion of how OffenderWatch can help increase citizen awareness through email, seasonal campaigns, and Facebook.

OffenderWatch Training on Managing the Verification Process

Joel Shoultz, John Strain

We will discuss best practices for managing your verification cycles as well as using Offender Watch's many verification tools, like calendars and various reports to simplify the process.

OffenderWatch Training on Process Management and Supervision Standards

Joey Gauthier, Joel Shoultz

This workshop is an overview of our Quality Management Process, how we run assessments on agencies and a handout for key things every agency should monitor.

Officer Safety Considerations in ICAC Investigations

Michael Sullivan

In the last decade the trading of child pornography has exploded via the use of the Internet. It is not uncommon to see three to six thousand IP addresses per state, per month, involved in the trading of child pornography. With this volume of activity how can law enforcement make sure their resources are being used to identify hands-on offenders and rescue children currently being sexually exploited. This workshop will look at the studies conducted by Dr. Michael Bourke and Dr. Joe Sullivan. How the results of their work may aid law enforcement in rescuing children and providing insight into the underlying criminal activity and officer safety and mental well-being issues.

On the Road Again: A Truck Driver's Sexual Abuse and Dominance Over His Daughter

Geeta Singletary, Crystal Levonius

This case study details the prosecution of Lawrence Parker, Jr., a truck driver who took his daughter on the road with him and invited her to join him in the BDSM lifestyle. The presenter will discuss what the BDSM lifestyle looks like, types of grooming typically used, and trying a case in which the victim has severe mental health issues, including suicidal ideations. Included in the workshop will be a practical discussion regarding the admissibility of a confession when Miranda warnings are not given, jurisdictional considerations, and how to get your victim through trial without doing more damage than good.

Once the Shutter Snaps: From Victimization to Restitution

Shelley Allwang

This presentation will bring attention to the production of images and video files in child sexual abuse. From the abuse and its documentation, to distribution and investigation, and ultimately to rescue and restitution, child sexual exploitation images form part of an ecosystem that involves NCMEC, industry, and law enforcement, among others. Come learn about the path these files take from a victim-centered standpoint, and how your help and participation in the "chain" is pivotal to rescuing children featured in child sexual abuse images. The role of NCMEC's CyberTipline and Child Victim Identification Program, how they interact and are connected, along with their resources for investigators, will be discussed in depth. Case studies will be used to highlight the concepts.

Opening Statements and Closing Arguments

Victor Vieth

In this workshop you will learn the importance of effective strategies and themes for opening and closing arguments in child abuse cases. You will also learn a theme for presenting your case.

The presenter will provide specific arguments to persuade a jury that a child is telling the truth. Lastly, you will learn how to debunk common defenses in child abuse cases.

Operation Good Samaritan: A Twisted Pimp Ransoms the World of Addiction, Part 1 & 2

Michael Barker, Bethany Biesenthal, Carrie Landau

This case study will examine the crimes of McKenzie Carson, who from a young age exploited those around him for his sexual pleasure. As an adult, Carson realized that widespread heroin addiction provided him with an endless supply of sexual victims. He kidnapped, held victims drugged and tied, beat, raped, and sold his victims to other pimps. For years Carson terrorized the drug addicted populous of Chicagoland. This case study will examine Carson's elaborate use of cell phones, online advertisement, the withholding heroin as a form of coercion in an effort to satisfy 18 USC 1591, and the difficult decision to offer immunity to his coconspirators (recruiters of juvenile victims) in order to secure a stiff sentence. In this workshop one of Carson's victims will be invited to help attendees examine the experience of a drug-addicted victim, adding vital perspective to the considerations of investigators of human trafficking, nationwide.

Operation Millstone: Creating and Maintaining a Successful Ongoing Undercover Chat Operation with Limited Manpower and Resources

Jason Randall

This presentation will cover lessons learned and best practices in creating and maintaining a successful ongoing undercover chat operation within the task force environment and with limited manpower and resources. In March of 2016, Homeland Security Investigations (HSI) (a 4-man office) initiated Operation Millstone in partnership with the local Special Victims Unit (SVU) task force. In its first year, this operation led to the felony arrests of almost 60 child predators and was accomplished with only one full time undercover chatter, one part time chatter, and a few who did one or two chat cases. Local SVU detectives served as the state case agents, allowing the full-time chatter to focus on the chatting and running the operation. This presentation will discuss the lessons learned, include best devices to use for chatting, ways to acquire them, educating your prosecutors, and the most effective takedown methods, ruses, and interview techniques.

Operation Swift Traveler: Philippines Webcam and Child Sex Trafficking

Steve Grocki, Jeffrey Yesensky

This case study will examine a joint investigation between FBI and HSI, that involved over a hundred individuals in the Philippines involved in the sale of images, videos, and live-streamed

sexual abuse of children, as well as in-person meetings to abuse minors in the Philippines. Subjects from across the world purchased this illicit material from the Philippine subjects. This presentation will discuss Webcam CST, a growing phenomenon in the Philippines, and the monumental task of coordination in these large-scale investigations that involve multiple domestic and international law enforcement, prosecutorial, and liaison agencies. Case strategy, as well as lessons learned by law enforcement and prosecutors will be discussed. The presenters will discuss legal considerations in extraterritorial cases like Operation Swift Traveler.

Organizing and Using Social Networking Evidence at Trial

Steven DeBrotta

This presentation will show how to organize social networking evidence to further an investigation and then present the results at trial. The goal is to show how to create and use exhibits that effectively explain sometime complicated social networking and computer forensic evidence show that jurors with different levels of computer sophistication can understand what they are seeing. The presentation will show real world case exhibits from several different cases involving individual defendants and collective case involving conspiracies.

Pediatric Fractures: How to Evaluate for Maltreatment

Arne Graff

This workshop will review different types of pediatric fractures, as well as the risks and concerns that should prompt an evaluation for maltreatment. The presenter will also discuss how to sort out the fractures that are non-accidental from those from other causes.

Phillip Bruinsma: I Didn't Marry You for Love

Jeanne Parker

This case study will walk you through how an offender developed relationships with women to have access to their children and how he hid in plain sight while he molested, assaulted and stole countless victims' innocence for more than 30 years. The presentation will walk you through how an offender can manipulate a criminal justice system and how the resources of ICAC's along with various partnerships with multiple agencies worked together put an end to Bruinsma's career of traumatizing and victimizing children. The presenter will detail how Bruinsma avoided detection, manipulated victims and used various forms of technology to produce and disseminate child pornography. Included in the presentation will be how to reach out to partner agencies including federal agencies, state agencies, NCMEC and CAC's to collect, investigate and document evidence.

Pitfalls of Data Silos: Breaking Down the Barriers Between Local, State and Federal Law Enforcement

Joey Gauthier

Local law enforcement agencies need to maintain a complete and accurate tool for sex offender investigations while fulfilling their legal requirements for updating state and federal sex offender databases. This has created a system where subsets of sex offender data exist on the local, state and federal levels separately. In this workshop, we will look at the current systems in place now, and the issues that arise from this segmented approach to offender management and reporting. We will also discuss how local, state and federal agencies are attempting to bridge those gaps. This class is recommended for supervisors, investigators, sex offender registration personnel, prosecutors, probation and parole staff.

Predators on the Dark Net, Part 1 & 2

Joe Sullivan

Technology both assists and inhibits law enforcement efforts to police child exploitation on the Internet. Investment in training officers to understand and utilize new technologies is vital, however, of equal importance is the necessity to comprehend the perpetrators of sexual crimes against children on the internet. This presentation outlines a successful police investigation and prosecution of a webmaster on the dark net. We then present a debrief of the offender and highlight some of the key learning points from his account.

Presenting Abusive Head Trauma Cases to a Jury

Leigh Bishop

This presentation is designed to instruct law enforcement and prosecutors on the use of admissions and confessions in Abusive Head Trauma cases. This presentation will also address best practice recommendations for trial preparation and jury selection.

Profile of a Predator

Graham Hill

Using behavioral analysis techniques, this presentation profiles a predatory child abuser. It explores their key characteristics and the motivations that led to a series of depraved sex offenses against young children. The presentation contextualizes what is currently known about patterns of offending.

Prosecuting Human Trafficking Cases

Brooke Grona-Robb, Hilary Wright

This workshop is designed to assist prosecutors and investigators who are tackling human trafficking cases, from initial investigation to post-conviction. A team approach between prosecutors, law enforcement, and victim advocates allows for simultaneous goals of rescuing victims and prosecuting their offenders to the fullest extent. This lecture will

help prosecutors work with law enforcement to investigate cases involving trafficking, and to gather the evidence necessary to make a successful case. The presenters will discuss charging decisions, trial preparation, accomplice testimony, defense strategies, and witness preparation. Additionally, they will discuss analyzing a case to determine if prosecution can go forward without the victim.

Protecting Legal Rights of Teen Dating Violence Victims

Bronwyn Blake, Amanda Elkanick

This workshop is designed to help advocates and allies identify the various legal remedies for teen victims of dating violence. These legal options may include; youth rights to healthcare, dating violence and sexual assault civil and criminal laws (brief), age of consent, sexual harassment, and Title IX laws, duty to report, and what options are available if a teen is unhappy at home, including information on emancipation.

Purposeful Questioning During Investigative Interviews

Thomas McGreal

One of the most important goals of an interview, other than obtaining the truth, is determining intent. Whether the employee has failed an audit, violated a procedure or committed an act of dishonesty it is important that an interviewer strategizes their game plan. The newly added Participatory Approach will help interviewers achieve the goal of obtaining the truth, while also identifying intent. This structured approach is another method to be added to an interviewer's arsenal and can also be translated to business conversations, negotiations or the typical interview. The presentation will walk through an example of strategizing this method in a variety of contexts.

Randy & Me: A Prosecutor's Story of His Childhood Sexual Abuse

Kevin Mulcahy

This presentation will recount the presenter's own story of sexual exploitation at the hands of his soccer coach, Randy. But, it will not be merely a retelling of the past. Instead, the presentation will address lessons learned from his case by combining Kevin's experience both as a victim and a long-time prosecutor of child exploitation cases. Knowing what he knows now, he believes there are lessons to be learned from his story for the investigator (Kevin's was great), the prosecutor (Kevin's was terrible), and the forensic interviewer (Kevin did not have one.) Beyond these (hopefully) useful lessons, the presentation will provide plenty of time for questions from attendees. Given the nature of our work, we don't often get to ask questions (beyond factual questions) of our child victims. This presentation will provide that opportunity.

Really, It is Not about You! How to Build a Healthy MDT

Irish Burch

MDT collaboration is vital in saving the lives of child abuse victims. No one discipline can or should do it alone. Miscommunication, disengaged team members and lack of understanding of team members' roles and responsibilities are common issues faced by many multidisciplinary teams. Unfortunately, these dysfunctional behaviors can hinder a teams' desire to protect the children in their community. Building an effective, high functioning MDT, can create an environment where children can be safe and team members can be heroes. This presentation will provide practical tools and tips for addressing the importance of effective communication, team engagement, peer accountability and conflict resolution. These key factors are essential in creating a MDT that extends beyond the disciplines and focuses on the needs of the victims.

Recognizing and Reporting Child Abuse

Ray Lara

This presentation is designed to raise awareness and to spur action from the many professionals and volunteers who work with children on a regular basis. This curriculum will educate child-serving professionals or volunteers on the basic issues of child abuse, how to recognize physical and behavioral signs of the varying forms of child abuse, and how to make a report.

Recovering Live Victims and Confessions During ICAC Interviews with Truth Verification

Jerry Crotty

This presentation will demonstrate the value of using truth verification in child traveler and child porn investigations. It will provide an overview of truth verification techniques for investigations and when properly employed, can assist in discovering undetected evidence and most importantly live victims. The presenter will also demonstrate how voluntary confessions obtained using truth verification result in more substantial and correct penalties for traveler suspects. This presentation will be presented with several case studies which show the effectiveness of using voice stress analysis in traveler operations as well as child pornography investigations. The presenter will also provide assistance to agencies interested in replicating this proven methodology.

Recovery, Justice and Healing for Domestic Minor Sex Trafficking Victims: Challenges, Progress and Hope

Andrea Sparks, Toni McKinley

Trauma from child sex trafficking is complex and traditional therapeutic interventions often do not work. Understanding how complex trauma affects brain chemistry and function, and the

consequent behaviors of victims is essential to successful criminal justice and victim services strategies. The presenters, one of which is a survivor of child sex trafficking herself, will share insights about how DMST affects the brain and about promising practices that can undo much of the damage. She will also share her own history of trauma and healing and how she is now successfully helping child sex trafficking victims heal and thrive. The other presenter will share what the Texas Governor's Child Sex Trafficking Team has learned about promising practices to help survivors heal and thrive. She will also share information about the Team's efforts and progress in developing and supporting these practices in Texas.

Reporting Children Missing from Care to NCMEC

Christie Morin, Leemie Kahng-Sofer

This presentation will provide information on NCMEC's reporting guidelines, reporting methods, and NCMEC resources. Attendees will become familiar with the NCMEC Intake and triaging process, casework flow, and recovery procedure. The importance of photos and information provided to NCMEC during the course of the case will be highlighted.

Responding to Child Abductions, Part 1 & 2

Kerri Reifel, Joshua Wilson

This presentation is presented by the FBI's Child Abduction rapid Deployment (CARD) Team and the Behavioral Analysis Unit for investigators responding to the potential stranger abduction of a child. This workshop is designed to provide the critical initial actions to law enforcement professionals responding to these events. The presenters will provide case examples and discuss the FBI's Child Abduction Response Plan (CARP), offender characteristics, victimology, and best practices. The instructors will also discuss the multitude of resources the FBI can provide to assist in the investigation of these cases.

Risk Assessment: We Can Do Better, Part 1 & 2

Michael Bourke, Joe Sullivan

Practitioners have come to rely on actuarial risk assessment tools to determine how risky convicted sex offenders may be. This presentation evaluates the strengths and limitations of such methods of risk assessment and offers some alternative perspectives to the process. Using video case studies the presenters will explore the benefits of combining rigorous forensic interviewing with polygraph as an alternative to actuarial or dynamic risk assessment tools.

Runaway Prevention IS Human Trafficking Prevention

Lindsey Kahney, Gordon Vance

Runaway and homeless youth are a high risk group for Human Trafficking. By exploring

specific National Runaway Safeline cases, participants will learn about the labor and sexual exploitation that these youth face and fall victim to. Our services are two-fold: helping youth build life skills and resilience through our free 14-module Let's Talk: Runaway Prevention Curriculum prior to running away, and/or leaving home, and helping youth survivors of trafficking through NRS' hotline and digital crisis intervention services. Special attention will be paid to the Home Free program conducted in partnership with Greyhound lines. Participants will walk away with a comprehensive resource for prevention and intervention services for the youth they serve and specific implementation options for utilizing Let's Talk.

Safety @ Facebook

Julie de Baillencourt, Karuna Nain

Facebook considers safety its most important responsibility. Attend this workshop to learn all about Facebook's approach to online safety and the policies, tools, programs and resources Facebook provides so people can stay safe.

Selection, Engagement and Seduction of Children and Adults by Child Molesters, Part 1 & 2

Cory Jewell Jensen

Participants will examine (via film clips of interviews with various types of sex offenders) some of the specific strategies offenders report using to groom and exploit children and adults. Information was collected from approximately 1,600 sex offenders who were involved in long-term, court mandated sex offender treatment. Topics include offender descriptions of how and why they: targeted certain children, families and youth serving agencies, seduced child victims and adult caretakers, and inhibited disclosure, detection and reporting. A variety of video clips, research studies and anecdotal quotes from sex offenders will be utilized to illustrate each stage of grooming behavior.

Self-Care: Responding to Sandy Hook and Working Crimes Against Children

Alicia McShane, Thomas Veivia

Law enforcement officers are exposed to a higher number of traumatic incidents than the general population. Research on the effects of trauma and continually evolving and exposure to these findings will serve the inoculate law enforcement to the sometimes devastating effects on one's quality of life and their personal and professional relationships. This presentation provides a first-person perspective from a veteran agent who was a tactical first responder to the Sandy Hook mass casualty event and its aftermath. An overview on trauma, to include the physiological and emotional effects on brain and body are outlined in this presentation using examples from both presenters and others in an effort to normalize the law enforcement officer's experience. The presenters will provide information on how to manage the long-term

effects of trauma and most importantly when to seek help.

Self-Production: What Do We Do?

Joe Adcock, Jeb Bison, Lauren Coffren, Julie de Baillencourt, Matt Dunn, Twitter Staff

The problem of self-production takes on a variety of issues, both from a law enforcement and a provider perspective. Does the self-production involve enticement of coercion that is not immediately known? Why has the minor produced images/videos of themselves and posted them online? What do we do with the minor? This moderated panel discussion seeks the perspective from law enforcement, both domestic and international, as well as from service providers and an NGO.

Sex Offenders: What Investigators, Prosecutors and Child Advocates Should Know, Part 1 & 2

Cory Jewell Jensen

Professionals involved in the investigation and prosecution of sex offenders and child advocacy should be familiar the various theories about the etiology of pedophilia and development of pro-offending attitudes, plus the more typical patterns of sexual offending committed by both juvenile and adult sex offenders. This presentation will highlight (via video taped interviews with various adult sex offenders some of the common pathways to developing deviant sexual interests and criminal sexual behavior patterns. In addition, the presenter will review a variety of studies that examine the average number of detected vs. undetected offenses sex offender engage in prior to apprehension and the degree and types of "cross-over" or "crime switching" behavior they report.

Sex Trafficking Disruption: ChatBots, Text Messages, and Automated Solutions for Intervention

Robert Beiser, Mike McCarter

Sex trafficking, including child sex trafficking is initiated online every hour of every day in cities and communities nationwide. Some of the individuals being sold are victims of force, fraud, or coercion. Although market demand is high and the challenge is daunting, new automation tools are now poised to make a breakthrough in disrupting these markets. These technologies extend local support services to victims, collect evidence and information from perpetrators, deliver effective deterrence messages, and calculate recidivism. Join this discussion to learn how Seattle Against Slavery has partnered with Law Enforcement, NGOs, and technology companies such as Microsoft to provide an automated intervention solution. This talk is intended for all audiences and it will touch on ChatBots, text messaging, and artificial intelligence (AI) analytics tools.

Sexting and Cyber-Bullying: Redefining Dating Violence in the Social Media Age and the Legal Remedies for Teen Victims

Bronwyn Blake, Amanda Elkanick

Teen dating violence is a problem and can take many forms, both verbal and physical, but has evolved to include social media. The cell phone, for example, is a common tool for an abusive boyfriend/girlfriend to control or threaten their partner and has been called an “electronic leash” for that reason. In the age of sexting and cyber-bullying it is all too easy for an abuser to demand sexually explicit materials, send unsolicited communication, or blackmail with sexual content. This presentation will explore the issue and also discuss the laws that are currently in place to deal with teen dating violence and with sexting.

Sexting Investigations and the Appropriate Consequences

Leah Treitman, Richard Wistocki

This workshop will discuss how to investigate sexting cases with the goal of finding those involved in the activity. Attendees will learn about various types of sextortion and how it unfolds, what platforms are being used, who victims are reporting to, barriers to disclosure, and the serious consequences that often result. The presenter will also explain how to use social media and other resources to identify suspects in sextortion cases. You will learn how to examine the five areas of where sexted images are stored and how to eradicate the images. You will learn about other outcomes and consequences for those involved in sexting besides criminal prosecution such as a Restorative Justice/ Diversion Program. Lastly the presenter will explain how to properly send the sexted images to NCMEC/CVIP. In this effort, we will attempt to curtail the spread of the sexted images.

Sextortion

Rachel Happel

This workshop will address sextortion and how it impacts its victims. Sextortion refers to the broad category of sexual exploitation in which abuse of power is the means of coercion and can be coupled with the threatened release of sexual images or information. Because the method of coercion is usually non-physical these cases are sometimes thought of as less egregious than cases with hands of offenses. The presentation will focus on the dynamics of sextortion, the victims, the forensic interview and special case considerations when a large number of victims are involved.

Social Media, Digital Safety & Kids: What's New, What's Now, What's Next

Katie Greer

Studies show that kids, ages 8-18, are spending an average of 7.5 hours a day in front of some screen. With that, the crimes associated with these ever-changing technologies and social media quickly follow and continue to evolve -

maybe faster than we can keep up with. Today, working with and keeping our youth safe means being constantly aware of what they're doing online - which can be vitally helpful in daily cases, and is essential to law enforcement work across the board. In this workshop attendees, you will leave with a good understanding of current app and social media trends - how and why they're being used - along with hot topic issues such as sexting, cyberbullying and solicitation through new mediums.

Social Workers: Making a Case for Safety

Jim Holler

Social workers are at risk for hostile behavior from the public when visiting clients at hotels, apartments or homes in unfamiliar or dangerous locations, especially at night. They have often been assaulted with knives and fists while attempting to visit homes where parents are facing various court actions, or where children are being placed into foster care. Most of these home visits are made by a single social worker, without a radio or other means of adequate communications and social workers have been assaulted and/or killed while making such home visits. This workshop will address safety concerns from the law enforcement perspective by providing social workers with important safety related information that they can utilize each time they make a home visit on their own. The workshop will provide social workers with ways they can identify potentially harmful conditions and defuse volatile situations when encountered.

Sovereign Citizen Defense and Child Abuse Prosecutions

Edward Chase

Investigating and prosecuting child abuse cases is a difficult endeavor by itself. But when the defendant claims to not be bound by the laws of the state or federal government, the legal proceedings can become extraordinarily complicated. Often, the arguments raised will be nonsensical and counterintuitive. This lecture will discuss the sovereign citizen movement itself, the common issues that are raised in the defense, dealing with the often pro se defendants, and practical ways to address these issues. More specifically, we will explore the use of this defense in child abuse cases, and attempt to understand why this defense is becoming more popular throughout the country.

State Prosecutor Forum

Eren Price, Carmen White

If you came to the conference hoping to discuss a specific case with someone, please bring your questions and ideas to this interactive session moderated by experienced local prosecutors. Find out how other prosecutors handle your particular concern. Be prepared to meet your colleagues and brainstorm ideas as attendees have the opportunity to address your questions. Learn about challenges your colleagues face

and how they overcome those issues.

Strangulation: A Hidden Crime in Child Abuse, Part 1 & 2

Jennifer Green, Kelsey McKay

Over the last decade as felony strangulation statutes have been enacted throughout the country, communities have been shocked at the devastating prevalence in which this disturbing assault exists between intimate partners. Through proper training, responders have started to better identify this often missed and lethal crime, finally giving this crime and the victims a voice. The next step is to educate those working with children so that we can recognize and better document when children have been either victims or witnesses of strangulation. This workshop will also discuss other areas of this crime relevant to children, such as the exposure of trauma seeing your parent strangled and the next step to stop the cycle by incorporating forensic interviewers into the process.

Strategies for Engaging Families in Services

Lisa Schuster

This presentation will discuss elementary information regarding the importance of family engagement in child welfare, medical, and mental health services from a strength-based, solution-focused perspective. Multiple case examples from patients and families referred to the REACH clinic will be included in the presentation. Factors that contribute to engagement will be discussed including a review of the knowledge, attitudes, and skills that lead to successful family-center practice. Challenges to engaging families will be reviewed and ways to address potential threats to engagement will be identified. Practical strategies and suggestions to enhance family engagement will be provided along with interventions to improve retention in services.

Suffer from BURNOUT, Giv'em the F.I.N.G.E.R.!

Mark Yarbrough

Burnout affects millions of Americans each year and has been called “the disease of our civilization.” The presenter, a former 20-year elected District Attorney personally experienced burnout, learned how to successfully overcome it, and went from “Burnout” to “On Fire!” He has since become a “burnout expert” and has written and published on the subject. Mark is a very entertaining, motivating and inspiring speaker. He has taught thousands of people how to overcome Burnout. Audience members will learn the definition of Burnout and the symptoms thereof. But more importantly, attendees will be laughing, and at the same time learning how to apply Mark's F.I.N.G.E.R. philosophy to help themselves or their co-workers avoid and/or recover from Burnout. This is a training that you won't want to miss!

Suspect Interview Techniques in Child Abuse Cases, Part 1 & 2

John Combs

This presentation will discuss interviewing suspects in child abuse cases. It will focus on the importance of rapport building and learning about the suspect's stressors. The presenter will discuss detecting and confronting deception during an interview. Additionally, the presenter will use several short case studies with actual interview excerpts in order to show how it works and what to look for. These cases include physical abuse of an infant, sexual abuse that lasted over ten years between a step-father and daughter, the sexual abuse of a three-year-old by a step-father, and the sexual abuse between a father and a daughter. The presenter will also discuss the use of recorded phone calls with the suspect. Attendees will learn when to use this tool, who should make the call and how to develop a "theme" prior to making the call. Actual excerpts from two case studies will be used as examples.

Taking the High Road: Ethical Challenges and the Multidisciplinary Team, Part 1 & 2

Dan Powers

There are many benefits of working in a multidisciplinary team, but it also brings ethical challenges as a result of conflicting values and roles. This workshop will examine ethical issues as they apply to members of multidisciplinary teams. Ethical principles are the fundamental ground rules of decision-making, not just factors to consider. Any decision made in a case has ethical implications for the team, and reflects the decision maker's sensitivity and commitment to the team concept. Each member of a team that is affected by a decision will deal with the consequences of that decision. This concept reinforces our professional obligation to make all reasonable efforts to anticipate possible consequences and take reasonable steps to avoid unjustified harm to others. Ethical decision-making extends beyond the team to the client. Issues such as informed consent, confidentiality, record keeping and client relationships need to be examined by individual team members and the team as a whole. Clients' rights, which are uniquely related to the multidisciplinary team approach, will be examined. This is a two-part workshop with a short "assignment" that will meet the 3-hour Ethics requirement for most licensing boards.

Technical Testimony: Making Sure the Jury "Gets It"

John Sammons

Being an expert witness is tough. The stakes are high and the challenges are many. This is especially true with highly technical testimony like that surrounding digital evidence. Crimes against children often involve digital evidence and technology in some form or another. Experts need to deliver this testimony in such

a way as to maximize the jury's abilities to understand and retain it. Expert witnesses can benefit from applying some of the brain-based teaching techniques used by the best classroom teachers. This workshop will cover a wide array of topics including the use of visuals, effective explanations, cognitive load, slide design, analogies, the impact of a juror's prior knowledge, and more.

Technology Trends: What is the New Evil on the Internet?

Ben Butler, Chris Roosenraad

This session will review current and future trends in Internet technology with a focus on technical issues that can have an impact on Internet criminal investigations. Topics to include the growth in end-to-end encryption, persistent monitoring, IPv6, NAT, CGN, the "Internet of Things", TOR, the rise of "2 factor authentication", and the growth of "multipathing". This presentation is designed for anyone who wants to know where the Internet is going.

Testifying as an Expert in Commercial Sexual Exploitation of Children Cases

Brooke Grona-Robb

This presentation is designed to assist prosecutors, law enforcement officers, forensic interviewers and others who are tackling human trafficking and commercialized sexual exploitation of children cases, to develop and prepare for expert testimony. It is crucial to define who has expertise that can help the jury understand the special issues involved in CSEC cases. Once these areas of expertise are defined, helping witnesses understand their role as experts and preparing them to testify is important for success. This lecture is meant for both prosecutors as they are approaching CSEC trials and for our experts as they prepare for testifying in court.

The Best Kept Secret in Law Enforcement: Using Fusion Centers to Protect Children

Lexi Quinney

Since 9/11, the nation has experienced the creation of more than 78 Fusion and intelligence centers across the nation. These centers were created to provide a platform to receive suspicious activity reports related to terrorism. Once received, the information is analyzed, shared and disseminated. In 2009, the Texas Department of Public Safety began utilizing the same resources and concept to identify High Risk Threats to children. This proactive approach was implemented to assist law enforcement with identifying possible threats to children in their jurisdiction and sharing that information with other agencies. This presentation will provide options law enforcement and others have to report information that may typically go unreported, but still serves a value. It will also share examples where the collection of

information and analysis has proven useful to law enforcement.

The Bottom Line: Why You Can't Afford to Overlook Wellness in Your Team

Beth Medina, Dan Powers, Michael Sullivan, Elizabeth Tow

How do you increase efficiency and production while decreasing costs — have a healthy team! Not sure where or how to start? The answer is NOW and HERE! This presentation will look at incorporating wellness from a supervisory level, focusing on setting up a wellness program for new team members and a maintenance program for current team members. Ideas will be shared from ICAC Commanders that have put wellness practices into place and mental health professionals that support the teams.

The Dark Net and Emerging Technologies: Where are Teens Going and Offenders Following?

Justin Fitzsimmons, Lauren Wagner

As the internet continues to evolve new layers populate where offenders commit criminal offenses. One such area is known as the Dark Net. Participants will learn how the Darknet works and how potential criminal activity is facilitated on the Darknet is crucial to investigating and prosecuting child exploitation cases. In addition, new software applications are being added to mobile phones and tablets daily. This presentation will demonstrate several of the newer applications for mobile devices that are popular for teenagers. Participants will learn about vault applications and the ability to secretly store information.

The Dark Side of P2P: Apps and Shared Content in the Forensics Landscape

Jamie McQuaid

More and more illicit content is being shared via P2P (Peer to Peer) apps and more advanced techniques such as streaming are making these investigations more difficult. Developing the right techniques to examine those apps is imperative. In this presentation, a forensic expert will discuss the implications of the growing popularity of P2P apps for chatting, sharing files, streaming video and live content. He will explain how the growing use of mobile apps and Internet is impacting the ubiquity of content being shared and viewed on P2P apps and networks. You will learn how to investigate these apps and content in child exploitation cases, and understand how people are trying to cover their use of P2P.

The Five B's of Child Physical Abuse: Bruises, Burns, Bones, Bellies, and Brains, Part 1 & 2

Kristen Reeder

This presentation will review the variety of injuries seen in cases of child physical abuse. The discussion will be case based and include

examples of abusive and non-abusive injuries. The lecture will be geared for CPS workers, law enforcement investigators, and attorneys to learn the basic aspects of child physical abuse injuries.

The Importance of Truth Verification in Child Sexual Abuse Cases

Jerry Crotty

Some of the most difficult confessions for law enforcement officers involve crimes against children. These types of cases are unique, because suspects are in fear of the immediate change of life and the stigma that is attached to the crime of offending against a child. The Manatee County Sheriff's Office developed a technique that incorporates the use of the Computer Voice Stress Analyzer in their investigations to obtain a 90%+ confession rate. This agency uses truth verification in the investigation of all sex crimes. This technique has served to identify offenders in cold cases through confessions as well as to clear innocent people under suspicion. The technique has also been utilized to assist CPS investigators in their cases. This presentation will provide an overview of CVSA and how it works. Actual case studies and interview techniques will be discussed during this presentation.

The Internet of Things: Understanding and Using IoT to Prove Your Case

Justin Fitzsimmons, Lauren Wagner

The Internet of Things refers to physical devices having the capability to connect to the Internet to send and receive signals and data. As technology evolves into every facet of our daily lives, it is important that MDT's develop an understanding of what devices are IoT capable and potentially what information may be recoverable to assist in investigations, prosecutions or adjudications. Participants will learn what devices are currently IoT, emerging technology for IoT, and ways to detect what may be contained on IoT devices. Issues of search and seizure for IoT devices will also be discussed.

The Perfect Pick: Investigating and Prosecuting Cases with Victims Who Have an Intellectual Disability

Amy Derrick, Jen Falk

Approximately 6.5 million people in the United States have been diagnosed with an intellectual disability. Children and adults with an intellectual and/or developmental disability often make the perfect targets for a sexually violence offense. They also provide a unique set of challenges in the investigation and prosecution of sexual assault cases. This presentation will address best practices for the investigation of these types of cases as well as provide strategies for evidence gathering, charging decisions and successful prosecution.

The Three Coolest Little-Known Social Media Searches

Justin Fitzsimmons, Lauren Wagner

Social media is a common part of everyday life, so there is little surprise that it has become commonplace to investigations. However, there are capabilities within social media websites that are little-known within the Crimes Against Children community. This lecture will detail how three specific social media searches can be used to enhance the investigation and prosecution of cases. Topics discussed will be using the geocode: search in Twitter to find tweets from a specific latitude and longitude, using site: in Google to search specific social media websites, and using URL manipulations in Facebook to find photo likes and comments from a target profile.

The US Marshals, the Adam Walsh Act and Sex Offender Registries: Separating Fact from Fiction

Tim Orava, Justin Vickers

This presentation will cover topics related to the US Marshals Service and its efforts to work with state, local and other federal agencies to identify, locate and apprehend unregistered or non-compliant sex offenders and investigate violations of 18 USC §2250. In addition, the presenters will broadly discuss sex offender registration in the US ten years after the enactment of the Adam Walsh Act, and will highlight some common misperceptions and differences between state and federal sex offender registration requirements, including who has to register, for what duration and who is posted on public websites.

The Windshield Approach to Wellness: What We Learn from Looking in the Rear-View Mirror and How We Can Prepare for the Future

Beth Medina, Dan Powers, Michael Sullivan, Elizabeth Tow

In this workshop, you will learn from those that have been to hell and back and now see the topic of wellness as a top priority. Professionals in the industry will tell their personal stories of faltering, realizations, and successes in maintaining their wellness and resiliency.

Thinking Outside the Box: Creative Approaches to the Trauma Narrative

Kathy DuMond, Lauren Hurley

When working with children who have experienced sexual abuse or complex trauma, developing and processing the trauma narrative can be challenging. Instead of being deterred, clinicians can accommodate different expressions of self to help children find their voice. In this presentation, clinicians will learn creative interventions to enhance the processing of the child's trauma while working within the fidelity of TF-CBT.

Timeline Development: A Tool for Investigators

Bonnie Armstrong, Margaret Patterson

Child abuse cases have many documents and facts to analyze, process and then make a determination. In this workshop, the importance of timelines will be discussed. Timelines offer a way to take complex case facts and present them in a simplified, linear manner. When sharing the case with team members, timelines offer a case "snap-shot" to quickly understand the case. In court, timelines have been noted by jurors as the single most important visual shown that helped them understand the case and be convinced. The timeline developed must be visually interesting, cohesive, and convincing and include basic elements such as the date, timeframe, victim, witnesses, the suspect, and other key elements of the case. Timelines examples will be shared with the group to compare/contrast different methods and styles.

Tom Duncan: A Social Service Nightmare

Kristin Joseph, Elizabeth Yusi

This case study details the investigation and prosecution of Tom Duncan, a potential adoptive father with bad intentions. After allegations of suspicious inappropriate behavior, and other bizarre behavior by Duncan, the children were removed from Duncan's care and officials began searching for a way to keep them safe from detection. Duncan was so desperate to adopt two adolescent boys separately over the course of a year and a half that he wouldn't take no for an answer. Duncan's actions included hiding GPS tracking devices within their belongings, attempting to smuggle them cell phones for secret contact, and tracking one on a school field trip. This presentation will discuss the ways law enforcement had to constantly evolve to expose Duncan's desperate attempts to locate the boys, and to hide or destroy evidence of his actions. Presenters will discuss the many different investigative techniques used to include cellular tower geolocation analysis, cloud based forensics, and more.

Torture as a Form of Child Abuse: System Failures and a Little Boy's Survival Against the Odds

Douglas Faini, Cecelia Gregson, Francesca Nix, Rebecca Wiester

This presentation will examine the multi-disciplinary response to the systematic and prolonged torture of a six-year-old boy by his parents. The case involved issues of complex police and medical investigations and employed an innovative medical analysis of child torture and the physical, mental, and emotional indicia thereof. The presenters will detail the investigation, and the systemic failures that enabled the abuse to continue uninterrupted. Lastly the presenters will discuss the three month trial where resulted in the defendants being convicted and sentenced

to twenty years in prison resulting termination of parental rights.

Triple Threat: James Allen-Cyberstalker, Hacker, and Child Pornographer

Randall Garver, Michael Hockwater

This presentation will detail the investigation and prosecution of James Allen, a Michigan resident, who engaged in significant cyberstalking activities against 18 minor girls all located in the Buffalo, NY area. Allen committed CP offenses against four of the victims as well. The presenters will discuss Allen's deceit, manipulation, mean of hacking various accounts, and the fear and embarrassment of the victims. They will also discuss the investigative techniques used to collect evidence from Facebook, Skype, Twitter, and other electronic service providers and examples of the actual chat messages used by Allen to victimize the girls.

Trust & Safety: Kik's Approach to a Safe Chat Community

Michelle Micks, Nicole Nearing

This presentation will provide an overview of Kik's processes and resources available for global law enforcement in criminal investigations. The Trust & Safety team will discuss how Kik works, new product features and data that may be available pursuant to legal process. They will also provide an overview on Kik's latest safety features and privacy controls available to users as well as ongoing safety initiatives.

Turning the Case Upside Down: Rethinking the Art and Science of Suspect Interviews

Russell Strand

It's time to take a fresh look at an age-old problem, suspect interviews. Reducing false confessions, deception, and false information have long been at the center of criminal justice interest and research. The desire to determine the truth, deterred neither by fear nor prejudice, has been the focal points of research and development of proper interview/interrogation techniques. This presentation will review the history of interrogation techniques and discuss the impact of numerous suspect interview/interrogation techniques and the efficacy of these techniques including substantial research that will assist fact-finders in determining some short falls in current interview techniques. This presentation will challenge long-held beliefs in what works and what doesn't. Recommendations, including the newly developed suspect forensic interview technique will be presented.

Twelve Elements of a Successful Forensic Investigation

Bonnie Armstrong, Jason Bobo

Professionals charged with the duty to protect children have a multitude of evidence to document, interviews to conduct, and leads to follow. In these minutiae of facts, photos,

lists, and lies, cases can become twisted, and confusing. This workshop details The 12 Elements of the Forensic Investigation©, a proven format for organizing and investigating cases of child physical abuse. Case studies will show how utilizing these 12 elements including: established protocol, multi-disciplinary team, consent, scene investigation, physical evidence, testimonial evidence, electronic and documentary evidence, timeline development, scene re-enactment, interrogation, resources, and ongoing training results in the development of strong cases for prosecution. Participants will be provided with a Pocket Investigator's Guide of The 12 Elements of the Forensic Investigation©.

U.S. Marshals Training: Use Case Studies and Benefits of OffenderWatch

Dan O'Donnell, Joel Shoultz

A session for USMS users only.

Uber's Law Enforcement Portal

Linda Isley, Billy Kewell, Lisa O'Connor

Uber is excited to showcase our new Law Enforcement Portal. We will highlight the features and benefits of the Portal, a fast, secure, user-friendly way for law enforcement to request information and manage cases. We will also provide time to assist law enforcement with creating accounts. Attendees who wish to sign up for access to the Uber Law Enforcement Portal are encouraged to bring their tablets or laptops to this workshop.

Under-Reporting of Sexual Abuse in Orthodox Jewish Communities

David Katzenstein

The fact that child sexual abuse exists in all communities in all areas of the globe is generally accepted as fact. Child sexual abuse is prevalent across all communities, neighborhoods, and socioeconomic classes. It is just as prevalent in Orthodox communities even though laws exist among the Orthodox that are designed to regulate sexual contact, and in more ultra-Orthodox communities, there is also a segregation of the sexes. This lecture will explore the nuanced, acute factors that significantly influence the under-reporting of child sexual abuse within Orthodox Jewish communities, ways in which these communities have dealt with reporting sexual abuse in the past, progress on this issue, and factors that continually impede reporting of abuse. An important element of the presentation will include the issues facing CPS and law enforcement working within this insular population and an outline of recommendations as to how overcome many of these ongoing problems.

Understanding and Investigating Child Burn Injuries

Jim Holler

Infants and toddlers are most likely to be burned intentionally. Child abuse burn victims are

typically under the age of 10 with the majority of them being under the age of 2. Immediate identification of intentional burn victims by those individuals first responding to the call for assistance is crucial because most of the victims are unable to speak for themselves. This workshop will provide law enforcement officers and CPS workers with information that will assist them in distinguishing the difference between intentional and accidental burns. It will also assist the investigator by providing methods that can be used in recreating the incident to help prove or disprove the caregiver's statements as to how the burns were sustained.

Understanding Cases of Child Torture

Rebecca Wiester

This workshop will discuss cases of child torture and current literature regarding these cases. The attendees will understand how to detect potential cases of child torture, understand how to interview potential victims and understand the difference between child torture and other kinds of child abuse and neglect.

Understanding Cutting Edge Criminal Tradecraft

Steven DeBrot

This presentation will describe the present and emerging communication, high technology, and social networking tools offenders use to communicate with each other and victims. Topics will include data encryption, cell phone applications, cloud storage, web-based communications, and traditional tools. The goal is to provide the student with ways to differential offenders based upon their conduct as part of an accurate danger assessment model. The presentation will include multiple case examples.

Understanding Sex Offenders, Part 1 & 2

Jim Tanner

This session focuses professionals on the cognitive set of the intrafamilial and position of trust sex offender. We will expand and clarify elements of investigation, prosecution and effective containment. We will discuss sex offenders' perceptions, ideation, grooming strategies and cognitive processes. The impact of the Internet and the offenders' digital behavior will be explored and explained. Participants will leave this session with a new understanding of sex offenders, their thoughts and digital behaviors which will enhance the ability to investigate, prosecute, supervise and treat sex offenders.

Understanding the Psychopathic Offender

Melanie Malterer

Psychopathy has been referred to as "...the single most important clinical construct in the criminal justice system" (Hare, 1996) and by others as "the most important and useful psychological construct yet discovered for

criminal justice policies" (Harris, Skilling and Rice, 2001). This workshop provides compelling support for these claims and sheds light on the importance of understanding and identifying psychopathy in criminal offenders. The audience will learn about the construct of psychopathy, its relationship to risk assessment and officer safety, and prevalence rates in society and prison populations. Common myths about psychopathy will be debunked. The audience will be given strategies for the identification of psychopathic traits in offenders and how to utilize this information in law enforcement contexts.

US v. John Abrams: Overcoming Repeated Failures While Surviving the Pro Per Defendant

Glenn Booth, Carla Higginbotham

This case study will explain how bias against sexual assault victims coupled with a sociopath con-man permitted a dangerous sexual predator to perpetrate sex crimes for over three decades without ever being prosecuted. John Abrams kidnapped two 15-year-old victims, one of whom he repeatedly raped. These crimes could have been prevented had investigators and prosecutors taken previous reports of sexual assault by Abrams seriously. This presentation will describe the investigation and prosecution that finally led to Abrams' conviction and 40-year sentence. The presenters will provide various insights and tips related to prosecuting a case of kidnapping when the victim was initially complaint, overcoming a deficient investigation, and most of all, how to deal with a defendant who elects to represent himself.

US vs Calvin Bernhardt: Philippine Online Child Exploitation

Gary Delorme, Randy Helderop

This case study details the arrest and prosecution of Calvin Bernhardt on charges related to his online exploitation of a child in the Philippines. The presentation will provide information on how investigators developed a NCMEC CyberTipline report from Facebook into an international investigation, which resulted in multiple witnesses from the Philippines, including the victim and her mother, traveling to the United States to testify at trial. The presentation will address issues such as dealing with voluminous records, international coordination, and overcoming language and social barriers to prosecute a case. The presentation will also discuss Bernhardt's repeated attempts to tamper with witnesses even following his conviction at trial.

Use of Expert Witnesses in Child Physical and Sexual Abuse Cases

Mary-Ann Burkhardt, Barbara Knox

We oftentimes now have to use medical expert testimony to prove not only what happened and how something happened, but also to prove the absence of evidence and debunk defense myths. This joint workshop, by an attorney and a doctor,

will discuss that evidence can be introduced through expert testimony in both physical and sexual abuse cases, how to partner with your medical expert to prove negative evidence in child abuse cases, and also how to work with your medical expert to debunk the most common defense myths in child physical and sexual abuse cases.

Using Artificial Intelligence to Identify Child Exploitation on Social Platforms

Adam Hildreth, Peter Maude

Social platforms where young people reside are a magnet for child groomers. With thousands of social platforms, a rising number of users and billions of conversations taking place each day, how do you even start to identify a potential child groomer amongst the crowd? How do you identify them with and without the actual chatter? The presenters will talk through the machine learning and signal processing methods they have used over the decade to spot over ten million sexual predators as well as demonstrating a live view of potential pedophile activity.

Using Artificial Intelligence to Prioritize and Solve Crimes

Brad Leitch, Chris Priebe

In recent years advances in artificial intelligence has allowed for self-driving cars, voice controlled automated assistants on phones and smart home automation. In this session, the presenters will explore what artificial intelligence means for law enforcement and how it can be applied in a meaningful way to provide triage and help solve cases faster. This is a non-technical session that will help prepare investigative teams for upcoming technology innovations.

Using Craigslist and Backpage for Undercover Operations

Jesse Crowe, Jim Valley

This presentation will involve the set-up of operations when using Craigslist and Backpage. Personnel needs will be discussed as well as safety concerns. Examples will be given of small and large operations. Postings and responding to ads with certain techniques will also be discussed. Attendees will learn about Bit Coins and how they affect posting ads. Also, attendees will learn about the proper equipment needs to success and overcome some of the barriers involved in the operations.

Using Predictive Analytics to Better Allocate Sex Offender Management Resources

Jay Lathwell

This workshop will discuss the use of predictive analytics in policing. The basics of data analysis as well as data sources will be discussed. All of this will be brought together in a discussion of a strategic plan used by the Baltimore Police Department to manage their sex offender caseload.

Vehicle Forensics: An Emerging Evidence Source

John Sammons

Investigators today readily recognize a suspect's computer, cell phone, or tablet as a potentially viable source of evidence. There is another source that could be equally as fruitful; the suspect's car. In 2013, there were approximately 23 million connected cars on the world's roadways. By some estimates, that number will swell to over 152 million by 2020. Computer systems inside of these connected cars can store a wide array of artifacts that could prove extremely valuable in a criminal investigation. This workshop will examine the basics of connected cars, potential artifacts found in vehicles, the acquisition process, the challenges investigators will face trying to recover them, a glimpse into the future, and more.

Victim ID and Adobe Technology, Part 1 & 2

Jim Cole, John Penn, II

In this workshop you will learn how victim identification specialists at Homeland Security Investigations (HSI) utilize cutting edge technology to bring out details and clues used to track down victims and offenders of child abuse material. You will also learn how Adobe Creative Cloud and other tools are helping in the fight against child exploitation with technology breakthroughs in their tools.

What Every Prosecutor Needs to Know about Forensic Interviewing

Mary Sawicki

This presentation will highlight how prosecutors can effectively utilize forensic interview techniques as they prepare a child for trial and as they conduct a direct examination of a child in the courtroom. How to formulate questions appropriate for a child's age and stage of development will be discussed.

What Sex Offenders Can Teach Us About Interviewing

Cory Jewell Jensen

This presentation examines the relationship between confession rates and sex offender characteristics (ie., offender age, relationship to victim, personality type, offense history and prior experience with the criminal justice system). Studies that examined the effectiveness of interviewer style will be reviewed and the presenter will provide anecdotal comments from 121 admitting adult male sex offenders about their thought process during the police interview. Comments focus on the reason they declined to be interviewed, lied about their sexual offending, or confessed. Video clips will also be used to illustrate specific interview strategies and recommendations for specific interview comment/questions from 26 veteran child abuse detectives from 10 law enforcement agencies will be offered.

What the Offender Has to Tell Us: Sex Offenders in the School Environment

Steven DeBrot, Michael Johnson, John Pirics

The defendant in *United States v Darrell Hughes* was a long-term school counselor and treatment provider for teenager in a local community. After his apprehension for producing child pornography with multiple victims, he was convicted and agreed to participate in video recorded interviews about his criminal tradecraft and previously successful methods to avoid detection. This seminar will show portions of these interviews and provide public information for parents, teachers, and school administrators to use in training and education efforts. The goal of this lecture includes providing teachers and school officials with reasons to rapidly and effectively report criminal activity or suspicious behaviors in the school environment.

What to Do with Cellular Call Detail Records: The CAST Approach, Part 1 & 2

Wendell Cosenza, Richard Fennern

This presentation will be a fast moving and motivating tutorial of how to gain the most investigative leads and evidence from call detail records (CDRs). Investigators appreciate and often obtain CDRs during investigations. However, few investigators know how to quickly vet the records to obtain the information they need to solve the case or find the victim in an efficient manner. Attendees will be shown the methods and tools used by the FBI's CAST team for each of the four major cellular providers (ATT, Sprint, VZW, and T-Mobile). Topics covered will include call record explanations, Microsoft Excel tips, the importance of per call measurement data (PCMD), and introduction to CASTViz, a free mapping solution available to law enforcement. The information will be presented through numerous successful case solutions.

When the Criminal Justice System Fails: The Repeated Sexual Abuse of a Child

Lindsey Campeau, James Isaacs

Mwangi Mumpfield was convicted in 2008 of sexual assault of his eight-year-old step-daughter. After his incarceration, he was legally not allowed near children; however, the child's mother allowed him access. Over the next eight repeatedly sexually assaulted the same child and videotaped it. This case highlights the failure of the justice system to stop the sexual abuse of a child abuse, in spite of the "red flags" exhibited by the victim. This presentation will discuss the failures of law enforcement, CPS and forensic interviewers to identify the abuse. The presenters will also discuss the investigative technology used to apprehend the suspect and the bifurcated prosecution through efforts from federal and state law enforcement leading to the both the offender's conviction for sexual assault and

the mother's conviction for her role in not preventing the abuse.

Why See the World Through the Eyes of a Sex Offender?

Joe Sullivan

If we don't understand how individuals sexually exploit children and groom the protective adults in their world we cannot effectively implement child safeguarding. Professionals who enhance their knowledge of offender behavior can recognize situations where children might be at risk or engage more effectively with perpetrators, victims and their families. When we understand the complexity and subtleties of the problem we can better implement policies and procedures within our organizations and ensure effective safeguarding for all. Using video interviews with sex offenders this presentation provides insights into the motivations, thoughts and behaviors of child sex offenders.

WI CAN: Partnering to Protect Children

Rita Kadamian, Dave Smith

Accurate detection of and effective intervention for all types of child maltreatment require a coordinated interdisciplinary response by law enforcement and child welfare, usually with input from medical professionals. While the law enforcement and child welfare responses are statutorily mandated and funded, the medical response beyond making a mandated report is not. Engaging medical providers in child maltreatment investigations and assessments is vital, yet very challenging due to resource limitations, fragmented responses, and lack of training and meaningful engagement by medical professionals. This workshop will describe Wisconsin's response to this issue through the development of the Wisconsin Child Abuse Network and describe current strategies implemented to improve medical input in child abuse investigations.

Without Borders: Bilingual Forensic Interviewer and Family Advocate Collaboration

Jennifer Cano, Jesse Gonzalez, Suzzie Gonzalez

Forensic interviewers and family advocates play very crucial roles with children and families in a child abuse investigation. When meeting with a family, this process can be one that is daunting and intimidating, especially now with the current state of changes in the country. There are many challenges that could affect a child abuse investigation when working with undocumented families, specifically, the Hispanic population. This training will focus on the forensic interviewer and family advocate collaboration, the importance of providing undocumented/documented families with the right information and support, and how new changes in USA legislation could affect children and families coming forward.

Working with South Asian Victims and Their Families

Heena Khan

The presenter, who is an American Muslim Licensed Professional Counselor, will discuss the acculturation and cultural dynamics that are important to be aware of when providing services to South Asian victims and families. She will share her unique counseling experience and will educate participants on trauma-informed and culturally competent practices when working with these children and families. Attendees will learn ways to work effectively and attune to the unique needs of these children and families.

Working with Victims with Disabilities in Child Abuse Cases

Mary Sawicki

This workshop will offer concise and practical tips for effectively working with victims who have disabilities in child abuse cases. Suggestions for child protection professionals on how to effectively prepare for their interview of the child and how to conduct developmentally appropriate questioning of the child will be highlighted.

You Can Run, But You Cannot Hide

Sandy Moreland, Reynie Tinajero

This presentation will detail how mutual cooperation among federal, state and local law enforcement led to the apprehension of a suspect wanted for Capital Murder in the death of a toddler from severe head trauma. The presenters will discuss the efforts and methods of the law enforcement agencies involved that tracked this killer from the hospital where his victim died in her mother's arms through his attempt to flee to Canada. The discussion will also include the obstacles the prosecution faced in their efforts to obtain out-of-state material witnesses.

You Got the Call, Now What?

Michael Hernandez, Bernadette Yupit-Martinez

Child sexual abuse cases are one of the most complex crimes in existence. As professionals who are involved in a multi-disciplinary team, it is imperative to know what to ask and when to ask questions when speaking with alleged victims. Asking a child detailed questions outside of a forensic interview can at times be detrimental to the credibility of the child and integrity of the case at trial. This presentation will assist those who are first responders to victims of sexual abuse, such as patrol officers and school resource officers, to be able to understand the fine line of obtaining information you need at the reporting stage and obtaining details that may cause problems down the line.

You Wanna Talk About Private Parts?

Michael Margolis, Megan Peterson

Screening children for sexual abuse can be overwhelming and often times contains critical information for an investigation. Proper screening techniques for child abuse becomes an imperative tool for CPS workers. Do you know what questions to ask and when to stop a sexual abuse screening? Do you know when a case should by-pass a screening and come directly to a Children's Advocacy Center, for a forensic interview? As a CAC employee, do you know how to implement this information into your own center? In this lecture, attendees can expect to learn how to screen children for sexual abuse, what questions to ask if a child discloses, when to stop, and how to determine when a case should be seen at a CAC.

Zachary Garrett: Pimp Daddy and His Two-Year-Old Daughter

James Holdman, Jr., Jennifer Tatum

This case study details the investigation of Zachary Garrett, a father of a two-year-old daughter and 6-month-old son who was advertising on Craigslist looking to find individuals and couples to take part in various sex acts to fulfill his fantasies. He was offering to "bring his two-year old daughter into the mix" to be sexually abused. The presenter will explain how he contacted, communicated and eventually met Garrett in an undercover capacity to verify the criminal activity. During the meeting, Garrett offered to allow the presenter the opportunity to sexually abuse his daughter. The presenter will discuss what should have been an easy prosecution and the rescue of two children, but was not. What did occur was declination of prosecution by federal authorities in Kansas and state charges filed by a Kansas Prosecutor with a suggestion of probation for Garrett. The presenter will explain how he was able to secure federal charges on Garrett in the Western District of Missouri in an attempt to prevent a guilty plea on state charges in return for probation. Lastly, the presenter will discuss the Kansas state prosecutor who got assigned to the case and made it her mission to send Garrett to prison for 25 years.

EXHIBITORS

3rd Millennium Classrooms

<https://web.3rdmil.com/>

We specialize in developing online programs with the individual and community impact in mind. Red Flags is an online training course on human trafficking awareness and identification. The goal of Red Flags is to inform and empower people to recognize trafficking situations and bring victims to safety. The training is designed for individuals, employees and volunteers, and it can be used as a part of a larger curriculum or training program. It is customizable for either a beginner or someone with prior knowledge and can include industry or agency-specific information. In addition to our Red Flags training course, we provide programs to prevent and correct high-risk behaviors. Our courses address issues with alcohol, marijuana, unmanaged anger, bullying, sexual assault, domestic violence, abuse, impulse control, and theft. We have been serving courts, probation and diversion programs, treatment centers, community agencies, colleges, and secondary schools since 1999.

#20

AccessData

<http://accessdata.com/>

Whether it's for investigation, litigation or compliance, AccessData® offers you powerful solutions that put the power of forensics in your hands. For 30 years, AccessData has worked with more than 130,000 customers in industries from government to legal, from corporations to international business, to understand and focus on your unique collection-to-analysis needs. The result? Products that empower faster results, better insights, and more connectivity. For more information, visit www.accessdata.com.

#74

ADF Solutions, Inc

<http://www.adfsolutions.com/>

ADF Solutions is the leading provider of digital forensic and media exploitation tools. These tools are used for processing and analyzing computers, external drives, drive images, and other media storage (USB flash drives, memory cards, etc.). ADF forensic tools are all about speed, scalability, ease-of-use, and relevant results. The tools have a proven track record in reducing forensic backlogs, streaming digital investigations and rapid access to digital evidence and intelligence. Our customers include law enforcement, defense and other government agencies worldwide.

#13

Association of Prosecuting Attorneys Child Abuse Prosecution Project

<http://www.childabuseprosecution.apainc.org/>

The Association of Prosecuting Attorneys is pleased to offer a training and technical resource for child abuse prosecutors and their multidisciplinary teams. The Child Abuse Prosecution Project, a VOCA-funded project through OJJDP, is staffed with a team of child abuse professionals and is readily available to provide consultation, technical assistance and training.

#69

ATOLA TECHNOLOGY

<http://www.atola.com/>

FAST FORENSIC IMAGING, EVEN WITH DAMAGED DRIVES! Get more digital evidence faster with ATOLA INSIGHT FORENSIC. The first and only forensic data acquisition tool that gets data from both good and even damaged hard drives and it's one-button simple to use! Come see a demonstration and find out why digital forensic professionals from government, military and law enforcement agencies around the world choose INSIGHT FORENSIC as their main imaging tool.

#19

Attorney General of Texas Crime Victim Services Division

<http://www.texasattorneygeneral.gov/>

The Crime Victims' Compensation Program is dedicated to ensuring that victims of violent crime are provided financial assistance for crime related expenses that might not be covered by other resources. The fund can help eligible victims pay for medical or counseling bills or cover the cost of a funeral for a loved one who has been killed.

#68

Belkasoft

<https://belkasoft.com/>

Founded in 2002, Belkasoft is a global leader in digital forensics technology, known for their sound and comprehensive forensic tools. With a team of professionals in digital forensics, data recovery and reverse engineering, Belkasoft focuses on creating technologically advanced yet easy-to-use products for investigators and forensic experts to make their work easier, faster, and more effective. With this focus in mind, Belkasoft introduces their flagship product, Belkasoft Evidence Center - an easy-to-use, integrated solution for collecting and analyzing digital evidence from mobile and computer devices. Customers in law enforcement, police, military, business, intelligence agencies, and forensic laboratories in 130+ countries worldwide use Belkasoft Evidence Center to

fight homicide, crimes against children, drug trafficking, data leakage, fraud, and other online and offline crimes. Belkasoft LLC is a US-based company with offices in California. Our mailing address is 1016 Middle Ave #6, Menlo Park CA 94025.

#31

Berla Corporation

<http://www.berla.co>

Berla's team of digital forensic and cyber security experts stays ahead of the curve providing solutions for extracting data used to solve cases, and preventing vehicle network breaches before they occur.

#21

BIS Digital Inc.

<http://bisdigital.com/>

From concept to completion, BIS Digital provides total turnkey solutions and integrated systems based upon the specific needs of our users that include concept and planning, engineering of solutions and systems, purchase of product, installation, personal product and service training, and on-going support and service.

#33

BlackBag Technologies

<https://www.blackbagtech.com/>

BlackBag® Technologies is a developer of innovative forensic acquisition, triage, and analysis software for Windows, Android, iPhone/iPad, and Mac OS X devices. The company's flagship product, BlackLight, has been adopted worldwide by many digital forensics examiners as a primary analysis tool. Mobilyze, BlackBag®'s groundbreaking mobile device triage tool, empowers virtually all law enforcement personnel, with or without specialized experience, to capably triage and report on data from smartphones. In addition to software, BlackBag® also develops and delivers expert forensic training and certification programs, designed to meet the needs of law enforcement, military and private sector examiners. Taught by an elite team with considerable law enforcement and digital forensics experience, the courses are tailored to address realistic, multi-platform scenarios simulating the daily challenges of digital evidence.

#38

Bluebear LES

<http://bb-les.ca/>

BlueBear is a boutique software shop focused on forensic software solutions for Law Enforcement. BlueBear's flagship product is called LACE. LACE is a unique tool designed to assist investigators in the automated categorization of media evidence files (images & videos) that have been seized or

confiscated. This unique tool has been created to significantly reduce the amount of time required, by an investigator, to analyze and categorize seized images, videos, text and audio files found on computer and hard drives.

#5

BookWoman

<http://www.ebookwoman.com>

BookWoman is an independent feminist bookstore located in Austin, Texas. We specialize in providing diverse and unique resources in support of the mental health and cultural needs of women and children across their lifespan. Additionally, we curate and provide books and educational materials in support of conferences, presenters and attendees. We have been a community and statewide resource for 40 years. www.ebookwoman.com.

#46 & 47

Callyo

<https://callyo.com/>

Callyo is the world's #1 mobile phone technology for law enforcement to catch and prosecute child predators, human traffickers, and those who would exploit our children.

#43

Cellebrite Inc.

<http://www.cellebrite.com/>

Cellebrite is the world leader in delivering cutting-edge mobile forensic solutions. Cellebrite provides flexible, field-proven and innovative cross-platform solutions for lab and field via its UFED Pro and UFED Field Series. The company's comprehensive Universal Forensic Extraction Device (UFED) is designed to meet the challenges of unveiling the massive amount of data stored in the modern mobile device. The UFED Series is able to extract, decode, analyze and report data from thousands of mobile devices, including, smartphones, legacy and feature phones, portable GPS devices, tablets, memory cards and phones manufactured with Chinese chipsets. With more than 30,000 units deployed across 100 countries, UFED Series is the primary choice for forensic specialists in law enforcement, military, intelligence, corporate security and eDiscovery.

#28 & 29

Child Welfare Information Gateway

<https://www.childwelfare.gov/>

Child Welfare Information Gateway provides access to timely, practical resources that help child welfare, adoption, and related professionals protect children and strengthen families.

#84

Children's Advocacy Centers of Texas

<http://www.cactx.org/>

Children's Advocacy Centers of Texas, Inc. (CACTX), a 501(c)3 non-profit organization, is the statewide membership association representing 70 local CACs in Texas. It is the

mission of CACTX to support Texas CACs, in partnership with local communities and agencies investigation and prosecuting child abuse, in order to restore the lives of children who have been abused.

#15

Columbia Southern University

<http://www.columbiasouthern.edu/>

Columbia Southern University offers online associate, bachelor and master degrees, in fields such as public administration, criminal justice and organizational leadership. With affordable tuition rates, textbooks provided at no cost and flexible online classes, the CSU format meets the needs of adult learners. CSU also allows up to 75 percent of undergraduate courses and 50 percent of graduate courses to be transferred into the desired degree plan. Visit www.ColumbiaSouthern.edu to learn more!

#59

Crimes Against Children Conference/ DCAC Sales Booth

Stop by the Crimes Against Children's Conference/DCAC sales booth to purchase your conference t-shirts and polos, as well as our nationally relevant child abuse education materials. We offer video-based curriculum packages for mandated reporters, Spanish speakers, parents, and children. Want to see the curriculum in action? Attend Building an Education Program for Your CAC and our Spanish Recognizing and Reporting, Como Reconocer y Reportar el Abuso Hacia Menores.

#76, 77 & 78

Dallas Police Department

<http://www.dallaspolice.net/>

We represent the Dallas Police Department Homicide Unit. We have shirts for sale that will benefit the Dallas Police Widows and Orphans Fund.

#55

Dallas Police Department Explorers

<http://dallaspolice.net/communities/policeExplorers>

The goals and objectives of the Dallas Police Enforcement Program are to: Further the Explorer's Education, Encourage their participation in a wide variety of service activities, Enhance the Explorer's preparation for future roles as citizens, leaders and future law enforcement officers.

#66

DCAC Animal Assisted Therapy Program

<http://www.dcac.org/therapy>

At the Dallas Children's Advocacy Center, therapy dogs offer a unique form of support to children and families. Therapy dogs are different from service dogs in that they do not provide physical assistance but do their work by sitting quietly while providing emotional support and

acceptance. Research has proven that contact with a therapy dog can lower blood pressure, decrease the heart rate and calm other anxiety related symptoms that are often associated with the type of emotional trauma victims have experienced.

#91

Digital Intelligence, Inc

<http://www.digitalintelligence.com/>

Digital Intelligence is the industry leader in providing hardware for practitioners of Digital Forensics and eDiscovery. Offering specialized workstations, write blockers, duplicators as well as software and training, Digital Intelligence has been providing products and services across the globe for nearly 20 years.

#35

DME Forensics

<http://dme forensics.com/>

DME Forensics is an innovative technology and services company focused on providing software, training and digital & multimedia evidence analysis to the criminal justice and civil litigation communities. Whether you are looking to recover data from CCTV DVR Systems, enhance or clarify audio or video, or looking to increase your capabilities through training, our team has the expertise required to assist you in fast changing discipline.

#34

Evidence Talks, Ltd.

<https://www.evidencetalks.com/>

Evidence talks provides comprehensive digital forensic capabilities to US government, law enforcement, military, and law enforcement agencies. Specializing in complex and large scale issues, our products are designed to provide quick intelligence in a forensically sound manner. Our Spektor Toolkit enables operators to rapidly triage, preserve, and automatically examine data stored on computers, servers and mass storage devices. Spektor is comprehensive, safe, and accepted forensically and evidentially. Our newest product, Cascades Forensics, is a client-server architecture that combines our core SPEKTOR triage technology with policy based automated processing logic designed to automatically chain different forensic tools and process to reduce the number of steps needed by an investigating officer.

FIVE O Gear is a Christian company owned and operated by police officers in Tennessee. We offer the FIVE O emblem on shirts, hats, bags, knives, patches, decals and much more. Represent your profession and faith with some FIVE O Gear!

#72 & 73

Games for Life Situations

<http://www.gamesforspecialneeds.com/>

Original hands-on games and sensory products designed to help with life situations. Categories include social, emotional, transitions, safety, motor skills, and other developmental areas!

#95

Griffeye

<https://www.griffeye.com/>

The world's premier platform for accumulating knowledge and building intelligence. The Analyze Platform helps you process and analyze large amounts of image and video data, automatically eliminate and prioritize information, detect and highlight critical clues as well as identify relationships. TECHNOLOGY HAS CREATED THE PROBLEM, BUT IT CAN ALSO PROVIDE THE ANSWER.

#39 & 40

Guidance Software

<https://www.guidancesoftware.com/>

Guidance (NASDAQ: GUID) exist to turn chaos and the unknown into order and the known—so that companies and their customers can go about their daily lives without worry or disruption, knowing their most valuable information is safe and secure. The makers of EnCase®, the gold standard in forensic

security, and EnCase™, an automated cyber risk management platform, Guidance provides a mission-critical foundation of market-leading applications that offer deep 360-degree visibility across all endpoints, devices and networks, allowing proactive identification and remediation of threats. From retail to financial institutions, our field-tested and court-proven solutions are deployed on an estimated 33 million endpoints at more than 70 of the Fortune 100 and hundreds of agencies worldwide. From beginning to endpoint. For more information about Guidance Software, please visit guidancesoftware.com.

#23

Hawk Analytics

<http://www.hawkanalytics.com/>

Hawk Analytics' feature product, CellHawk, extracts rapid answers and compelling visual evidence from cell phone call detail records (CDRs) and other location-based data. Get Answers: Turn all your raw data into meaningful answers. Save Time: An analysis that took 8 hours in Microsoft Streets and Trips was redone in CellHawk in less than 5 minutes.

#32

Hi-Dow International

Hi-Dow International is the leading manufacturer and distributor of bio-electric muscle simulators. We specialize in pain management and recovery. All of our devices are FDA approved in the US; CE in Europe, and carry a 510k certificate for insurance purposes.

#58

HTCI Edas Fox

<http://www.edasfox.com/>

For over 10 years we have supported the ICAC community with their digital forensics needs, including our line of forensic computers, the EDAS FOX. Led by a retired law enforcement officer who began working online child exploitation cases in 1996, EDAS FOX is uniquely qualified to be your partner.

#18

In Safe Hands

<https://www.insafehandseducators.com/>

In Safe Hands Educators In Safety was established in 2009 by a team of former Australian detectives who specialized in child abuse investigations. The Company has developed an array of specialized child protection courses for professionals and volunteers working with children. These courses are delivered to over 200,000 professionals annually across the world. They specialize in tailoring child protection and abuse courses for any type of organization. Not only do they specialize in child protection training but they also assist organizations to create a child safe environment and conduct internal risk management after an alleged child protection issue has been identified. If you are

interested in the advancement in child protection training, or would like to discuss how training could assist the professionals or volunteers within your organizations, please do not hesitate to speak to our team at the conference.

#17

International Human Trafficking Analysis Center

<http://www.deliverfund.org/>

DeliverFund's International Human Trafficking Analysis Center (iHTAC) provides collection, integration, analysis and dissemination of human trafficking intelligence. It serves as the central all source, shared knowledge bank on human trafficking activity, human traffickers and their networks, and the central dissemination and coordination point for law enforcement, select nonprofits and the professionals working to end modern day slavery. Our iHTAC corporate partners include Marinus Analytics, Shadow Dragon Cyber Intelligence, Atlantic Data Forensics, RedJack, TRAC, Verisk Analytics, and A21.

#88 & 89

INTERPOL Washington

<https://www.justice.gov/interpol-washington>

INTERPOL Washington, the United States National Central Bureau, serves as the designated representative to the International Criminal Police Organization (INTERPOL) on behalf of the Attorney General. INTERPOL Washington is the official U.S. point of contact in INTERPOL's worldwide, police-to-police communications and criminal intelligence network. A component of the U.S. Department of Justice (DOJ), INTERPOL Washington is co-managed by the U.S. Department of Homeland Security (DHS) pursuant to a Memorandum of Understanding that ensures a continuing commitment to the guidance and oversight of the organization and reinforces its role in effectively

ATTEND THE EXHIBITOR WORKSHOPS!

Attendees will receive one entry (for each exhibitor workshop attended) to a drawing for 2 Apple Watches, awarded Wednesday evening at the social event.

You must be present to win.

sharing and exchanging international criminal investigative and humanitarian assistance information.

#16

Justice 3D

<http://www.justice3d.com/>

Justice 3D provides advanced training and consulting to law enforcement, prosecutors and other allied professionals in the areas of child abuse, sexual assault and domestic violence. The company's team of trainers are career law enforcement officers, prosecutors, advocates and medical experts in these areas. We offer both single and multi-day trainings and will customize them to fit your agency's needs.

#71

Juvenile Justice Online

Juvenile Justice Online was created to supply all School Administrators, Law Enforcement Officers, Juvenile Officers, Judges, and Attorneys with an alternative to Suspension, Expulsion, or Arrest. Juvenile Justice Online takes aspects of restorative justice and education transforming it into a robust online education tool designed guide children back onto the right path. This online Diversion tool can be used by juvenile officers and SRO's to give the child who's made a poor choice an opportunity to learn from that mistake without entering the judicial system. Juvenile Justice Online operates as a completely customizable education and management system for SRO's and/or administrators who are guiding children who get caught up in Sexting and Cyber-Bullying. This approach ensures the child and their parent receives education and reform specific to the mistakes they have made. By introducing content aligned to each mistake (drugs abuse, sexting, truancy, and many more) the child experiences stories and examples related to their challenges. The system also supplies the Juvenile Officer with tools and a fully integrated learning management system (LMS) to assign writing assignments, research, Juvenile Justice Online educational videos, tasks, apology letters, and many other items to enrich the child's education and ultimately transform a bad decision into revolutionary learning experience.

#94

Katana Forensics, LLC

<https://katanaforensics.com/>

Katana Forensics, LLC is a veteran owned global software firm that specializes in mobile device and Mac forensics. Our motto, "Verum Utilitas", truth in tools, is the guiding principle of our team. We service, law enforcement, military, corporations, and law firms. Katana Forensics' philosophy is to develop forensic applications that are cost effective while preserving performance. Lantern 4 is our flagship application. Lantern was developed to be an intuitive forensic tool that produced the most data in a timely fashion. This

allowed investigators and examiners to review a greater amount of actionable evidence. Katana Forensics also developed Lantern Triage, a triage application for cell phones. Katana Forensics, Better Doesn't Have To Cost More!

K&S Teaching and Consulting LLC

<https://www.kandsteaching.com/>

We specialize in Undercover Chat Investigations training, customized 1-5 day courses or expert witness testimony dealing with child exploitation cases. I have been teaching since 2006, when I was the primary instructor for the Immigration and Customs Enforcement (ICE) "On-line Undercover Investigations" course for 2006 and 2007 instructing nearly 200 agents. In 2010, I designed and began teaching a week long "On-line Undercover Chat Investigations" course. I have taught this course in various states across the United States. I have also taught various courses concerning the sexual exploitation of children all over the world: Mexico, Peru, Russia, China and Spain.

#83

MSAB Inc.

<https://www.msab.com/>

MSAB is a world leader in the provision of forensically secure tools for the extraction and analysis of data from mobile devices. MSAB was founded in 1984 and now operates with offices worldwide and products being used in over 100 countries. Together with pioneering law enforcement organizations we helped create the mobile forensics industry and we are still committed to driving and leading it forward with singular focus on developing a quality forensic solution that creates secure and trusted results for end users. MSAB provides a wide portfolio of solutions including "XRY" and "Kiosk" with capabilities to recover deleted data from mobile devices, smart phones, mobile phones, 3G modems, GPS and tablet devices.

#14

National Children's Advocacy Center

<http://www.nationalcac.org/>

The NCAC Training Center provides a variety of resources designed to equip child serving professionals with the skills they need to protect children. Resources include the Child Abuse Library Online (CALiO™), and customized trainings with topics that include poly-victimization, and forensic interviewing of children.

#82

National Computer Forensics Institute

<https://www.ncfi.ussc.gov/ncfi/>

The National Computer Forensic Institute (NCFI) is a federally funded training center dedicated to instructing state and local officials in digital evidence and cyber crime investigations. The NCFI was opened in 2008 with a mandate to provide state and local law enforcement, legal and judicial professionals a free, comprehensive education on current cyber crime trends, investigative methods, and prosecutorial and judicial challenges. Run by the United States Secret Service and the Alabama Office of Prosecution Services, the training model is based upon the Secret Service's cyber investigative strategy, which relies on partnering with and sharing information between academia, private industry and law enforcement/legal communities to combat the ever evolving threat of cyber crime. The curriculum reflects current trends in the field and addresses potential technological obstacles as they are encountered in active investigations. The NCFI is located in Hoover, Alabama, a suburb of Birmingham. State and local agencies benefit from a tuition free education. In addition, all travel costs, hotel and per diem are covered by the NCFI. In some of the forensic courses and intrusion courses, students are issued all of the hardware, software and licenses necessary to conduct these investigations.

#90

National Criminal Justice Training Center of Fox Valley Technical College

<https://ncjtc.fvtc.edu/>

The National Criminal Justice Training Center (NCJTC) of Fox Valley Technical College, one of the leading national criminal justice educators, offers expert facilitated training and technical assistance. Flexible, diverse and innovative child protection courses are available to federal, state, tribal, and local criminal justice professionals. Training topics include: Bullying and Cyber Bullying, Child Abuse, Child Homicide, Commercial Sexual Exploitation of Children, Computer Facilitated Crimes Against Children, Forensic Interviewing, Human Trafficking, Missing and Abducted Children, Underage Alcohol and Drug Use, Youth Focused Community Policing, and Youth Suicide Prevention. Through community partnership, NCJTC training and technical assistance programs have increased awareness of crimes against children and affected significant, positive changes in the communities we serve. Invite us to your community today. Visit ncjtc.org for more information.

#50 & 51

National Missing and Unidentified Persons System (NamUs)

<https://www.namus.gov/>

The National Missing and Unidentified Persons System (NamUs) offers free forensic, analytical, and investigative resources to law enforcement agencies, medical examiners, and coroners across the United States to resolve missing and unidentified person cases. With funding from the National Institute of Justice, NamUs provides forensic anthropology, forensic odontology, fingerprint examination, and DNA profiling for upload to the Combined DNA Index System (CODIS), all at NO COST to investigating agencies.

#79

National Runaway Safeline

<https://www.1800runaway.org/>

National Runaway Safeline serves as the federally-designated national communication system for runaway and homeless youth. NRS makes over 250,000 connections to help and hope through its crisis hotline (1-800-RUNAWAY) and online services (www.1800RUNAWAY.org) each year. NRS provides crisis and prevention services to youth, families and community members throughout the country. Prevention services include the Let's Talk: Runaway Prevention Curriculum, which is a free, evidence based life skills curriculum for youth.

#45

National White Collar Crime Center (NW3C)

<http://www.nw3c.org>

For more than three decades, NW3C has supported state, local, federal and tribal law enforcement and prosecutorial and regulatory

agencies efforts to prevent, investigate and prosecute economic and high-tech crime. NW3C, a nonprofit organization, is funded primarily by grants through congressional appropriations from the U.S. Department of Justice, Bureau of Justice Assistance. By continually evolving to meet law enforcement's needs in today's digital age, NW3C delivers no-cost, cutting-edge classroom and online trainings in areas of cybercrime, financial crime and intelligence analysis. In the past five years, more than 40,000 law enforcement professionals have attended classroom trainings and over 24,000 have taken advantage of the online trainings.

#12

OffenderWatch®

<http://watchsystems.com/>

OffenderWatch® is the nation's leading sex offender management and community notification solution. Over 3,500 Federal, State, and local law enforcement agencies utilize OffenderWatch to manage over 60% of the nation's registered sex offenders. Watch Systems is a proven technology partner and consultative resource to law enforcement delivering solutions that ensure statutory compliance, increase agency efficiency, and effectiveness, and reduce IT costs while providing the most timely and accurate safety information the public.

#1

Office of Justice Programs

<http://www.ojp.gov>

The Office of Justice Programs (OJP) provides innovative leadership to federal, state, local, and tribal justice systems, by disseminating state-of-the-art knowledge and practices across America, and providing grants for the implementation of these crime fighting strategies. Because most of the responsibility for crime control and prevention falls to law enforcement officers in states, cities, and neighborhoods, the federal government can be effective in these areas only to the extent that it can enter into partnerships with these officers. Therefore, OJP does not directly carry out law enforcement and justice activities. Instead, OJP works in partnership with the justice community to identify the most pressing crime-related challenges confronting the justice system and to provide information, training, coordination, and innovative strategies and approaches for addressing these challenges.

#57

Oxygen Forensics

<https://www.oxygen-forensic.com/en/>

Oxygen Forensics was founded in 2000 as a PC-to-Mobile Communication software company. This experience has allowed our team of mobile device experts to become unmatched in understanding mobile device communication protocols. With this knowledge, we have built innovative techniques into our Oxygen Forensic® Detective allowing our users to access much more critical information than competing forensic analysis tools. We offer the most advanced forensic data examination tools for mobile devices and cloud services. Our company delivers the universal forensic solution covering the widest range of mobile devices running iOS, Android, Windows Phone, BlackBerry and many others.

PassMark Software / OSForensics

<http://www.osforensics.com/>

OSForensics, by PassMark Software, is a feature-rich, robust, and versatile computer forensic software used by computer forensic professionals worldwide. Our newest release is more powerful than ever, adding new industry-first features like our new 360° Case Management Solution which allows you to manage your entire digital forensic investigation from within OSForensics. Build

and save customized report templates, add full-length narratives, and even automatically attach your other forensic tools' reports to your OSForensics report. OSForensics is an affordable, yet complete computer forensic solution for Windows, OS X and Linux operating systems that supports all the traditional forensic features (e.g., drive imaging, indexing, data carving, memory acquisition, email analysis, decryption and more), plus several automated and advanced features you won't find anywhere else such as push-button password extraction, automated Volume Shadow Copy analysis, and the ability to create customized logical images, just to name a few. From novice to expert, at only \$899 per license, OSForensics is the perfect solution for ANY agency on ANY budget.

#36

PenLink

<http://www.penlink.com>

PenLink has been in the business of providing communications surveillance collection systems for more than 30 years. Our software brings organized information to the forefront and pulls together a more visual landscape of data, giving clarity to complex data for people who need impactful answers now. Whether loading historically collected data or live-collecting from virtually any communications service provider, our solutions—PLX, PenLink8, LINCOLN2 and Xnet—enable our users to easily ingest and normalize native file formats or delivery standards, regardless of the data's magnitude. During analysis, our products normalize across multiple data sets, find commonalities, and deconflict targets and cases. PenLink is headquartered in Lincoln, Nebraska, and is home to most of our approximately 100 employees; we also have offices in Boulder, Colorado, and Washington D.C. For more information, please visit www.penlink.com.

#86

SafetyNet: Smart Cyber Choices

<http://www.smartcyberchoices.org/>

SafetyNet: Smart Cyber Choices® is a proactive technology and public safety program as well as a community awareness effort. Through our long-standing record of success and partnership with the San Diego ICAC, our program has been lauded as a leader in internet safety education. The SafetyNet® internet safety program is currently presented in a one-hour assembly format; age-appropriate assemblies for grade levels 4th through 9th with a special focus on middle school students and an additional presentation which is tailored to parents and their needs. This program can help your team and local schools encourage kids to stop and think before they make life-altering decisions.
